6900 Grove Road • Thorofare, NJ 08086
CONTENTS

Dedication ....................................................................................................................... v
About the Authors ........................................................................................................... ix
Preface ............................................................................................................................. xi

Chapter One: Age-Related Macular Degeneration and Subfoveal Choroidal Neovascularization ................................................................. 1

Chapter Two: Subfoveal Choroidal Neovascularization in Non-Age-Related Macular Degeneration ................................................................. 13

Chapter Three: Diagnostic Imaging for Photodynamic Therapy: Fluorescein Angiography and Optical Coherence Tomography .................... 33

Chapter Four: Treatment of Subfoveal Choroidal Neovascularization Secondary to Age-Related Macular Degeneration ................................. 47

Chapter Five: Photosensitizing Agents ........................................................................ 57

Chapter Six: Clinical Trials for Photodynamic Therapy of Subfoveal Choroidal Neovascularization .............................................................. 69

Chapter Seven: Treatment Protocol for Photodynamic Therapy of Choroidal Neovascularization With Verteporfin ................................. 79

Chapter Eight: Practical Applications of Photodynamic Therapy for Choroidal Neovascularization ............................................................... 91

Chapter Nine: Ophthalmic Complications of Photodynamic Therapy for Choroidal Neovascularization ......................................................... 109

Chapter Ten: Alternative Applications of Photodynamic Therapy ................................................................. 119

Index ................................................................................................................................. 137
