Reactive Transport in Soil and Groundwater

Processes and Models

With 113 Figures

Springer
## Contents

Preface  _by G. Nützmann, P. Viotti, P. Aagaard_  v

### 1 Processes

1. The unsaturated zone – a neglected component of nature  
   D. Ronen, S. Sorek 3

2. Use of stable isotope analysis to assess biodegradation of petroleum hydrocarbons in the unsaturated zone. Laboratory studies, field studies, and mathematical simulations  
   D. Bouchard, D. Hunkeler, P. Höhener, R. Aravena, M. Broholm, P. Kjeldsen 17

3. A model assessing bioavailability of persistent organic pollutants in soil  
   G. Fragoulis, M. Trevisan, E. Puglisi, E. Capri 39

4. Geochemical changes under variably saturated conditions during artificial recharge via ponded infiltration – A field study  
   J. Greskowiak, G. Massmann, H. Prommer, G. Nützmann, A. Pekdeger 51

5. Transport of Cr(VI), Ni(II) and Mn(II) through metallurgical wastes. Batch and column experiments  
   R. Rodriguez, L. Candela 65

6. Modeling adsorption-desorption processes of Cu on montmorillonite and the effect of competitive adsorption with a cationic pesticide  
   T. Undabeytia, S. Nir, G. Rytwo, C. Serban, E. Morillo, C. Maqueda 79

7. NMR spectroscopy: a tool to study interactions between organic pollutants and soil components?  
   A.M. Delort, B. Combourieu, N. Haroune, P. Besse, M. Sancelme 93

### 2 Modelling

Incorporating geomicrobial processes in reactive transport models of subsurface environments  
Consequences of Different Kinetic Approaches for Simulation of Microbial Degradation on Contaminant Plume Development
D. Schäfer, A. Manconi, S. Grandel, A. Dahmke 127

Natural Attenuation in the unsaturated zone and shallow groundwater: coupled modeling of vapor phase diffusion, biogeochemical processes and transport across the capillary fringe
U. Maier, P. Grathwohl 141

Enhancement of solute spreading in soils due to particle-facilitated transport and preferential flow
S. Bold, R. Liedl, P. Grathwohl 157

Multiphase and Multi-component Interactions through the Unsaturated Saturated Zone Field and Model Study
S. Sorek, M. Kuznetsov, A. Yakirevich, D. Ronen 171

Solute contaminant transport in variably saturated dual-porosity/dual permeability chalk: field tracer experiments and modelling
S. Brouyère 187

Integration of pedotransfer functions and topographical data to obtain soil hydraulic properties at catchment scale
M. Palladino, N. Romano, A. Santini 197

Analytical Model for Gravity-Driven Drainage
G. Severino, A. Comegna, A. Sommella 209

3 Integration

Hydrogeophysical characterization of subsurface solute transport at the Krauthausen test site: experiments and numerical modelling
H. Vereecken, A. Kemna, A. Tillmann, J. Vanderborght, A. Verweed 219

Tracer Experiments on Field Scale for Parameter Estimation to calibrate Numerical Transport Models
J. Fank, G. Rock 239

Biogeochemical modeling of reactive transport applied to laboratory and field studies on jet-fuel contamination
Assessing the potential for natural or enhanced in-situ bioremediation at a TCE-contaminated site by coupling process analysis and modeling
F. Aulenta, A. Di Fazio, M. Leccese, M. Majone, M. Petrangeli Papini, S. Rossetti, N. Stracqualursi, V. Tandoi, P. Viotti 265

Partial source treatment by in-situ technologies – a review of limits, advantages and challenges
S. Grandel, A. Dahmke 279
