Contents

Preface to the Second Edition . . . . iii
Preface to the First Edition . . . . v
Contributors . . . . xv

PART I: METHODS OF ENCAPSULATION AND ADVANCES IN PRODUCTION TECHNOLOGY

1. Biodegradable Microspheres: Advances in Production Technology ................................. 1
   Frédéric Tewes, Frank Boury, and Jean-Pierre Benoit
   Introduction . . . . 1
   Techniques Using Organic Solvents . . . . 2
   Techniques Without Organic Solvents . . . . 8
   References . . . . 41

2. Advances in the Technology for Controlled-Release Pesticide Formulations ................... 55
   Arie Markus and Charles Linder
   Introduction . . . . 55
   Standard Microencapsulation Processes for Pesticides . . . . 59
   Advances in Encapsulation Technologies . . . . 67
   Quality Control . . . . 71
   Case Study: De-Bugger® . . . . 75
   Summary . . . . 75
   References . . . . 76

3. Multiparticulate Pulsatile Drug Delivery Systems ................................................. 79
   Till Bussemer and Roland Bodmeier
   Introduction . . . . 79
   Pulsatile Systems . . . . 83
   Site-Specific Systems . . . . 84
   Time-Controlled Pulsatile Systems . . . . 86
4. Microencapsulation Techniques for Parenteral Depot Systems and Their Application in the Pharmaceutical Industry

Thomas Kissel, Sascha Maretschek, Claudia Packhäuser, Julia Schnieders, and Nina Seidel

Introduction . . . . 99
Biodegradable Polymers . . . . 100
Phase Separation and Coacervation . . . . 103
W/O/W-Double Emulsion Technique . . . . 106
Spray Drying . . . . 113
Conclusion . . . . 118
References . . . . 118

5. Coupling Methods to Obtain Ligand-Targeted Liposomes and Nanoparticles

Leila Bossy-Nobs, Franz Buchegger, Robert Gurny, and Eric Allémann

Introduction . . . . 123
Liposomal Modification Techniques . . . . 124
Labeling Polymeric Nanoparticles with Ligands . . . . 138
How to Choose the Coupling Method . . . . 141
Concluding Remarks . . . . 142
References . . . . 142

6. Industrial Technologies and Scale-Up

François Puel, Stéphanie Briançon, and Hatem Fessi

Introduction . . . . 149
Emulsification Processes . . . . 152
Scale-Up Approach: The Case of Emulsification . . . . 164
Applications—Examples . . . . 167
Summary . . . . 178
Notations . . . . 178
References . . . . 179

PART II: EVALUATION AND CHARACTERIZATION OF MICRO- AND NANOPARTICULATE DRUG DELIVERY SYSTEMS

7. Drug Release from Microparticulate Systems

Shicheng Yang and Clive Washington

Introduction . . . . 183
Measurement of Drug Release . . . . 183
Mechanisms of Drug Release . . . . 186
Drug Release Kinetic Models . . . . 188
### Contents

Targeted/Modified Liposomes: An Interesting and Exciting Scientific Tool, But Can They Be Made into Products (Especially Immunoliposomes)? .... 326

Liposomes as a Sterile, Pyrogen-Free System with Pharmaceutically Acceptable Shelf-Life, Stability, and Dosage Forms .... 330

Liposome Characteristics (Percentage of Encapsulation, Kinetics of Release, Biological Activity)—In Basic Research and in Quality Assurance .... 333

Summary and Prospects .... 340

References .... 340

**12. Microemulsions for Solubilization and Delivery of Nutraceuticals and Drugs** ......................................................... 345

_Nissim Garti and Abraham Aserin_

The Rationale .... 345

Microemulsions as Nanovehicles .... 348

Part I—Microemulsion Preparation and Microstructures .... 349

Part II—Potential Applications .... 385

Final Remarks .... 414

References .... 416

**PART III: APPLICATIONS OF PARTICULATE DELIVERY SYSTEMS**

**13. Self-Emulsifying Oral Lipid-Based Formulations for Improved Delivery of Lipophilic Drugs** ................................. 429

_Jean-Sébastien Garrigue, Grégory Lambert, and Simon Benita_

Definition .... 429

Introduction .... 430

Drug Delivery Issues .... 430

Composition of SEDDS .... 433

Characterization of SEDDS .... 444

Biopharmaceutical Aspects .... 448

The Story of Oral Cyclosporin A .... 466

The Oral Paclitaxel Challenge .... 468

Future and Prospects .... 469

References .... 470

**14. Recent Advances in Heparin Delivery** .............................................. 481

_Nathalie Ubrich and Philippe Maincent_

Introduction .... 481

Blood and Mechanism of Action of Heparins .... 482

Evaluation of Heparin Efficiency .... 483

Oral Delivery of Heparins .... 483

Conclusion .... 516

References .... 516
15. Particulate Systems for Oral Drug Delivery 521
   Maria José Blanco-Prieto and Florence Delie
   Introduction 521
   Absorption of Polymeric Particulates from the GI Tract 522
   Use of Polymeric Particles for Oral Administration 527
   Conclusions 552
   References 553

16. Vesicles as a Tool for Dermal and Transdermal Delivery 563
   P. L. Honeywell-Nguyen and J. A. Bouwstra
   Dermal and Transdermal Drug Delivery 563
   The Skin Barrier Function 564
   Vesicles as Skin Delivery Systems 566
   Elastic Vesicles 572
   References 580

17. Lipid and Polymeric Colloidal Carriers for Ocular Drug Delivery 587
   Simon Benita and S. Tamilvanan
   Introduction 587
   Topically Treated Ocular Pathologies 589
   Lipid and Polymeric Colloidal Carriers: Description and Classification 594
   O/W Submicron Emulsions 596
   Microemulsions 605
   Multiple Emulsions 607
   Nanoparticles 608
   Nanocapsules 614
   Future Directions in Ocular Drug Delivery Using Lipid and Polymeric Colloidal Carriers 617
   References 617

18. The Use of Drug-Loaded Nanoparticles in Cancer Chemotherapy 625
   Jean-Christophe Leroux, Angelica Vargas, Eric Doelker, Robert Gurny, and Florence Delie
   Introduction 625
   In Vitro Uptake of NP by Tumoral Cells 626
   Distribution and Pharmacokinetics of Anticancer Drugs Coupled to NP 639
   In Vivo Activity and Toxicity of Anticancer Drugs Coupled to NP 650
   Concluding Remarks 661
   References 662
19. Development of 5-FU-Loaded PLGA Microparticles for the Treatment of Glioblastoma ................................. 673
   Nathalie Faisant, Jean-Pierre Benoit, and Philippe Menei
   Introduction .......................... 673
   Microsphere Formulation and Development .................. 674
   Preclinical Trials ........................ 678
   Application to Glioma Therapy After Tumor Resection:
      Phase I–II and IIB Studies .................. 682
   Stereotaxic Implantation in Malignant Glioma:
      Phase I Study .......................... 684
   Conclusion ................................ 685
   References ................................ 686

20. Nanoparticles as Drug Delivery Systems for the Brain ............. 689
    Jörg Kreuter
    Introduction .......................... 689
    Drug Delivery to the Brain with Nanoparticles ............ 690
    Long Circulating Nanoparticles for Brain Drug Delivery ........ 697
    Stability of Nanoparticles for Brain Delivery Upon Storage ...... 699
    Mechanism of Nanoparticle-Mediated Drug Transport
to the Brain ........................... 699
    Conclusions ............................ 702
    References ................................ 703

21. Cosmetic Applications of Colloidal Delivery Systems ............ 707
    Simon Benita, Marie-Claude Martini, Anne-Marie Orecchioni, and
    Monique Seiller
    Introduction .......................... 707
    Types of Vesicular Delivery Systems ..................... 708
    Composition ................................ 715
    Production ................................ 720
    Characterization ................................ 727
    Stability ............................... 731
    Cosmetic Uses ........................... 732
    Conclusion ................................ 741
    References ................................ 741

Index ........ 749
