Mitra Basu and Tin Kam Ho (Eds)

Data Complexity in Pattern Recognition

Springer
Contents

List of Contributors ................................................................. XI

Part I Theory and Methodology

1 Measures of Geometrical Complexity in Classification Problems
   Tin Kam Ho, Mitra Basu, and Martin Hiu Chung Law ............... 3

2 Object Representation, Sample Size, and Data Set Complexity
   Robert P.W. Duin and Elzbieta Pekalska ............................... 25

3 Measures of Data and Classifier Complexity and the Training Sample
   Size
   Sarunas Raudys ................................................................. 59

4 Linear Separability in Descent Procedures for Linear Classifiers
   Mitra Basu and Tin Kam Ho .................................................. 69

5 Data Complexity, Margin-Based Learning, and Popper's Philosophy
   of Inductive Learning
   Vladimir Cherkassky and Yunqian Ma .................................. 91

6 Data Complexity and Evolutionary Learning
   Ester Bernadó-Mansilla, Tin Kam Ho, and Albert Orriols ........... 115

7 Classifier Domains of Competence in Data Complexity Space
   Tin Kam Ho and Ester Bernadó-Mansilla ............................... 135

8 Data Complexity Issues in Grammatical Inference
   Colin de la Higuera ............................................................ 153
