I. Introduction, 3

1. Signaling in the Brain, 5
2. Form and Function in Cells of the Brain, 25

II. Electrical Properties of Neurons, 45

3. Electrical Signaling in Neurons, 47
4. Membrane Ion Channels and Ion Currents, 67
5. Ion Channels Are Membrane Proteins, 89
6. Ion Channels, Membrane Ion Currents, and the Action Potential, 113
7. Diversity in the Structure and Function of Ion Channels, 139

III. Intercellular Communication, 163

8. How Neurons Communicate: Gap Junctions and Neurosecretion, 165
9. Synaptic Release of Neurotransmitters, 195
10. Neurotransmitters and Neurohormones, 223
11. Receptors and Transduction Mechanisms I: Receptors Coupled Directly to Ion Channels, 253
xiv  Contents

14. Sensory Receptors, 341

IV. Behavior and Plasticity, 373

15. The Birth and Death of a Neuron, 375

16. Neuronal Growth and Trophic Factors, 395

17. Adhesion Molecules and Axon Pathfinding, 435

18. Formation, Maintenance, and Plasticity of Chemical Synapses, 467

19. Neural Networks and Behavior, 507

20. Learning and Memory, 537

Bibliography, 571

Index, 589
