ASPECTS OF MINING AND SMELTING IN THE UPPER HARZ MOUNTAINS (UP TO THE 13TH/14TH CENTURY) – IN THE EARLY TIMES OF A DEVELOPING EUROPEAN CULTURE AND ECONOMY

With contributions from Friedrich Balck, Andreas Bingener, Wolfgang Brockner, Matthias Deicke, Karin Hegerhorst, Lothar Klappauf, Friedrich-Albert Linke, Ulrich Willerding and Harald Witthöft

Edited by Christiane Segers-Glocke and Harald Witthöft

Preface (Christiane Segers-Glocke) V

Introduction (Lothar Klappauf and Harald Witthöft) VII

Lothar Klappauf

Studies of the development and structure of early metal production 1
  Introduction 1
  Historical background 1
  History of research 2
  The Monuments 5
    a. Mineral resources 5
    b. Supporting industries 8
    c. Mines 12
    d. Smelting sites 12
  Trade and further processing 20
  Development of mining and smelting in the Harz region 22
  Zusammenfassung 23
  Literature 23

Friedrich-Albert Linke

Archaeological survey of monuments of early mining and smelting in the Harz Mountains 30
  Introduction 30
  Prospection 35
    a. Preparation for prospection 35
    b. Prospection 37
    c. Documentation 42
    d. Sampling 44
    e. Work-up of a prospection - broader implications 44
Preliminary results

a. Medieval sites of the 9th–10th century – situated on springs or the upper course of streams

b. Medieval „smelters in the woods“ of the 10th–11th century – situated often in the transition from a steep valley to the surrounding plateau on exposed upstream sites

c. Medieval „smelters in the woods“ of the 12th–13th century – situated on small streams in high valleys, not particularly exposed

d. Medieval smelters of the 13th–14th century – situated along larger streams

e. Modern smelters, from the 16th century onward

Summary

Zusammenfassung

Literature

Wolfgang Brockner and Karin Hegerhorst

Early copper, lead and silver production processes

Introduction

Ore resources of the Harz

Aims of the archaeometrical investigations

Copper winning

Lead / silver line

a. Roast reaction process

b. Roast reduction process

c. Lead soaking („Verbleiendes Schmelzen“)

d. Silver winning by cupellation

Other non-ferrous alloys - brass
