Handbook of Drug Metabolism

edited by

Thomas F. Woolf

Parke-Davis Pharmaceutical Research
Ann Arbor, Michigan
Contents

Preface iii
Contributors ix

Part 1 Fundamental Aspects of Drug Metabolism

1. Pharmacokinetics of Drug Metabolites
   Philip C. Smith 1

2. Oxidative Metabolic Bioactivation of Xenobiotics
   Stéphane Mabic, Kay Castagnoli, and Neal Castagnoli, Jr. 49

3. Morphofunctional Aspects of the Hepatic Architecture: Functional and Subcellular Correlates
   Felix A. de la Iglesia, Donald G. Robertson, and Jeffrey R. Haskins 81

4. The Cytochrome P450 Oxidative System
   Paul R. Ortiz de Montellano 109

5. Transformation Enzymes: Oxidative; Non-P450
   Allen E. Rettie and Michael B. Fisher 131

6. Transformation Reactions: Glucuronidation
   Brian Burchell 153

Part 2 Factors Affecting Drug Metabolism

7. Pharmacogenetics
   Ann K. Daly 175
8. Inhibition of Drug Metabolizing Enzymes: Molecular and Biochemical Aspects  
   *F. Peter Guengerich*
   
9. Metabolic Drug Interactions  
   *Wayne D. Hooper*
   
10. Induction of Human Drug-Metabolizing Enzymes: Mechanisms and Implications  
    *Martin J. J. Ronis and Magnus Ingelman-Sundberg*
   
11. Sites of Metabolism: Lung  
    *Garold S. Yost*
   
**Part 3 Technologies**

12. Applications of Heterologous Expressed and Purified Human Drug-Metabolizing Enzymes: An Industrial Perspective  
    *A. David Rodrigues*
    
13. In Vivo and In Vitro Recombinant DNA Technology as a Powerful Tool in Drug Development  
    *Thomas Friedberg, C. J. Henderson, M. P. Pritchard, and C. R. Wolf*
    
14. In Vitro Metabolism: Subcellular Fractions  
    *Sean Ekins, Jukka Mäenpää, and Steven A. Wrighton*
    
15. In Vitro Metabolism: Hepatocytes  
    *Michael W. Sinz*
    
16. The Isolated Perfused Liver as a Tool in Drug Metabolism Studies  
    *Martín Kukan*
    
17. Metabolic Models of Cytotoxicity  
    *Munir Pirmohamed and B. Kevin Park*
    
18. In Vitro Metabolism: FMO and Related Oxygenations  
    *John R. Cashman*
    
19. Applications of Caco-2 Cells in Drug Discovery and Development  
    *Shiyin Yee and Wesley W. Day*
    
20. The Role of Nuclear Magnetic Resonance Spectroscopy in Drug Metabolism  
    *I. D. Wilson, J. K. Nicholson, and J. C. Lindon*
Contents

Part 4  Metabolism in Drug Discovery and Development

21.  Preclinical Drug Metabolism Studies and Strategies  551
    Philip B. Inskeep and Wesley W. Day

22.  Clinical Drug Metabolism Studies  577
    William F. Pool

Index  589
