Validated Cleaning Technologies for Pharmaceutical Manufacturing

Destin A. LeBlanc

Interpharm Press
Denver, Colorado
# Contents

PREFACE xi
  Acknowledgments xiv
  Author Biography xv

1. CLEANING OBJECTIVES 1
  Product Integrity 2
  Equipment Reuse 4
  Regulatory Requirements 4
  Other Objectives 9
  *Solvent Reduction*
  *Shorter Cleaning Times*
  *Increased Equipment Utilization*
  *Extension of Equipment Life*
  *Multiproduct Equipment*
  *Worker Safety*
  *Cost-Effectiveness*
8. SETTING ACCEPTANCE CRITERIA
   Limit in Subsequent Product
   Limit per Surface Area
   Limit in the Analyzed Sample
   Recovery Factors
   Effects on Analytical Method Validation
   Visual Cleanness
   Nonuniform Contamination
   Microbiological Contamination
   References

9. ANALYTICAL METHODS FOR CLEANING VALIDATION
   Detection Limits
   Specificity
   Nonspecific Methods
   Method Validation
      Specificity
      Range
      LOD/LOQ
      Linearity
      Accuracy
      Precision
      Keys to Method Validation
   Target Analytes
   Typical Analytical Procedures
      High Performance Liquid Chromatography
      Total Organic Carbon
Atomic Absorption
Ion Chromatography
Ultraviolet Spectroscopy
Enzyme-Linked Immunosorbent Assay (ELISA)
Titration
Conductance
pH

References 167

10. SAMPLING METHODS FOR CLEANING VALIDATION 169

Direct Surface Sampling 170
Swab Sampling 174
Rinse Sampling 181

Single Point Final Rinse Sampling
Separate Sampling Rinse

Placebo Sampling 185
Recovery Studies 188

References 191

11. MICROBIAL ISSUES IN CLEANING VALIDATION 193

Importance of Microbial Residue Control 194
Changes in Microbial Residues 194
Microbial Residue Reduction 196

Limits for Subsequently Sterilized Products
Limits for Aseptically Produced Products
Limits for Nonsterile Products

What is Measured for Acceptance Criteria? 200

Sampling Tools 202
Other Concerns 202

References 203
12. CHANGE CONTROL AND REVALIDATION 205

Change Control 205

Change in Pumps, Spray Balls, and/or Other Mechanical Equipment
Change in Water Quality in the Washing Step
Change in Water Quality in the Rinsing Step
Change in the Cleaning Agent
Change in the Manufacturing Process of the Cleaned Product

Revalidation 211

Revalidation with a Significant Change
Revalidation on a Regular Basis

References 214

13. SPECIAL TOPICS IN CLEANING VALIDATION 217

Biotech Manufacturing 218
API Manufacture 220
Contract Manufacture 224
Clinical Manufacture 228
In Vitro Diagnostics 229

References 230

14. FDA EXPECTATIONS 233

General Requirements 235

Evaluation of Cleaning Validation 237

Equipment Design
Cleaning Process Written
Analytical Methods
Sampling
Routine Production In-Process Control
Establishment of Limits
Other Issues
Contents

Summary 245
References 246

APPENDICES 247
A. Guide to Inspections of Validation of Cleaning Processes 247
B. Cleaning Validation Glossary 261

INDEX 275
