A History of Modern Psychology

Thomas Hardy Leahey
Virginia Commonwealth University
### CONTENTS

Preface xi

**PART I Introduction** 1

1 Psychology, Science, and History 3
   - Understanding Science 4
   - The Image of Modern Science 4
   - Explanation 5
   - Theories: How Scientists Explain Things 9
   - The Nature of Scientific Change 13
   - Science as a Worldview 21
   - The Scientific Challenges to Psychology 24

Psychology and The Discipline of History 24
   - History of Science 24
   - Historiography of Psychology 28

Bibliography 30
References 30

2 Laying the Foundations 34

Three Eras and Two Revolutions in the Human Ways of Life 34
The Origins of “Psychology” 36
The Renaissance 36
   - The Ancients and the Moderns: The Revival of Humanism 37
   - Renaissance Naturalism 37

The Scientific Revolution 38
   - The Transformation of Matter and the Mechanization of the World Picture 38
   - The Transformation of Experience and the Creation of Consciousness 39
   - Creating Psychology: René Descartes 39

Philosophical Psychology in the Seventeenth and Eighteenth Centuries 43
   - Examining the Mind 43
   - Examining Mind and Body 47
   - Examining Other Minds 48

Human Nature, Morality, and Society 48
   - The Enlightenment Project 48
   - Examining Human Nature 49
   - The Counterenlightenment 50

The Nineteenth Century: Shaping the Field of Psychology 51
   - Central Controversies 51
7 Consciousness Dissolves

New Directions in Animal Psychology, 1898–1909 211
   From Anecdote to Experiment 211
   The Problem of Animal Mind 217
Rethinking Mind: The Consciousness Debate, 1904–1912 219
   Does Consciousness Exist? Radical Empiricism 219
   The Relational Theory of Consciousness: Neorealism 221
   The Functional Theory of Consciousness: Instrumentalism 224
Conclusion: Discarding Consciousness, 1910–1912 225
Bibliography 227
References 229

PART IV Scientific Psychology in the Twentieth Century

8 The Golden Age of Behaviorism, 1913–1950 233

Behaviorism Proclaimed 233
   The Behaviorist Manifesto 233
   The Initial Response, 1913–1918 236
Behaviorism Defined, 1919–1930 239
   The Varieties of Behaviorism 239
   Human or Robot? 241
   Later Watsonian Behaviorism 242
Major Formulations of Behaviorism, 1930–1950 244
   Psychology and the Science of Science 245
   Edward Chace Tolman’s Purposive Behaviorism 247
   Clark Leonard Hull’s Mechanistic Behaviorism 251
   Tolman vs. Hull 254
Conclusion: We’re All Behaviorists Now 257
References 258

9 The Decline of Behaviorism, 1950–1960 261

The Decline Begins 261
   Philosophical Behaviorism 262
   Formal Behaviorism in Peril 267
B. F. Skinner (1904–1990) 269
   Radical Behaviorism as a Philosophy 270
   The Experimental Analysis of Behavior 271
   Interpreting Human Behavior 276
Behaviorism and the Human Mind 279
   Informal Behaviorism 279
   The Concept of Mediation 280
Challenges to Behaviorism 282
   Cartesian Linguistics 282
Erosion of the Foundations 285
   The Disappearance of Positivism 285
   Constraints on Animal Learning 286
   Awareness and Human Learning 289
References 290
Early Theories in Cognitive Psychology 293  
The New Structuralism 293  
Cognition in Social Psychology 295  
New Cognitive Theories of Perception and Thinking 296  
The Mechanization of Thought 297  
Artificial Intelligence 297  
Solving Purpose: The Concept of Feedback 298  
Defining Artificial Intelligence 299  
The Triumph of Information Processing 300  
The “Cognitive Revolution” 300  
The Myth of the Cognitive Revolution 305  
The Nature of Cognitive Science 307  
Informavores: The Subjects of Cognitive Science 307  
The Minds of Informavores: The New Functionalism 307  
Cognitive Science at Maturity: Debates and Developments 309  
Uncertainties 309  
Debates 310  
Developments: The New Connectionism 315  
The Study of the Mind at the Beginning of the New Millennium 323  
Bibliography 323  
References 325  

PART V Applied Psychology in the Twentieth Century 329  

11 The Birth of Applied Psychology, 1892–1919 331  
Scientific, Applied, and Professional Psychology 331  
Origins of Applied Psychology 332  
Mental Testing 332  
Founding Applied Psychology in the United States 336  
Professional Psychology 341  
Clinical Psychology 341  
Organizing Professional Psychology 343  
Psychology Enters Public Consciousness: Psychology in the Great War 344  
Psychologists at War 344  
The Shattering Impact of World War I 346  
References 347  

Psychologists in Social Controversy 349  
Psychology in the American Social Context 349  
Is America Safe for Democracy? The “Menace of the Feebleminded” 349  
Making America Safe for Democracy: Immigration Control and Eugenics 352  
Psychology and Everyday Life 357  
Psychologists at Work 357  
When Psychology Was King 358  
Flaming Youth and the Reconstruction of the Family 363
