Part One Theoretical aspects of biogeography

1 What is biogeography? 1
  1.1 Introduction 3
  1.2 Biogeography in context 3
  1.3 Biogeography – an inquiring discipline 4
  1.4 Biogeography in real-life situations 5
  1.5 What happens when we ignore biogeography? 6
  1.6 How this book is organised 8
  1.7 Web resources References 10 11

2 Issues in biogeography 13
  2.1 Introduction 13
  2.2 Issues in biogeography at the individual level 14
     2.2.1 Genetic modification 14
     2.2.2 Reduction in genetic variation 14
     2.2.3 Pesticide management 15
  2.3 Issues in biogeography at the species level 15
     2.3.1 Species addition 15
     2.3.2 Species reduction 15
     2.3.3 Remediation 16
     2.3.4 Species alteration 16
  2.4 Issues in biogeography at the community level 16
     2.4.1 Conservation 17
     2.4.2 Habitat loss 17
     2.4.3 Biological alterations 18
     2.4.4 Physical alterations 18

2.5 Human response to issues in biogeography 18
  2.6 Summary Review questions Selected readings References Websites 19 20 20 20 21

3 The physical environment 23
  3.1 Introduction 23
  3.2 What is the physical environment? 25
  3.3 The physical environment at the individual level 27
  3.4 The physical environment at the species level 29
  3.5 The physical environment at the community level 36
  3.6 Summary Review questions Selected readings References Websites 41 42 42 43 43

4 The biological environment 45
  4.1 Introduction 45
  4.2 Biological controls on organism distribution 46
     4.2.1 Individuals 46
     4.2.2 Populations 49
     4.2.3 Communities 50
  4.3 Change due to biological mechanisms 51
     4.3.1 Changing communities 1: altering species composition 51
     4.3.2 Changing communities 2: responding to species development 53
     4.3.3 Changing communities 3: succession 54
4.4 Implications
4.5 Summary
   Review questions
   Selected readings
   References
   Websites

5 Putting it together –
classification, biodiversity
and ecosystems

5.1 Introduction
5.2 The basis for classification – why
   bother?
5.3 What is biodiversity and how can
   it help our understanding of
   biogeography?
5.4 The use of ecosystems in classification
5.5 Classification in practice
   5.5.1 Species classification
   5.5.2 Group classification
5.6 Summary
   Review questions
   Selected readings
   References
   Websites

6 Global patterns in biogeography

6.1 Introduction
6.2 Describing patterns: divisions in
   biogeography
6.3 Analysing patterns: ecological processes
   6.3.1 Species development
   6.3.2 Species movement
   6.3.3 Inertial factors
   6.3.4 Ecological organisation
6.4 Analysing patterns: environmental
   processes
6.5 Investigating patterns: methodologies
6.6 Summary
   Review questions
   Selected readings
   References
   Websites

8 Studying animals and their
distributions

8.1 Introduction
8.2 What causes variation in animal
distributions?
   8.2.1 Short range
   8.2.2 Medium range
   8.2.3 Long range
8.3 How can we map these distributions?
   8.3.1 Track methodologies
   8.3.2 Presence methodologies
8.4 What can case studies show us
   about distribution patterns?
   8.4.1 The Asian elephant
   8.4.2 Birds
   8.4.3 Whales
9 Responding to conditions: environmental factors and gradients

9.1 Introduction
9.2 The nature of the community
9.3 Gradient factors
  9.3.1 Lithosphere
  9.3.2 Atmosphere
  9.3.3 Hydrosphere
  9.3.4 Scale
9.4 Gradients – case studies
  9.4.1 North Sea
  9.4.2 Diatoms in the USA
  9.4.3 Large-scale patterns in relation to latitude and climate
  9.4.4 Leaf area index and the Tibetan Plateau
  9.4.5 Arctic salt marsh, Alaska
  9.4.6 Environmental factors which may be implicated in landscape and vegetation stress
  9.4.7 Heavy metal tolerance in plants and its use in revegetating metal-rich mine wastes
9.5 Gradient analysis
9.6 Human impact on gradients
9.7 Summary

10 Quantitative and statistical methods – an introduction

10.1 Introduction
10.2 Planning
10.3 Which test to use?
10.4 Data types and information content
10.5 Types of statistical tests
  10.5.1 Parametric tests
  10.5.2 Non-parametric tests
10.6 Multivariate analysis
10.7 Multivariate analysis software
10.8 Which program?
10.9 Summary

Part Three The human dimension in biogeography

12 Environments under threat: the biogeography of change

12.1 Introduction
12.2 Causes of threat
  12.2.1 Natural threats
  12.2.2 Human threats
12.3 Assessment of threat
12.4 Solutions to threat
  12.4.1 Conservation
  12.4.2 Law
