Excipient Development for Pharmaceutical, Biotechnology, and Drug Delivery Systems

Edited by

Ashok Katdare
NeuroMolecular Pharmaceuticals, Inc.
Emeryville, California, U.S.A.

Mahesh V. Chaubal
Baxter Healthcare
Round Lake, Illinois, U.S.A.
# Contents

Preface . . . iii  
Contributors . . . xv

## 1. Excipients: Background/Introduction

Lokesh Bhattacharyya, Stefan Schuber, Catherine Sheehan, and Roger William

## 2. Food and Drug Administration Perspective on Regulation of Pharmaceutical Excipients

Harold Davis

References . . . 12

## 3. Pharmaceutical Excipient Development—A Preclinical Challenge

Paul Baldrick

Introduction . . . 15  
Preclinical Testing Recommended by Regulatory Situation . . . 15  
Preclinical Testing for a New Excipient . . . 16  
Preclinical Testing for an Essentially New Excipient . . . 30  
Preclinical Testing for an Established Excipient . . . 30

Conclusion . . . 31  
References . . . 32

## 4. Regulation of Pharmaceutical Excipients

Robert G. Pinco and Theodore M. Sullivan

Introduction . . . 37  
No Independent Status for Excipients . . . 38  
Excipients for Over-the-Counter Drugs . . . 39  
Excipients in New Drugs . . . 43  
Informal Mechanisms to Promote Excipient Acceptance . . . 45  
Generally Recognized as Safe Notification . . . 46  
Worldwide Food Additive Status . . . 47  
Excipient Development Stagnation . . . 47
9. Improved Excipient Functionality by Coprocessing ........................... 109
Piyush Gupta, Satish K. Nachaegari, and Arvind K. Bansal
Introduction ........ 109
Manufacturing Problems in Solid Dosage Forms .... 110
Shift Toward Direct Compression .... 110
Development of New Excipients .... 111
Sources of New Excipients .... 112
Particle Engineering for Developing New Excipients .... 113
Role of Material Characteristics in Coprocessing .... 116
Material Characteristics and Compression .... 116
Material Characteristics and Flow Properties .... 117
Properties of Coprocessed Excipients .... 117
Regulatory Perspective .... 120
Commercial Status .... 123
Future Trends .... 123
Conclusions .... 123
References .... 124
Bibliography .... 124

10. A Comparison of Physical and Mechanical Properties
of Common Tableting Diluents ........................................... 127
Glenn T. Carlson and Bruno C. Hancock
Introduction .... 127
Background .... 129
Experimental .... 133
Results and Discussion .... 136
Summary .... 150
References .... 151
Bibliography .... 151

11. Excipients for Oral Liquid Formulations .................................. 155
Meagan Anderson, F. Opawale, M. Rao, D. Delmarre, and
Gopal Anyarambhatla
Introduction .... 155
Is the Oral Liquids Market Really a “Niche”? .... 155
Importance of Excipient Selection in the Process of Oral
Liquid Formulation Development .... 156
Excipients Used in Oral Liquid Formulations .... 158
Suspending Agents and Viscosity-Modifying Agents .... 167
pH Modifiers and Buffering Agents .... 167
Preservatives .... 169
Antioxidants, Chelating Agents, and Sequestrants .... 172
Coloring Agents .... 174
Flavors .... 175
Manufacturing Challenges to Consider When Choosing Excipients .... 176
Polymorphic Changes in Oral Liquid Dosage Forms .... 179
Regulatory Issues of Pharmaceutical Excipients .... 180
References .... 180

12. Use of Nonactive Pharmaceutical Excipients in Oral Drug Formulations: Biopharmaceutical Classification

Jane P. F. Bai, Jian-Hwa Guo, and Mahesh V. Chaubal

Introduction .... 181
Biopharmaceutical Classification System .... 182
Excipients Used in Site-Specific–Release Formulations .... 184
Excipients Used in Sustained–Release Formulations .... 185
Excipients Used to Enhance Dissolution of Biopharmaceutical Classification System Class II and IV Drugs .... 187
Permeability-Enhancing Excipients .... 191
Conclusion .... 193
References .... 193

13. Excipients for Semisolid Formulations

Prashant Srivastava

Introduction .... 197
Creams .... 198
Ointments .... 203
Pastes .... 203
Gels .... 204
Suppositories .... 208
References .... 212
Appendix I .... 215
Appendix II .... 219
Appendix III .... 221
Appendix IV .... 222
Appendix V .... 223

14. Excipients for Pulmonary Formulations

Hugh Smyth

Introduction .... 225
Overview of Pulmonary Formulations and Delivery Systems .... 226
General Considerations for Excipient Selection for Pulmonary Dosage Forms: Excipient Use Determined via Principles of Delivery .... 229
Physical and Chemical Properties Required .... 235
15. Synergistic Combinations of Penetration Enhancers and Their Discovery by High-Throughput Screening ................. 251
   Pankaj Karande, Amit Jain, and Samir Mitragotri
   Introduction .... 251
   Background .... 252
   Challenges in Designing Multicomponent Chemical Penetration Enhancer Formulations .... 253
   Designing Multicomponent Formulations .... 253
   Designing a High-Throughput Screening Assay for Testing Transdermal Formulations .... 257
   In Vitro Skin Impedance Guided High-Throughput Screening .... 259
   Validation of In Vitro Skin Impedance Guided High-Throughput Screening with Franz Diffusion Cells .... 261
   Applications of In Vitro Skin Impedance Guided High-Throughput Screening .... 261
   Discovery of Rare Enhancer Combinations .... 262
   Exploring Synergies Between Chemical Enhancers .... 264
   Generating Database for Structure-Activity Correlations .... 265
   References .... 266

16. Excipient Selection and Criteria for Injectable Dosage Forms .... 271
   Mahesh V. Chaubal, James Kipp, and Barrett Rabinow
   Introduction .... 271
   Impact of Injectable Route of Administration upon Selection of Excipients .... 272
   Excipients for Injectable Formulations .... 278
   Excipients for Delivery of Water-Insoluble Agents .... 282
   Container-Excipient Interactions in Injectable Dosage Forms .... 286
   Summary .... 287
   References .... 287

17. Excipients for Protein Drugs .................................................. 291
   Introduction .... 291
   Degradation Pathways of Proteins .... 292
   Components of Liquid and Lyophilized Protein Formulations .... 294
   Excipients .... 295
18. Excipients Used in Vaccines ........................................... 333
   Manmohan Singh and Derek O'Hagan
   Introduction ........ 333
   Adjuvants ........ 333
   Preservatives .... 335
   Additives .... 336
   Salts .... 337
   Residuals from the Manufacturing Process .... 337
   Excipients Used to Improve Stability of Vaccines .... 337
   Excipients Used in Vaccine Formulations Currently in Clinical Trials .... 337
   Analytical Assays and Quality Control of Excipients for Vaccine Formulations .... 338
   Selection of Excipients for Next Generation Vaccines .... 339
   Summary .... 339
   References .... 339

19. Polymeric Excipients for Controlled Release Applications ........ 341
   Mahesh V. Chaubal
   Introduction .... 341
   Oral Drug Delivery .... 342
   Parenteral Drug Delivery .... 344
   Novel Polymers for Drug Delivery .... 347
   Summary .... 354
   References .... 354

20. Emerging Excipients in Parenteral Medications: The New Paradigm ......................................................... 357
    Shireesh P. Apte and Sydney O. Ugwu
    Introduction .... 357
    Concentration of the Chemical Entity .... 358
    Indication for Which the Chemical Entity Is Administered .... 359
    Elicitation of a Pharmacological Response .... 362
    Excipient–Drug Conjugates .... 364
    Natural Products Including Naturally Occurring Polymers and Derivatives .... 365
    Conclusions .... 368
    References .... 368

21. Excipient Manufacturing and Good Manufacturing Practices .... 373
    Irwin Silverstein
    Introduction .... 373
22. Excipient Quality Assurance: Handling, Sampling, and Regulatory Issues ........................................... 389
   Raafat Fahmy and Stephen W. Hoag
   Introduction .... 389
   Regulatory Aspects of Excipient Quality Assurance .... 390
   Certificate of Analysis .... 390
   Additional Guidelines .... 392
   Receipt, Sampling, Testing, and Approval of Raw Materials .... 392
   Expiration or Retest Dating .... 393
   Records .... 394
   Traceability .... 394
   Analytical Procedures .... 395
   Laboratory Controls .... 395
   Excipients of Human or Animal Origin .... 396
   Sample Collection .... 396
   Developing a Sampling Plan .... 397
   Sampling Equipment and Infrastructure .... 401
   Spectroscopic Techniques for Sample Qualification .... 402
   Data Analysis .... 404
   Principal Components Analysis .... 407
   References .... 410
   Appendix I: .... 411
   Appendix II: .... 412
   Appendix III: .... 415
   Appendix IV: .... 417

23. Excipient Distribution ........................................... 421
   Victoria M. Shaheen
   Introduction .... 421
   The Evolution and Specialized Role of the Pharmaceutical
       Distributor in the Pharmaceutical Industry .... 422
   Specialized Model of the Pharmaceutical Distributor .... 425
   Pharmaceutical-Oriented Customer Service .... 427
   Technically Trained/Proficient Sales Staff .... 427
   Warehousing, Logistics, and Materials Management .... 428
   Pharmaceutical Excipient Distributor Strengths .... 428
   Pharmaceutical Excipient Distributor Challenges .... 431
   Anticipating, Estimating, and Communicating Accurate
       Lead Times .... 435
   Regulating Pharmaceutical Distributors .... 436
   References .... 436

Index .... 437
