# Table of Contents

**Preface** ................................................................. xv

1. **Drawing in Flash** ................................................... 1  
   1.1 Drawing Straight Lines ........................................... 3  
   1.2 Drawing Curved Lines ........................................... 5  
   1.3 Modifying Curves ................................................ 7  
   1.4 Selecting a Line ................................................ 8  
   1.5 Applying Line Styles ........................................... 8  
   1.6 Controlling How Lines Scale .................................. 9  
   1.7 Customizing Line Caps ......................................... 10  
   1.8 Customizing Join Styles Between Line Segments ............ 10  
   1.9 Creating Effects with Strokes ................................ 11  
   1.10 Drawing Primitive Shapes ................................... 12  
   1.11 Drawing Regular Polygons .................................... 13  
   1.12 Drawing Stars .................................................. 14  
   1.13 Drawing Other Assorted Shapes ............................... 14  
   1.14 Building Complex Shapes from Simple Shapes ............ 15  
   1.15 Drawing Complex Lines and Shapes ......................... 17  
   1.16 Repositioning Points on Paths ............................... 18  
   1.17 Freehand Drawing ............................................. 19  
   1.18 Smoothing and Straightening Lines ......................... 21  
   1.19 Painting Shapes ............................................... 22  
   1.20 Tapered Painting Using a Pressure-Sensitive Graphics Tablet 23  
   1.21 Selecting a Shape and Changing Its Attributes ............ 24  
   1.22 Applying a Stroke to a Fill .................................. 25  
   1.23 Applying a Fill to a Closed Path ............................... 25  
   1.24 Filling in Paths with Gaps .................................... 26  
   1.25 Mixing Custom Colors ......................................... 27
1.26 Saving and Reusing Custom Colors 28
1.27 Applying Preset and Custom Gradients 29
1.28 Applying a Fill Across Multiple Elements 31
1.29 Stretching, Rotating, and Repositioning Fills 32
1.30 Scaling Elements 32
1.31 Distorting and Reshaping Elements 33
1.32 Rotating Elements 35
1.33 Creating Mirror Images 36
1.34 Positioning Elements Precisely 36
1.35 Erasing Content 37

2. Importing and Exporting Artwork ........................................... 38
2.1 Importing Assets from Fireworks 38
2.2 Importing Content from Freehand MX 40
2.3 Importing Simulated 3D Shapes from Freehand MX 41
2.4 Importing Acrobat PDF Content 43
2.5 Importing Illustrator AI and EPS Content 44
2.6 Exporting Single-Frame Images 44
2.7 Exporting Animated GIF Files 47
2.8 Exporting Image Maps (HTML Images with Clickable Regions) 48

3. Structuring Movies and Laying Out Content ........................ 54
3.1 Setting the Background Color 55
3.2 Setting Stage Dimensions 56
3.3 Setting the Frame Rate 57
3.4 Applying New Default Document Settings 59
3.5 Creating Document Templates 59
3.6 Lengthening the Duration of the Movie 60
3.7 Changing Contents on Stage 62
3.8 Managing Content with Layers 64
3.9 Hiding, Locking, and Customizing the Display of Layer Content 66
3.10 Customizing the Display of Layers and Frames 68
3.11 Using Guide Layers 70
3.12 Managing Complex Content with Layer Folders 71
3.13 Laying Out Page Elements Proportionately 72
3.14 Aligning, Distributing, Resizing, and Spacing Elements 74
3.15 Nudging Elements with the Keyboard 76
3.16 Grouping Elements 76
3.17 Reusing Elements; Creating Symbols 77
4. Creating Animation

4.1 Animating Changes in Location or Appearance

4.2 Animating Along Curved Paths

4.3 Applying Acceleration and Deceleration with Easing

4.4 Applying Advanced Tweening Effects

4.5 Animating Rotation

4.6 Looping Animations

4.7 Previewing Playback

4.8 Viewing Multiple Frames Simultaneously

4.9 Editing Many Frames Simultaneously

4.10 Morphing Graphics with Shape Tweens

4.11 Controlling Morphing

4.12 Creating Nested Animations

4.13 Copying Animations

4.14 Changing a Movie Clip's Location at Runtime with ActionScript

4.15 Animating Runtime Location Changes with ActionScript

5. Simulating 3D in Flash

5.1 Solutions for Integrating 3D with Flash Projects

5.2 Creating 3D Objects

5.3 Adding Simple 3D Animation to Flash

5.4 Animating a 3D Shape Morph

5.5 Vector-Based 3D Graphics

5.6 Realistic Raster-Based 3D Graphics

5.7 Creating 3D Buttons

5.8 Using 3D Models in Flash Not Originally Created in Swift 3D

5.9 Creating a 3D Product View from Multiple Angles

5.10 Rendering Swift 3D Animations as Flash Video

5.11 Adding 3D Graphics Without Leaving Flash

6. Composing Images with Bitmaps and Masks

6.1 Importing Bitmaps

6.2 Editing Bitmaps

6.3 Fitting Bitmaps Inside Shapes

6.4 Converting Bitmaps to Vector Art

6.5 Animating Bitmaps

6.6 Optimizing Bitmaps for Export

6.7 Using Bitmaps with Transparency

6.8 Masking Page Elements

6.9 Animating Masks
7. Working with Text Basics

7.1 Adding Static Text to the Stage
7.2 Changing the Appearance of Text
7.3 Making Text Follow a Curve
7.4 Adding Drop Shadows to Text
7.5 Changing the Width of Static Text Fields (Without Stretching the Text)
7.6 Resizing Text Fields (Stretching the Text)
7.7 Setting Margins, Indentation, and Leading
7.8 Setting Space Between Characters
7.9 Optimizing Static Text for Minimum File Size
7.10 Superscripting and Subscripting Characters
7.11 Making Text Nonselectable
7.12 Creating Text Hyperlinks
7.13 Adding an Email Link to Static Text
7.14 Opening Browser Windows with Specific Parameters Using Static Text
7.15 Calling ActionScript Functions from Static Text
7.16 Making Small Fonts Readable
7.17 Checking Spelling

8. Working with Dynamic Text

8.1 Creating Text that You Can Modify at Runtime
8.2 Changing Text at Runtime
8.3 Accepting User Input
8.4 Accepting Password Input
8.5 Limiting the Length of User Input
8.6 Setting Allowable Characters for Input
8.7 Retrieving User Input
8.8 Resizing Dynamic or Input Text Fields
8.9 Creating Multiline Text
8.10 Creating Scrolling Text
8.11 Specifying Wrapping of Multiline Fields
8.12 Using HTML Tags in Text
8.13 Entering International and Nonstandard Characters
8.14 Ensuring that Text Displays in the Original Font
8.15 Applying CSS
9. Adding Interactivity

9.1 Creating Buttons from Scratch
9.2 Creating Buttons that Animate
9.3 Defining the Area that Activates the Button
9.4 Creating Hotspots with Invisible Buttons
9.5 Making Buttons Respond to Clicks
9.6 Making Buttons Respond to Mouse Rollovers
9.7 Making Buttons Respond to Dragging and Releasing
   Off the Instance
9.8 Building Menus with Buttons
9.9 Using Slider Controls
9.10 Using a Dial Control
9.11 Creating Custom Cursors
9.12 Creating Animated Cursors
9.13 Creating Interactive Custom Cursors
9.14 Hiding the Hand Cursor
9.15 Detecting Keystrokes

10. Managing Playback

10.1Pausing a Movie After It Loads
10.2 Preventing the Movie from Looping
10.3 Dividing the Timeline into Segments
10.4 Skipping the Playhead to a Different Frame of the Timeline
10.5 Creating a Basic Interface to Control Timeline Playback
10.6 Playing the Timeline Backward
10.7 Creating Seek Buttons

11. Managing Movie Clips

11.1 Performing Actions Repeatedly Over Time
11.2 Applying Transparency to Movie Clips
11.3 Fading Movie Clip Instances In and Out
11.4 Adjusting Movie Clip Instance Color
11.5 Animating Color Changes
11.6 Brightening Movie Clip Instances
11.7 Transforming Movie Clips (Rotation, Scaling, and Skewing)
11.8 Moving a Movie Clip in Front of or Behind Another
   Movie Clip (or a Button or Text Field)
11.9 Creating New Movie Clips Based on Existing Movie Clips
11.10 Generating Unique Depths

   15.7 Working with Border and Background Styles ............................................. 362
   15.8 Working with Button and Scrollbar Styles ................................................ 364
   15.9 Working with List Styles ........................................................................... 365
   15.10 Working with Combo Box Styles ............................................................... 366
   15.11 Working with Radio Button, Checkbox, and Arrow Styles ....................... 367
   15.12 Using Different Artwork Themes ............................................................... 368

16. Loading Images and Flash Content .................................................................. 370
   16.1 Loading External SWF/Image Content ........................................................ 371
   16.2 Loading External SWF/JPEG Content into a Draggable Window ................ 374
   16.3 Loading External SWF/JPEG Content into a Scroll Pane ............................ 376
   16.4 Determining Load Progress ....................................................................... 377
   16.5 Hiding a Progress Bar When Content Has Loaded ..................................... 380
   16.6 Optimizing Download Time by Sharing Content Among Movies ............... 383

Table of Contents
20.4 Using a Progress Bar to Create a Graphical Preloader
20.5 Creating Preloaders for Files with Exported Symbols
20.6 Creating Preloaders for Files with Components

21. Publishing Flash
21.1 Publishing Flash to the Browser
21.2 Making Flash Content that Works with DHTML Menus
21.3 Detecting Flash Player Version
21.4 Passing Parameters to Flash from HTML
21.5 Communicating Between Flash and JavaScript
21.6 Integrating Flash with the Browser Back Button
21.7 Publishing Projectors
21.8 Making Fullscreen Flash Projectors
21.9 Printing Flash Content
21.10 Hiding the Context Menus

22. Deploying Flash on Mobile Devices
22.1 Creating a Flash Lite Movie
22.2 Using the Mobile Emulator
22.3 Finding Supported Devices
22.4 Playing a Flash Lite Movie on a Device
22.5 User Navigation for Flash Lite
22.6 Overriding the Default Active Button State
22.7 Applying Custom Labels to the Soft Keys
22.8 Responding to the Soft Keys
22.9 Accessing External Data
22.10 ActionScript for Flash Lite
22.11 Using Sound in Flash Lite
22.12 The Flash Lite Development Community

23. Making Movies Accessible
23.1 Detecting and Redirecting Users with Assistive Devices
23.2 Making Content Accessible
23.3 Making Animated, Interactive, and Visually Complex Movies Accessible
23.4 Creating Accessible Buttons
23.5 Making Keyboard-Navigable Movies
23.6 Providing Captions
