Preface xi

PART I BASIC CONCEPTS AND PHENOMENA 1

1 Meaning and semantics 3
  1.1 Levels of meaning 3
    1.1.1 Expression meaning 4
    1.1.2 Utterance meaning 7
    1.1.3 Communicative meaning 9
  1.2 Sentence meaning and compositionality 11
    1.2.1 Grammatical meaning 12
    1.2.2 Syntactic structure and combination rules 13
    1.2.3 The principle of compositionality 14
  Checklist 16
  Further reading 17
  Notes 17

2 Descriptive, social and expressive meaning 19
  2.1 Meanings are concepts 19
    2.1.1 The meaning of a word 19
    2.1.2 The meaning of a sentence 21
  2.2 Descriptive meaning 22
    2.2.1 Descriptive meaning and reference 22
    2.2.2 Denotations and truth conditions 25
    2.2.3 Proposition and sentence type 26
  2.3 Meaning and social interaction: social meaning 27
    2.3.1 Expressions with social meaning 27
    2.3.2 Social meaning in Japanese 30
  2.4 Meaning and subjectivity: expressive meaning 31
    2.4.1 Expressive meaning 32
    2.4.2 Social versus expressive meaning 34
  2.5 Connotations 35
  Checklist 36
6.7.4 Semantic irregularity
6.8 Summary
Checklist
Exercises
Further reading
Notes

PART II THEORETICAL APPROACHES

7 Meaning components

7.1 The structuralist approach
  7.1.1 Language as a system of signs
  7.1.2 Syntagmatic and paradigmatic relations
7.2 Applying the structuralist approach to meaning
  7.2.1 Semantic units: morphemes and lexemes
  7.2.2 Paradigmatic and syntagmatic semantic relations
7.3 Semantic features
  7.3.1 Binary semantic features
  7.3.2 Application to paradigmatic relations
  7.3.3 Application to combinatorial meaning properties
  7.3.4 Ideal properties of semantic features
  7.3.5 Evaluation of the binary feature approach
7.4 Semantic formulae
  7.4.1 Dowty's decompositional semantics
  7.4.2 Jackendoff's Conceptual Semantics
7.5 Semantic primes: Wierzbicka's Natural Semantic Metalanguage
7.6 Summary and evaluation of the approaches to decomposition

Checklist
Exercises

Notes

8 Meaning and language comparison

8.1 Translation problems
8.2 Headache, international
8.3 Relativism and universalism
8.4 Berlin and Kay's investigation of colour terms
8.5 Consequences

Notes
9 Meaning and cognition

9.1 Categories and concepts 172
9.2 Prototype Theory 174
  9.2.1 The traditional model of categorization 174
  9.2.2 Prototypes 175
  9.2.3 Fuzzy boundaries 176
  9.2.4 Family resemblance 177
  9.2.5 Degrees of membership 178
  9.2.6 The prototype model of categorization 178
  9.2.7 What kinds of entities are prototypes? 180
  9.2.8 Which features make up the prototype? 181
  9.2.9 Similarity 182
9.3 The hierarchical organization of categories 183
  9.3.1 The basic level 183
  9.3.2 Properties of the basic level 185
9.4 Challenges to Prototype Theory 186
  9.4.1 Graded membership vs graded structure 186
  9.4.2 Fuzzy boundaries 188
  9.4.3 Summary 191
9.5 Semantics and Prototype Theory 191
  9.5.1 Cognitive semantics 191
  9.5.2 Polarization 192
  9.5.3 Flexible concepts: vagueness 194
  9.5.4 Means of differentiation 196
  9.5.5 Summary 199
9.6 Semantic knowledge 200
  9.6.1 Personal knowledge vs cultural knowledge 200
  9.6.2 The apple juice question 201
  9.6.3 Cultural knowledge vs semantic knowledge 203
9.7 Summary 206
Checklist 208
Exercises 208
Further reading 209
Notes 209

10 Sentence meaning and formal semantics 211

10.1 Japanese numerals: a simple example of a
compositional analysis 211
  10.1.1 The system of numerals 211
  10.1.2 Formal description 212
  10.1.3 The general scheme 214
10.2 A small fragment of English 215
  10.2.1 The grammar of the fragment 216
  10.2.2 The predicate logic language PL-F: its grammar 219
