ETHNOBOTANY AND CONSERVATION OF PLANT DIVERSITY IN NEPAL
- STATUS, BIBLIOGRAPHY AND AGENDA FOR SUSTAINABLE MANAGEMENT

Ananda Raj Joshi
Kunjani Joshi
# CONTENTS

**Preface**

**CHAPTER 1** Introduction
- Plant Diversity and Its Significance
- Conservation Initiatives at Global and Regional Level
- National Initiatives

**CHAPTER 2** Nepal: Environmental Scenario
- Physiography
- Bioclimate
- Vegetation
- Biodiversity
- Uses of Plant Resources

**CHAPTER 3** Botanical Exploration and Documentation

**CHAPTER 4** Trend of Ethnobotanical Research, Conservation of Useful Species and Bibliography
- Trend of Ethnobotanical Research
- From "Utilisation & Trading of Non-Timber Forest Products to Conservation for Sustainable Development"
  - The Shift to a new Paradigm
- Bibliography: Enumeration of References

**CHAPTER 5** Initiatives for Development of Ethnobotany and Conservation of Plant Resources
- Status of Useful Plants
- Initiatives for Ethnobotanical Study and Conservation of Plant Diversity
  - Policy Intervention
- Plans and Strategy for Conservation and Utilization of Plant Resources
  - Development and Strengthening of Institutions
  - Legislation and International Conventions/Agreement
  - Programmes in Action

**CHAPTER 6** Looking Ahead: Agenda for Sustainable Management
ANNEXES

Annex I  Population Change During the 90-year Period, 1911-2001
Annex II  Percentage Distribution of Total Population in Different Ecological and Development Regions
Annex III Population by Ethnic/Caste Groups
Annex IV  Population by Mother Tongue
Annex V  Plant Species and Forest Products under Legal Protection
