The social logic of space

BILL HILLIER

JULIENNE HANSON

Bartlett School of Architecture and Planning
University College London
## Contents

**Preface**  
ix

**Introduction**  
1

1 **The problem of space**  
Society and space  
The problem of space  
The logic of discrete systems  
The inverted genotype  
Morphic languages  
26

2 **The logic of space**  
Introduction  
Compressed descriptions  
Some examples  
Elementary generators: an ideographic language  
52

3 **The analysis of settlement layouts**  
Individuals and classes  
A model for syntactic representation, analysis and interpretation: alpha-analysis  
A procedure for analysis  
Some differences  
An excursion into interpretation: two social paradigms of space?  
82

4 **Buildings and their genotypes**  
Insides and outsides: the reversal effect  
The analysis of the subdivided cell  
Some examples of domestic space  
Two large complexes from the ethnographic record  
143

5 **The elementary building and its transformations**  
Elementary buildings  
Reversed buildings and others  
176

6 **The spatial logic of arrangements**  
From structures to particular realities  
198
