About the editor xvii  
Contributors xix

### Part One – Introduction

1 The physiology of exercise  
   Introduction 3  
   Respiration and exercise 3  
   The cardiovascular system and exercise 8  
   Sport and exercise at high altitude 11  
   Gastrointestinal effects of exercise 12  
   Energy requirement of the muscles 12  
   Muscle fatigue 14  
   References 15  
   Further reading 15

2 Physical activity in the community  
   Introduction 17  
   What amount and type of exercise is recommended for health benefit? 19  
   How much exercise is being taken in the UK? 22  
   What motivates people to take up physical activity? 29  
   Barriers to participation (the adoption problem) 30  
   Exercise adherence 31  
   Risks associated with physical activity 32  
   What is being done to encourage sustained participation in physical activity? 34  
   Conclusion 41  
   References 41  
   Further reading 45  
   Useful addresses 46
### Contents

**3 Sports nutrition**
- Introduction 49
- Sources of energy 49
- Energy requirements 50
- Energy metabolism during physical activity 51
- Carbohydrate requirements during exercise 51
- Fluid 55
- Protein 57
- Vitamins and minerals 58
- Weight control 58
- Sports supplements 59
- Amino acids and amino acid derivatives 62
- Protein supplements 66
- Antioxidants 66
- Chromium 67
- Colostrum 67
- Coenzyme Q10 67
- Dehydroepiandosterone 68
- Ginseng 68
- Phosphatidylserine 69
- Pyruvate 69
- Stimulants 69
- *Tribulis terrestris* 70
- Vanadium 70
- Regulation of food supplements 70
- References 71
- Further reading 72
- Useful addresses 72

**Part Two - Treatment and prevention of sports-related problems**

**4 Soft tissue injury**
- Introduction 77
- Muscular injuries 78
- Joint and connective tissue injuries 79
- Peripheral neuropathies 80
- Bursitis 80
- Tendinopathies 81
- Compartment syndromes 82
- Common soft tissue injuries and considerations 83
- Shin pain 101
- Calf and Achilles complex 102

Part Three – Misuse of drugs in sport

7 History of doping in sport

Introduction 219
Ancient history 220
The 19th century 221
Into the 20th century 221
The watershed of the 1960s 222
Prohibited substances list 223
Stimulants 224
Steroids 225
Urinary concentrations 230
Out-of-competition testing 231
Deception 231
Blood doping 232
East Germany 232
Growth hormone 233
Erythropoietin 233
The World Anti-Doping Agency 234
Pharmacy 235
The future 236
References 236

Useful address 237

8 Drug use in sport and dope testing

Introduction 239
The drugs and methods prohibited in sport 239
Dope testing 248
Case studies 257
References 265
Further reading 266

Part Four – The application of sports pharmacy in practice

9 Pharmacy for elite athletes at international games

Introduction 269
Major competitive environments 269
The provision of medical services 271
Athletes’ medical services 272
Daily clinics for VIPs and officials 274
Spectator medical care 275
The Polyclinic pharmacy 276
The Games formulary 280
Contents ix

Pharmacy dispensing systems 281
Drug distribution 281
Prescribing procedures 282
Public health issues 289
Nutritional supplement monitoring 290
Dilemmas for pharmacists 291
Unique medical encounters 292
Imported drugs for team use 293
Safe sex 294
Pharmacist education 294
Confidentiality and the media 295
A unique opportunity 295
Further reading 296

10 The role of the pharmacist in sport and exercise care 297
Introduction 297
Reason for sporting activity 297
Promoting and maintaining a healthy lifestyle through exercise 298
Medicines management 300
Treating a range of sport- and exercise-related injuries in the pharmacy 301
Sale of sports equipment 312
Getting started 329
Learning more 330
