Herbal Medicine  
keys to  
Physiomedicalism 

including 

Pharmacopoeia
CONTENTS

Chapter 1  Historical aspects of Herbal writers throughout the ages  1
Writers who have contributed to herbal medicine.

Chapter 2  Philosophy of Physiomedicalism  11
What is Physiomedicalism? Thurston’s definition.
Physiomedical writers: Thomson, Beach, Skelton, Cook, Thurston.
Scientific theory

Chapter 3  Principles of treatment  19
Elimination insufficiency: liver, gall bladder, bowel, kidneys and skin.
Acidity and uric acid conditions. Catarrhal conditions
Cholesterolaemia
Toxicity/autotoxaemia

Chapter 4  Vital Force [Chi energy]  28
Vitality. Vital resistance. Reserve vitality. Life tenacity
Flower remedies
Theorem and principia of medicine
Vital state - Positive vital state. Tolerant vital state. Negative vital state

Chapter 5  Functional associations and functional changes  36
Disturbances of function
Mixed tissue states. Reflex associations. Cellular environments. Treatment aims

Chapter 6  Pathology  40
Congestion [See also Chapter 14]. Retained secretions [See also Chapter 8]
Aetiology. Predisposing/exciting causes of disease. Temperaments
Chronic conditions. Tissue changes
Aetiology of disease.
Primary requirements of the cell.
Constitution
Acute disease. Inflammation
Vaccinations. Immunology.
Naturopathic and Herbal medication for infectious diseases. Notifiable diseases.

Chapter 7  Principles of Physiology  70
An explanation of the terms: stimulate, relax and contract.
Review the assessment plan for the patient
Vasomotor System.
Factors influencing the vasomotor system.
Vasa privata. Vasa publica

Chapter 8  Contraction & Relaxation of Tissue
Comments by Dr Lindlahr, Dr Greer.
Too much relaxation of:
Too much Tension of:
Evaluation of the case
Contraction and relaxation of tissue.
Tone and trophic state

Chapter 9  Symptomatology
Chronic inflammatory activity.

Chapter 10  Diagnosis
Diagnosis - concepts and principles. Impact and reaction within the tissues.
Miasms. Typology.
How long will it take to get better? Acute and chronic cases. Curing a patient

Chapter 11  Trophorestoration
Functional adjustments. Trophorestoration.. Active and passive hyperaemia

Chapter 12  Prognosis
Trophorestoration. Factors to be assessed in prognosis.

Chapter 13  How Herbal Medicines work
Combining remedies. Herbal constituents. Active compounds in plants.

Chapter 14  What is disease?
Cook's definition of disease. Thurston's definition of disease.
Vertical & horizontal assessment. Bodily organ system and cellular relationships
Chapter 15  What is Health?  
WHO definition.  
Thurston’s definition. Scientific assessment of Physiomedicalism.  
Question papers for chapters 1-16.

Chapter 16  Naturopathic concepts of treatment  

Chapter 17-30  Bodily systems, disease conditions and treatments  

Chapter 17  Eyes, ears, nose and throat  
Medicines for eye conditions. Formulary  
Eye diagnostics. Treatment perspectives. Eye conditions  
Ear treatments/Ear - skin conditions  
Hearing disorders/Hearing tests. Ear disorders  
Nasal diagnosis. Nasal treatments/Nasal conditions  
Tongue and mouth disorders.  
Preparations for mouth disorders/Oral medications.  
Nutritional therapy.  
Tongue conditions.  
Mouth  
Larynx and pharyngeal conditions.

Chapter 18  Respiratory system  
Antiallergic and antihistamine medicines. Bronchodilators  
Pulmonary and expectorant medicines  
Formulary of Inhalations, linctus and syrups  
Respiratory conditions

Chapter 19  Endocrine system - Adrenal, Pancreas, Breasts, Thyroid  
Medicines for adrenal, pancreas, testicular and thyroid disorders.  
Adrenal medicines/Adrenal disorders  
Diabetes/Hypoglycaemia  
Mammary glands [Also see obstetrics]  
Chapter 20  Cardio Vascular system & Blood disorders
Cardio vascular medicines. Formulary
Syrups and mixtures
Cardio vascular disorders

Chapter 21  Digestive system
Intestinal and hepatic medicines. Antispasmodics
Formulary of emulsions, enemas, laxatives, confecions
Anatomical development. The acute abdomen
Liver and gall bladder disorders. Biliary medication
Digestive disorders. Pancreatic disorders
Ano rectal disease. Blood in the stool. Carcinoma

Chapter 22  Genito urinary system
Genito urinary medicines. Diuretics and diaphoretics
Examination. Urinary conditions

Chapter 23  Urine analysis. Quantitative and Qualitative assessment of urine
Urinary constituents - pH, acidity, alkalinity, mucus, blood, protein.
Water and electrolyte balance

Chapter 24  Immune system
Immune system medicines
Immunology. Pulse test. Autoimmune conditions.

Chapter 25  Nervous system
Nerve disorder medicines – nerve stimulants, tonics, trophorestoratives and antispasmodics. Formulary
Examination
Mental and Emotional disorders - fear, rage, shock, partnership problems
Disorders of the nervous system
Flower healing – how to make your own flower remedies.

Chapter 26  Dermatology including Hair and Nail disorders
Medicines for dermatological conditions
Formulary - balneum [baths], lotions, crem et unguentum [creams & ointments], fomentations, soaps, talc, tar preparations.
Dermal absorption
Hair problems, Nail disorders, Skin disorders.
Chapter 27 Musculoskeletal system
Medicines for musculoskeletal conditions. Formulary - Liniments
Inflammatory responses. Diagnosis
Rheumatic conditions

Chapter 28 Paediatrics
Prescribing
Infantile development. Paediatric conditions.

Chapter 29 Tropical disease/Acute infectious disease/
Helminthic infections/Parasitic disease
Infection - signs and symptoms
Rehydration mixture. Tropical disease conditions

Chapter 30 Obstetrics and gynaecology
Obstetrics
Vitamins and minerals in pregnancy
Pregnancy - bodily changes
Uterine medicines
Post partum Post natal care
Breast feeding and lactation disorders. Babies
Gynaecology
Pelvic disorder aetiology - biochemical, physiological, hormonal, structural
Gynaecological conditions. Menstrual disorders

Chapter 31 Malignancy and Oncology
Observations by William Russell
Treatment programme - diet and nutritional support, juices.

Chapter 32 Nutritional regime
Catabolic and anabolic Mono diet. Juices used as food. Acid and alkaline residue
Dietetic advice. Snacks. Soya and cabbage.

Chapter 33 Pharmacy
Preparations and abbreviations.
Pharmacy continued
Oral compounds. External prescriptions – dressings, plasters, inhalations, liniments, pessaries, sprays, suppositories. [See also dermatology].

Chapter 34 Pharmacology
Bioavailability. Remedy form
What are medicines. Pharmacokinetics.
Long term healing effects. Detoxification. Toxic effects.
Finding the correct dose
Prescribing and dispensing, contra indications.
Sterilisation techniques.

Chapter 35 Practitioners Pharmacopoeia
Materia medica monographs of 420 herbal medicines
Each monograph is written in the following order:
9] Preparations. 10] Dosage and mode of application.

Chapter 36 Emergency herbal medicine
Acute medical emergencies with herbal medication

Chapter 37 Vitamins, trace elements and minerals

Chapter 38 Running a practice
Marketing, Accountancy.

Chapter 39 Herbal Medicines – preparation formulary with doses
A quick reference guide to dosing
Therapeutic classes of medicines

Glossary definitions. References and notes. Index.
