Molecular Pathomechanisms and New Trends in Drug Research

Edited by
György Kéri and István Toth
## Contents

*List of contributors*  
*Acknowledgments*  
*Aims and scope*  

### PART 1  
Introduction

1 **Introduction – a breakthrough in modern drug research**  
   GYÖRGY KÉRI AND ISTVÁN TOTH

### PART 2  
Pathomechanisms and molecular target finding

2 **Drug discovery based on functional genomics – target selection and validation**  
   GÁBOR MIKÁLÁ, ISTVÁN VÁLYI-NAGY

3 **Mapping of the human genome**  
   ZOLTÁN L. MARCSEK AND EUGÈNE R. ZABAROVSKY

4 **Molecular diagnosis of signal transduction related diseases**  
   ISTVÁN EMBER AND ISTVÁN KISS

### PART 3  
Common pathway and general mechanism

5 **Signal transduction therapy**  
   ALEXANDER LEVITZKI

6 **Heat shock proteins**  
   PETER CSERMELY AND ICHIRO YAHARA

7 **Transcription factors as targets for drug development**  
   DEVARAJAN KARUNAGARAN AND BHARAT B. AGGARWAL

8 **Apoptosis in various diseases**  
   BELA SZENDE

9 **Caspases – the regulators and executioners of the apoptotic process**  
   PÁL I. BAUER, ERZSÉBET KÉNESI AND ANDRÁS ILLÉS
10 The role of drug metabolism enzymes in signal transduction processes 110
JOZSEF MANDL

11 Recent developments in calcium signaling – implications for disease and drug development 114
GREG MONTEITH

12 T-cell receptors and coreceptors; cytokine receptors 120
ANDRÁS FALLUS

13 Neuro-immune responses in different diseases – role of tumor necrosis factor-α and IL-1 133
SZILYESZTER E. VIZI

14 Regulation of B lymphocyte function by crosstalk between receptors with stimulatory and inhibitory activity 139
JANOS GEGELY AND ANNA ERDEI

PART 4
Drug discovery 149

15 Combinatorial chemistry 151
ÁRPÁD FURKA

16 Lead search, selection and optimization in silico (virtual) screening 166
LÁSZLÓ ORFI AND ISTVÁN KOVESDI

17 The development of carbohydrate based therapeutics 178
NICHOLAS DRINNAN AND TRACIE RAMSDALE

18 Introduction to structure and ligand-based drug design 191
GYÖRGY M. KESERÜ, ILDIKÓ MAGDÓ AND GÁBOR NÁRAY-SZABÓ

19 Gene therapy 203
LÁSZLÓ KOPPER

PART 5
Molecular pathomechanism of cancer 211

20 Cancer genetics 213
LÁSZLÓ KOPPER

21 Cancer as a communication disorder 227
GYÖRGY KERI AND AXEL ULLRICH

PART 6
Infectious diseases 249

22 Human immunodeficiency virus – pathogenesis, replication strategy and the role of antiretroviral drugs 251
23 Signal transduction in virus infected cells – implications for therapy
   PETER KRAJCSI

24 The development of vaccines to prevent rheumatic fever
   COLLEEN OLIVE AND MICHAEL GOOD

25 Systemic antifungal agents
   ROSS P. MCGEARY

PART 7
Diseases of the central and the peripheral nervous system

26 Mechanisms of neurodegenerative diseases
   RICHARD ANTHONY HUGHES

27 Neurobiology of pain – identification of novel targets for new pain management medications
   MAREE SMITH

28 Capsaicin receptors as target molecules on nociceptors for development of novel analgesic agents
   JANOS SZOLCZSANYI

29 Migraine
   ILONA JELENCSEK AND CSABA ERTSEY

30 Regulatory mechanisms in focal ischemic stroke
   ZOLTÁN NAGY, MARTIN J. BERG AND NEVILLE MARKS

31 Signal transduction abnormalities in epilepsies
   PETER HALÁSZ

32 Parkinson’s disease – its causes and treatment
   MICHAEL S. STARR

33 Physiological role of amyloid precursor protein (APP) and β-amyloid peptides
   B. PENKE AND T. HARKANY

34 Eye diseases
   PIROSKA E. RAKOCZY, WEL-YONG SHIN AND CHRIS J. BARRY

PART 8
Cardiovascular diseases

35 Atherosclerosis
   GERD SCHMIDT, MICHAEL TORZEWSKI, STEFAN BARELAGE AND WOLFGANG DROBNIK

36 Disorders of the blood coagulation – fibrinolytic system
   RAYMUND MACIOVICH
37 Angiogenesis
JOZSEF TIMAR, BALAZS DOME AND SANDOR PAKU

PART 9
Endocrinal and gastrointestinal disorders

38 Diabetes and the heart
LINDSAY BROWN

39 The leptin hormonal system as a target for new drugs designed to control food intake and body weight
ANDREW CONSTANTI

40 Regulation of gastric secretion, Helicobacter pylori and inflammation of the gastric epithelium
LASZLO PRONAI, BELA MOLNAR AND ZSOLT TULASSAY

41 Osteoporosis
GYORGY MESZAROS, TAMAS KARDON AND GYULA POOR

PART 10
Drug applications

42 Modulation of drug effects by ABC transporters
GERGELY SZAKACS AND BALAZS SARKADI

43 Peptide or protein based drug delivery and targeting systems
FERENC HUDECZ, GYORGY KOCZAN AND JUDIT REMENYI

44 Current approaches to peptidomimetics
MICHAEL J. KELSO AND DAVID P. FAIRLIE

45 Drug delivery systems utilizing lipids and sugars
ALLAN WONG, VERONIKA BENDER AND ISTVAN TOTH

46 Pharmacokinetic-pharmacodynamic modeling and an example of its application to drug delivery
EDWARD J. TRIGGS
