Ecophysiology of High Salinity Tolerant Plants

Edited by

M. AJMAL KHAN
University of Karachi,
Pakistan

and

DARRELL J. WEBER
Brigham Young University,
Provo, UT, U.S.A.

Springer
Contents

Dedication v
Contributing Authors xi
Preface xv
Foreword xvii

1. How salts of sodium, potassium, and sulfate affect the germination and early growth of *Atriplex acanthocarpa* (Chenopodiaceae)
   B. GAYLORD AND T.P. EGAN 1

2. Halophyte seed germination
   M.A. KHAN AND B. GUL 11

3. Salt tolerance of some potential forage grasses from Cholistan desert of Pakistan
   M. ASHRAF, M. HAMEED, M. ARSHAD, M.Y. ASHRAF AND K. AKHTAR 31

4. Variability of fruit and seed-oil characteristics in Tunisian accessions of the halophyte *Cakile maritima* (Brassicaceae)
   M.A. GHARS, A. DEBEZ, A. SMAOUI, M. ZARROUK, C. GRIGNON AND C. ABDELLY 55

5. Salt tolerant plants from the great basin region of the United States
   D.J. WEBER AND J. HANKS 69

6. Role of calcium in alleviating salinity effects in coastal halophytes
   B. GUL AND M.A. KHAN 107

7. Calorespirometric metabolism and growth in response to seasonal changes of temperature and salt
   B.N. SMITH, L.C. HARRIS, E.A. KELLER, B. GUL, M.A. KHAN AND L.D. HANSEN 115

8. Evaluation of anthocyanin contents under salinity (NaCl) stress in *Bellis perennis* L.
   R.A. KHAVARI-NEJAD, M. BUJAR AND E. ATTARAN 127
9. A comparative study on responses of growth and solute composition in halophytes *Suaeda salsa* and *Limonium bicolor* to salinity
   X. Liu, D. Duan, W. Li, T. Tadano and M.A. Khan

10. Alleviation of salinity stress in the seeds of some *Brassica* species
    M. Özturk, S. Baslar, Y. Dogan and M.S. Sakcali

11. Saline tolerance physiology in grasses
    K.B. Marcum

12. Localization of potential ion transport pathways in the salt glands of the halophyte *Sporobolus virginicus*
    Y. Naidoo and G. Naidoo

13. Cellular responses to salinity of two coastal halophytes with different whole plant tolerance: *Kosteletzkya virginica* (L.) Presl. and *Sporobolus virginicus* (L.) Kunth
    X. Li, D.M. Seliskar and J.L. Gallagher

    N. Sankhla, H.S. Gehlot, R. Choudhary, S. Joshi and R. Dinesh

15. Sabkha edge vegetation of coastal and inland sabkhat in Saudi Arabia
    H.-J. Barth

16. Analysis of the soil sustaining salt grass (*Distichlis spicata* (L.) Greene) wild populations in semiarid coastal zone of Mexico

17. Comparative salt tolerance of perennial grasses
    S. Gulzar and M.A. Khan

18. Commercial application of halophytic turfs for golf and landscape developments utilizing hyper-saline irrigation
    M.W. DePew and P.H. Tillman
19. Salt tolerance of floriculture crops
   C.T. CARTER AND C.M. GRIEVE

   279

20. Utilization of salt-affected soils by growing some Acacia species
   M.Y. ASHRAF, M.U. SHIRAZI, M. ASHRAF, G. SARWAR
   AND M.A. KHAN

   289

21. Soil remediation via salt-conduction and the hypotheses of
   halosynthesis and photoprotection
   N.P. YENSEN AND K.Y. BIEL

   313

22. Mechanisms of cash crop halophytes to maintain yield and
   reclaim soils in arid areas
   H.-W. KOYRO, N. GEISSLER, S. HUSSIN AND B. HUCHZERMeyer

   345

23. Halophyte uses for the twenty-first century
   N.P. YENSEN

   367

24. Halophyte research and development: What needs to be
   done next?
   B. BÖER

   397
