Sustainable Land Management - Environmental Protection
A Soil Physical Approach
## Contents

Preface

### CHAPTER I INTRODUCTORY PAPERS

<table>
<thead>
<tr>
<th>Author(s)</th>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Winfried E.H. Blum</td>
<td>Environmental protection through sustainable soil management – a holistic approach</td>
<td>1</td>
</tr>
<tr>
<td>Daniel Tessier</td>
<td>Progress and perspectives in soil physics</td>
<td>9</td>
</tr>
<tr>
<td>Daniele De Wrachien</td>
<td>Sustainable land use: the role of agricultural engineering</td>
<td>19</td>
</tr>
<tr>
<td>Robert J.A. Jones</td>
<td>Assessing the vulnerability of soils to degradation</td>
<td>33</td>
</tr>
<tr>
<td>Freddy O.F. Nachtergaele, Godert W.J. van Linden and Niels H. Batjes</td>
<td>Soil and terrain databases and their applications with special reference to physical soil degradation and soil vulnerability to pollution in central and eastern Europe</td>
<td>45</td>
</tr>
</tbody>
</table>

### CHAPTER II SOIL STRUCTURE

<table>
<thead>
<tr>
<th>Author(s)</th>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Anthony R. Dexter</td>
<td>Soil structure: the key to soil function</td>
<td>55</td>
</tr>
<tr>
<td>Marcello Pagliai and Nadia Vignozzi</td>
<td>The soil pore system as an indicator of soil quality</td>
<td>71</td>
</tr>
<tr>
<td>Alfonso Artigao, Jose Fernando Ortega, Jose Maria Tarjuelo and Jose Arturo de Juan</td>
<td>The impact of irrigation application upon soil physical degradation in Castilla-La Mancha (Spain)</td>
<td>83</td>
</tr>
<tr>
<td>Rosa Colucci, Vito Di Bari, Domenico Ventrella, Giuseppe Marrone and Marcello Mastrorilli</td>
<td>The effect of oil mill effluents on soil aggregation properties</td>
<td>91</td>
</tr>
<tr>
<td>Edoardo A.C. Costantini, Sergio Pellegrini, Nadia Vignozzi, Rossano Ciampalini, Simona Magini and Roberto Barbetti</td>
<td>Using different methods for calibrating field characterisation of soil hydrological qualities for vine and olive tree zoning</td>
<td>101</td>
</tr>
<tr>
<td>Ewa A. Czyz, Anthony R. Dexter and Henryk Terelak</td>
<td>Content of readily-dispersible clay in the arable layer of some Polish soils</td>
<td>115</td>
</tr>
<tr>
<td>Michele Freppaz, Stefano Lunardi, Eleonora Bonifacio, Ricardo Scalenghe and Ermanno Zanini</td>
<td>Ski slopes and stability of soil aggregates</td>
<td>125</td>
</tr>
</tbody>
</table>
Jerzy Lipiec, Aldo Ferrero, Valter Giovannetti, Artur Nosalewicz and Marcin Turki
Response of structure to simulated trampling of woodland soil 133

Olga C. Martins, Nádia L. Castanheira, Célia C. Figueiredo and Francisco L. Santos
Improving Mediterranean soils physical properties by using anionic Polyacrylamide in the irrigation water 141

Daniela Raducu, Nadia Vignozzi, Marcello Pagliai and Gheorghe Pectu
Soil structure of tilled horizons influenced by management practices and implement geometry 149

Neil J. Southorn
The soil structure component of soil quality under alternate grazing management strategies 163

CHAPTER III  SOIL HYDROLOGY

Marnik Vanclooster, Mathieu Javaux, François Hupet, Sébastien Lambot, Aicha Rochdi, Juan David Piñeros-Garcet and Charles L. Bielders
Effective approaches for modelling chemical transport in soils supporting soil management at the large scale 171

Elena Bresci
Water interception capacity of forest litter 185

Luciana Gomes Castro, Paulo Leonel Libardi and Quirin de Jong van Lier
Soil water dynamics in a Brazilian infiltration terrace under different management practices 191

Antonio Coppola and Mario Palladino
Transport properties in soils related to local-scale heterogeneities: theoretical considerations and applications 199

Caroline Coutadeur, Yves Coquet and Jean Roger-Estrade
A compartmental approach for assessing the spatial variability of the hydraulic conductivity within ploughed soils 211

José Carlos Fontes, Maria da Conceição Gonçalves and Luis Santos Pereira
Soil hydraulic properties of volcanic soils of Terceira, Azores 219

Jailani Husain, Horst H. Gerke and Reinhard F. Huttl
Infiltration measurements for determining effects of land use change on soil hydraulic properties in Indonesia 227

Miroslav Kutilek
Infiltration through crust topped soils: Henry’s effect 237

Ana Claudia Rodriguez de Lima, Eloy Antonio Pauletto, Paul Leonel Libardi, Algenor da Silva Gomes and Luis Fernando Spinelli Pinto
Hydraulic characterization of a lowland soil under long-term management systems 247
CHAPTER IV SOIL COMPACTION

Jan J.H. van den Akker
Determination of the susceptibility of subsoils to compaction and ways to prevent subsoil compaction

Rainer Horn
Soil mechanical properties and processes in structured unsaturated soils under various landuse and management systems

Laura Alakukku, Jukka Ahokas and Antii Ristolainen
Response of clay soil macroporosity to stress caused by tracked tractors

Johan Arvidsson, Andreas Trautner and Thomas Keller
Influence of tyre inflation pressure on stress and displacement in the subsoil

Pierluigi Febo and Domenico Pessina
The ground pressure exerted by agricultural machines

Aldo Ferrero, Jerzy Lipiec, Loredana Sudiro and Artur Nosalewicz
Effects of increasing compaction levels on the efficiency of nitrogen topdressing of grasses

Heiner Fleige, Rainer Horn and Florian Stange
Soil mechanical parameters derived from the CA-database ‘subsoil compaction’

Mika Heinonen, Laura Alakukku and Erkki Aura
Effects of reduced tillage and light tractor traffic on the growth and yield of oats (Avena sativa)

Beata Houšková
Assessment of the state of soil compaction in Slovakia

Antonio Paz Gonzalez
Influence of long-term cultivation on soil physical properties and compaction of an Umbric horizon

Alvaro Pires da Silva, Silvia Imhoff and Moacyr Corsi
Soil compaction versus cow-stocking rates on an irrigated grazing system

Joerg Vossbrink, Rainer Horn, Stefan Becker and Petra Koester
Influence of different harvesting methods in the Black Forest on the habitat ecology from a soil physical point of view
CHAPTER V  SOIL EROSION

Paolo Bazzoffi
Impact of human activities on soil loss. Direct and indirect evaluation 429

Rosa Marchetti
Surface and subsurface runoff from a silty-clay soil of the lower Po Valley 443

Frank Nahrwold, Rainer Horn, Stefan Becker, Gerhard Schmidt and Ludwig Rostek
Investigations on the stabilisation of slopes and lowering soil erosion by
surface treatment with the ‘Schmidt-Rekultivator’ 453

Rossella Papini, Paolo Bazzoffi and Sergio Pellegrini
Effect of land use systems on erosion and nutrient loss in the
Mediterranean 459

Pier Paolo Roggero and Marco Toderi
Impact of cropping systems on soil erosion in the clay hills of
central Italy 471

Tommaso Simonato, Gian Battista Bischetti and Giovanni B. Crosta
Evaluating soil erosion with RUSLE and WEPP in an alpine
environment (Dorena Valley – Central Alps, Italy) 481

CHAPTER VI  MODELS, DATABASES AND MAPS

Andrei Canarache and Catalin Simota
Databases and simulation modelling in compaction and erosion studies 495

Thomas Baumgartl
Prediction of tensile stresses and volume change with hydraulic models 507

Bekele Debele and William L. Magette
Modelling rainfall erosivity: the case for Ethiopia 515

Pauline Défossez, Guy Richard, Hubert Boizard and Mike O’Sullivan
Influence of soil water content profile on compaction 525

Elvira Diaz-Pereira, Nadja Prange, Miguel Fernandez, Diego De la Rosa and Felix Moreno
Predicting soil water erosion using the ImpelERO model and a mapped
reference area in the Sevilla province (Spain) 533

José Carlos Fontes, Luis Santos Pereira and Roger E. Smith
Runoff and erosion in volcanic soils: testing deterministic and
semi-empirical modelling 543

Sandro Moretti and Roberto Spicchi
Evaluation of land use and sustainability in a Mediterranean area using
a hydrological erosion model: an example from central Italy 553
Giovanni Pecenik, Roberto Pastres, Serena Rossi, Claudio Bini and Giovanni Maria Zuppi
Modelling tensiometric profiles in a vineyard in the Bardolino area (Verona, Italy) 563

Svetla Rousseva
A model approach for estimating the influence of compacted subsurface layer on soil erosion 573

Massimo Spadoni and Letizia Venuti
Pedological information management for the European project of soil cartography at 1: 250000 scale 581
