PART I—FUNDAMENTALS OF MANAGED CARE PHARMACY

BENEFIT MANAGEMENT ........................................ 1

Judith A. Cahill, Part Editor

Chapter 1—The U.S. Health Care System and the Development of
Managed Care ............................................... 3

Robert P. Navarro and Judith A. Cahill

Introduction to U.S. Health Insurance Industry.............. 4
Evolution of the Health Insurance Industry................ 6
Economic Basis for the Development of Managed Care...... 7
Early Development of Managed Care.......................... 8
HMO Act of 1973 ................................................ 11
Federal and State Growth in Managed Care: Medicare
and Medicaid ................................................... 13
MCOs: More than HMOs ......................................... 14
Physician Reimbursement Mechanisms........................ 19
Gatekeeper Physicians .......................................... 22
Risk Sharing of Pharmacy Cost ............................... 22
Carve-Out and Ancillary Health Care Benefits ............. 22
Quest for Quality ............................................... 23
Impact of Managed Care on Physicians and
Pharmacists ..................................................... 24
Member Involvement in Managed Care ....................... 26
Conclusion ....................................................... 27
# Chapter 2—Pharmacy Benefit Management Principles and Practices

*Robert P. Navarro*

- Basis for Pharmacy Benefit Management ........................................... 29
- Principles of Pharmacy Benefit Management ....................................... 32
- Growth of PBMs .................................................................................. 33
- Pharmacy Benefit Management Program Components .......................... 36
- Advanced Pharmacy Benefit Management Components .......................... 43
- Measuring Pharmacy Benefit Management Program Performance ........... 43
- Conclusion ......................................................................................... 45

# Chapter 3—Pharmacy Benefit Design, Contracting, and Marketing

*John D. Jones*

- Business Basis for Pharmacy Benefit Management ................................. 47
- Corporate and Government Impetus for Pharmacy Benefit Management .... 49
- Legal Basis of Pharmacy Benefit Management ....................................... 50
- Benefit Design, State Requirements ..................................................... 52
- Principles of Marketing Pharmacy Benefits .......................................... 53
- Payer and Patient Expectations and Decision Points ............................... 55
- Role of Members in Pharmacy Benefit Provider Selection ....................... 57
- Pharmacy Performance Measurements Important in Marketing .............. 59
- Marketing Campaign Advertisement Examples ...................................... 60
- Marketing Process ................................................................................ 60
- Pharmacy Benefit Contracting Components ......................................... 62
- Pharmacy Benefit Management Contracting Trends .............................. 64
- Risk Contracting .................................................................................. 65
- Overview of Impact of Medicare and Medicaid ...................................... 65
- Risk-Contracting Elements and Executions .......................................... 68
- Payer Expectations ............................................................................. 70
- Performance Measurement ................................................................... 72
- Future Trends in Pharmacy Benefit Design and Contracting ................. 73
- Conclusion ......................................................................................... 76
- Appendix 3–A ..................................................................................... 77
- Appendix 3–B ..................................................................................... 83
Chapter 4—Pharmacy Distribution Systems and Network Management ........................................... 89
Lowell T. Sterler and Douglas Stephens

Pharmacy Program Distribution Options ............................................. 90
Community Pharmacy Provider Networks ........................................ 90
Pharmacy Provider Network Development ....................................... 92
Pharmacy Provider Network Contracting ......................................... 93
Participating Pharmacy Provider Agreement .................................. 94
Participating Pharmacy Provider Manual ....................................... 95
Participating Pharmacy Network Management Issues ...................... 95
Measuring Performance ................................................................. 97
Audits ......................................................................................... 98
Reports ..................................................................................... 100
Member Satisfaction .................................................................... 100
In-House Pharmacies .................................................................... 101
Mail Service Pharmacy .................................................................. 107
Developing an Integrated Distribution System ............................... 108
Pharmacist’s Role ......................................................................... 111
Impact of Managed Care on the Profession of Pharmacy ................. 114
Conclusion ................................................................................ 114
Appendix 4–A ............................................................................. 116

Chapter 5—Pharmacy Data and Information Systems .................. 125
John H. Romza and Garth E. Black

Scope of Pharmacy Information Management .............................. 125
Pharmacy Information Management Systems ............................. 127
PMSs and Electronic Data Interchange ......................................... 134
Role of Switching Companies ....................................................... 135
Internet Technology ..................................................................... 137
Adjudication Systems .................................................................. 138
Other MCO Information Systems ................................................ 141
Conclusion ................................................................................ 143

Chapter 6—Drug Formulary Management ................................. 145
Michael J. Dillon

History and Purpose of Drug Formularies .................................... 145
Definitions ................................................................................ 147
Why Formularies? .................................................................... 148
Table of Contents

Role of Pharmacists ................................................. 309
Conclusion .......................................................... 311

Chapter 14—Health Informatics Systems ......................... 313
Robert P. Navarro, Robert Da Silva, and Suzanne Rivkin

Evolution of Pharmacy Data Standardization ................... 314
EDI and Electronic Commerce ...................................... 315
Data and Information Needs of Managed Care .................. 318
Pharmacy and Medical Claims Integration ...................... 324
Electronic Medical Record Data ................................... 328
Building a Data Warehouse ....................................... 332
Patient Outcomes Assessment .................................... 336
Electronic Prescribing .............................................. 337
Merging Retrospective and Transactional Data .................. 340
Pharmacy and Health Telematics ................................ 341
On-Line Patient Marketing ....................................... 342
Conclusion .......................................................... 343

Chapter 15—Provider and Vendor Risk Contracts ............... 347
Craig S. Stern, Carol J. Stern, and John M. Cronin

Pharmacy Risk Contracting ........................................ 347
Physician Risk Contracts ........................................... 352
Reimbursement Agreements ....................................... 359
Choosing a Reimbursement Methodology ....................... 364
Quality Issues ...................................................... 365
Forecast ............................................................ 366
Conclusion .......................................................... 368

Chapter 16—Disease Management Programs ..................... 371
Robert P. Navarro, Dale Christensen, and Harry Leider

Definition and Goals ............................................... 372
Rationale ........................................................... 374
Medical Conditions Appropriate for Disease Management .... 375
Disease Management Process ...................................... 376
Growth of Disease Management ................................... 378
Role of Pharmacy Benefit Management Companies .......... 378
Pharmaceutical Manufacturer Role in Disease Management ... 379
Role of Physicians in Disease Management ..................... 380
Role of Pharmacists in Disease Management ................. 382
