1 Introduction
Giovanni Dosi and Mariana Mazzucato  1

Part I  Innovation and industry evolution  19

2 Pharmaceutical innovation as a process of creative destruction
Frank R. Lichtenberg  21

3 The evolution of pharmaceutical innovation
Paul Nightingale and Surya Mahdi  73

4 Firm and regional determinants in innovation models: evidence from biotechnology and traditional chemicals
Myriam Mariani  112

5 Innovation and industry evolution: a comment
Louis Galambos  145

Part II  Firm growth and market structure  161

6 Heterogeneity and firm growth in the pharmaceutical industry
Elena Cefis, Matteo Ciccarelli, and Luigi Orsenigo  163

7 Growth and diversification patterns of the worldwide pharmaceutical industry
Giulio Bottazzi, Fabio Pammolli, and Angelo Secchi  208
8 Entry, market structure, and innovation in a “history-friendly” model of the evolution of the pharmaceutical industry
Christian Garavaglia, Franco Malerba, and Luigi Orsenigo 234

9 The growth of pharmaceutical firms: a comment
Boyan Jovanovic 266

Part III Policy implications 275

10 The effects of research tool patents and licensing on biomedical innovation
John P. Walsh, Ashish Arora, and Wesley M. Cohen 277

11 Upstream patents and public health: the case of genetic testing for breast cancer
Fabienne Orsi, Christine Sevilla, and Benjamin Coriat 327

12 Competition, regulation, and intellectual property management in genetically modified foods: evidence from survey data
Pierre Regibeau and Katharine Rockett 346

13 Governance, policy, and industry strategies: pharmaceuticals and agro-biotechnology
Joyce Tait, Joanna Chataway, Catherine Lyall, and David Wield 378

14 The dynamics of knowledge accumulation, regulation, and appropriability in the pharma-biotech sector: policy issues
Luigi Orsenigo, Giovanni Dosi, and Mariana Mazzucato 402
