Medication Treatments for Nicotine Dependence

Edited by Tony P. George
Contents

Part 1. Basic Science

1 Pharmacological Effects of Nicotine and Nicotinic Receptor Subtype Pharmacological Profiles .................................................. 3
Ronald J. Lukas

2 Cellular and Synaptic Effects of Nicotine ............................................ 25
Daniel S. McGehee, Michael Iacoviello, and Robert Mitchum

3 Animal Models of Nicotine Addiction: Implications for Medications Development ................................................................. 39
Rebecca C. Steiner and Marina R. Picciotto

Part 2. First-Line Medication Treatments

4 Nicotine Replacement Therapies and Other Nicotinic Strategies .......... 63
Jed E. Rose

5 Sustained-Release Bupropion as a Pharmacological Aid to Smoking Cessation ................................................................. 75
J. Taylor Hays and Jon O. Ebbert

Part 3. Second-Line Medication Treatments

6 Tricyclic Antidepressants in the Treatment of Nicotine Dependence ...... 95
Sharon M. Hall

7 Monoamine Oxidase Inhibitors for Smoking Cessation ....................... 109
Ivan Berlin

8 Opioid Antagonists for the Treatment of Nicotine Dependence .......... 123
Suchitra Krishnan-Sarin and Stephanie S. O’Malley

9 Other Nonapproved Agents for Smoking Cessation ........................... 137
Andrea H. Weinberger, Erin L. Reutenauer, and Tony P. George
Part 4. Novel Medication Treatments

10 Immunological Approaches to Nicotine Addiction ............................................. 151
   Paul Pentel, Mark LeSage, Daniel E. Keyler, and Dorothy Hatsukami

11 Glutamatergic Agents for Nicotine Dependence ............................................. 167
   Adam Bisaga

12 GABAergic Agents for the Treatment of Nicotine Dependence ...................... 177
   Mehmet Sofuoglu and Jaakko Lappalainen

13 Cannabinoid Antagonists: CB₁ Receptors as a Therapeutic Target for Nicotine Dependence .......................................................... 187
   Robert M. Anthenelli

14 Targeting the Dopamine D₃ Receptor for Treatment of Nicotine Dependence .......................................................... 199
   Bernard Le Foll and Steven R. Goldberg

15 Varenicline: An α₄β₂ Nicotinic Acetylcholine Receptor Partial Agonist as an Aid to Smoking Cessation ........................................... 213
   Cheryl A. Oncken, David Gonzales, Mitchell Nides, Steven Rennard, Eric J. Watsky, and Jotham W. Coe

Part 5. Special Topics

16 Combining Medications with Behavioral Treatments ........................................ 225
   Christi A. Patten and Tabetha A. Brockman

17 Medication Treatments for Nicotine Dependence in Psychiatric and Substance Use Disorders .......................................................... 245
   Taryn M. Allen, Kristi A. Sacco, Andrea H. Weinberger, and Tony P. George

18 Pharmacogenetic Approaches to the Treatment of Nicotine Dependence .......... 263
   Caryn Lerman, Alexandra E. Shields, and Marcus Munafo

19 Neuroimaging of Nicotine Dependence: A Bioassay for Medications Development ........................................................................ 275
   Arthur L. Brody
Part 6. Concluding Perspectives

20 Suggestions for Future Research ................................................................. 293
   Ivan D. Montoya and Frank Vocci

21 Treatment of Nicotine Dependence: Toward a Partial Solution .................. 303
   Bernard Le Foll

Index .................................................................................................................. 319
