Novel Food Processing Technologies

Edited by

Gustavo V. Barbosa-Cánovas
Washington State University
Pullman, Washington, U.S.A.

Marfa S. Tapia
Central University of Venezuela
Caracas, Venezuela

M. Pilar Cano
Instituto del Frio-CSIC
Madrid, Spain

Associate Editors

Olga Martín-Belloso
University of Lleida
Lleida, Spain

Antonio Martínez
Instituto de Agroquímica y Tecnología de Alimentos-CSIC
Valencia, Spain

CRC PRESS
Boca Raton  London  New York  Washington, D.C.
Contents

Preface
Contributors

1. Present Status and the Future of PEF Technology
   G.V. Barbosa-Canovas and David Sepúlveda

2. Microbial Inactivation by Pulsed Electric Fields
   Rafael Pagan, Santiago Condon, and Javier Raso

3. Inactivation Kinetics of Microorganisms by Pulsed Electric Fields
   M. Rodrigo, A. Martinez, and D. Rodrigo

4. Does High-Intensity Pulsed Electric Fields Induce Changes in
   Enzymatic Activity, Protein Conformation, and Vitamin
   and Flavor Stability?
   Olga Martin-Belloso, Silvia Bendicho, Pedro Elez-Martinez,
   and Gustavo V. Barbosa-Canovas

5. Pulsed Electric Field-Assisted Extraction of Juice from
   Food Plants
   Eugene Vorobiev, Abdel Basel Jemai, Hazem Bouzrara,
   Nikolai Lebovka, and Maksym Bazhal

6. Application of PEF on Orange Juice Products
   D. Rodrigo, F. Sampedro, A. Martinez, M. Rodrigo,
   and G.V. Barbosa-Canovas

7. PEF—A Food Industry’s View
   Huub Lelieveld

8. Fundamentals and Applications of High Pressure Processing to Foods
   Welti-Chanes, A. López-Malo, E. Palou, D. Bermúdez, J.A. Guerrero-Beltrán, and G.V. Barbosa-Cdnovas

9. Thermodynamic Aspects of High Hydrostatic Pressure Food Processing
   Gustavo V. Barbosa-Cdnovas and José J. Rodríguez

10. High-Pressure-Assisted Heating as a Method for Sterilizing Foods
    Volker Heinz and Dietrich Knorr

11. Freezing and Thawing of Foods Under Pressure
    P.D. Sanz

12. Starch and Other Polysaccharides Under High Pressure
    Fernando Fernández-Marín, Gipsy Tabilo-Munizaga, and Gustavo V. Barbosa-Cdnovas

13. Advances in Use of High Pressure to Processing and Preservation of Plant Foods
    M. Pilar Cano and Begoña de Ancos

14. High-Pressure Applications on Myosystems
    Pilar Montero and M. Carmen Gómez-Guillén

15. High-Pressure Processing of Milk and Dairy and Egg Products

16. Commercial High-Pressure Equipment
    Jan Hjelmqvist

17. Food Irradiation—An Emerging Technology
    James H. Moy

18. Ultraviolet Light and Food Preservation
    Aurelio López-Malo and Enrique Palou

19. Microbial Inactivation by Ultrasound
    Santiago Condón, Javier Raso, and Rafael Pagán

20. Use of Magnetic Fields as a Nonthermal Technology
    Gustavo V. Barbosa-Cdnovas, Barry G. Swanson, M. Fernanda San Martin G., and Federico Harte

21. Nonthermal Technologies in Combination with Other Preservation Factors
    Javier Raso, Rafael Pagán, and Santiago Condón
Contents

22. Sous Vide/Freezing Technology for Ready Meals
   F.S. Tansey and T.R. Gormley
   477

23. Advances in Ohmic Heating and Moderate Electric Field (MEF) Processing
   Sudhir K. Sastry
   491

24. Radio-Frequency Heating in Food Processing
   Juming Tang, Yifen Wang, and T.V. Chow Ting Chan
   501

25. Current State of Microwave Applications to Food Processing
   Pedro Fito, Amparo Chiralt, and M. Eugenia Martin
   525

26. Supercritical Fluid Extraction: An Alternative to Isolating Natural Food Preservatives
   Guillermo Reglero, F. Javier Sénordins, and Elena Ibdhez
   539

27. Modeling Systems and Impact on Food Microbiology
   Gail Belts and Linda Everis
   555

28. Predictive Microbiology and Role in Food Safety Systems
   Antonio Martinez, Miguel Rodrigo, Dolores Rodrigo, Pilar Ruíz, Amaury Martinez, and Ma. José Ocio
   579

29. Experimental Protocols for Modeling the Response of Microbial Populations Exposed to Emerging Technologies: Some Points of Concern
   Stella M. Alzamora, Sandra Guerrero, Pascual E. Viollaz, and Jorge Welti-Chanes
   591

30. Application of Artificial Intelligence to Predictive Microbiology
   Rosa María García-Gimeno, Cesar Herrvs-Martínez, and Gonzalo Zurera-Cosano
   609

31. Growth/No-Growth Interface Modeling and Emerging Technologies
   Enrique Palou and Aurelio Lopez-Malo
   629

32. Calculating Microbial Inactivation During Heat Treatments Without D and Z Values
   Micha Peleg
   653

33. Safety and Quality in the Food Industry
   Maria S. Tapia, Ivelio Arispe, and Amaury Martinez
   669
