Introduction to Public Health in Pharmacy

Edited by
Bruce Lubotsky Levin, DrPH, MPH
Associate Professor and Head
Graduate Studies in Behavioral Health Program
Editor-in-Chief
Journal of Behavioral Health Services & Research
Louis de la Parte Florida Mental Health Institute and College of Public Health
University of South Florida
Tampa, Florida

Peter D. Hurd, PhD
Professor of Pharmacy Administration
Assistant Dean, Quality Assurance and Improvement
St. Louis College of Pharmacy
St. Louis, Missouri

Ardis Hanson, MLS
Library Director
Louis de la Parte Florida Mental Health Institute
University of South Florida
Tampa, Florida
## Contents

Foreword, *A Pharmacy Perspective*, Robert L. McCarthy ............... ix
Preface .............................................................................. xiii
Editors and Contributors ...................................................... xv

**PART I. PUBLIC HEALTH KNOWLEDGE BASE ........................................... 1**

Chapter 1. Introduction and Overview of Pharmacy and Public Health ................................................................. 3
*Peter D. Hurd, Bruce Lubotsky Levin, and Ardis Hanson*

- Definitions and Core Functions of Public Health ................. 5
- The Future of Public Health .................................................. 7
- Historical Perspectives ...................................................... 8
- Prevention and Public Health .............................................. 9
- Implications for Pharmacists and Pharmacy Practice .............. 10

Chapter 2. Applied Epidemiology for Pharmacists: Basic Concepts and Principles ......................................................... 17
*Kevin E. Kip and Brian J. Quilliam*

- Introduction to Epidemiology ............................................ 20
- Definitions and Core Functions of Epidemiology .................. 21
- Historical Perspectives .................................................... 22
- Measurement of Health Outcomes: Types of Measures .......... 24
- Descriptive Epidemiology ................................................ 29
- Analytic Epidemiology ..................................................... 30
- Evaluating Associations .................................................. 33
- Types of Epidemiologic Studies ........................................ 37
- Implications for Pharmacists and Pharmacy Practice .......... 46
# Chapter 3. Disease Prevention and Health Promotion

*Peter D. Hurd, Bruce Lubotsky Levin, Ardis Hanson, and William G. Lang, IV*

Implications for Pharmacists and Pharmacy Practice ............................................. 146
Conclusion .................................................................................................................. 148

Chapter 7. Evaluation in Pharmacy Practice:
Evaluation and Outcome Assessment ................................................................. 157

*Oliver T. Massey and Kathleen A. Johnson*

Introduction .............................................................................................................. 159
Qualitative and Quantitative Research Methods ..................................................... 162
The Evaluation Cycle ................................................................................................. 164
Needs Assessment ..................................................................................................... 164
Logic Models and Other Evaluations in
Program Development ............................................................................................ 166
Process Evaluations ................................................................................................. 167
Outcome and Impact Evaluations ............................................................................. 168
Implications for Pharmacists and Pharmacy Practice ............................................ 170

Chapter 8. Financing ................................................................................................. 175

*Buddy Lingle and Samuel H. Zuvekas*

Introduction and Overview ...................................................................................... 176
Public Health Insurance System .............................................................................. 178
The Healthcare Safety Net ....................................................................................... 183
Paying for Health Care .............................................................................................. 184
Adverse and Favorable Risk Selection ..................................................................... 189
Financing Pharmacy in the Public System ............................................................... 191
System Stability ......................................................................................................... 193
Reforming the Healthcare System .......................................................................... 195
Effects of Public Financing on Public Health Infrastructure ................................. 196
Implications for Pharmacists and Pharmacy Practice ............................................ 198

Chapter 9. Managed Care Pharmacy and Public Health ....................................... 205

*Kenneth W. Schafermeyer, Shamima Khan, David M. Scott, and Peter D. Hurd*

Introduction .............................................................................................................. 207
Description of Managed Health Care ....................................................................... 208
Evolution of Managed Care ...................................................................................... 209
Managed Care for Prescription Drugs ..................................................................... 212
Opportunities for Synergies between Managed Health and
Public Health .............................................................................................................. 215
Challenges for Managed Health Care and Public Health ....................................... 219
Implications for Pharmacists and Pharmacy Practice ............................................ 221

Chapter 10. Pharmacoeconomics .......................................................................... 227

*James W. Shaw and Thomas Delate*

Introduction: The Importance of Economic Evaluation ........................................... 231
The Role of Economic Evaluation in Public Health ................................................. 231
Principles and Practice: Costs and Consequences .................................................. 232
Costing Principles and Elements of Good Evaluations 233
Methods of Economic Evaluation 236
Data Sources and Study Design 239
Modeling and Simulation 240
Implications for Pharmacists and Pharmacy Practice 241

PART III. APPLICATIONS FOR PHARMACY PRACTICE 247

Chapter 11. Evolving Issues in Pharmacy Practice, Law, and Ethics 249
Jay Wolfson, Tanya Thomas, Robin A. Suggs, and Michelle A. Chui
Introduction 253
State Regulation of Pharmacy Practice 253
Who May Practice? 254
Licensing of Pharmacists 254
Federal Regulation of Pharmacy Practice 255
Omnibus Budget Reconciliation Act of 1990 256
Medicare 258
Medicaid 260
Health Insurance Portability and Accountability Act 265
Ethical Considerations in Pharmacy Practice 267
Implications for Pharmacists and Pharmacy Practice 272

Chapter 12. Cultural Perspectives 279
Barry A. Bleidt and Carmita A. Coleman
Introduction 283
The Need for Cultural Competence 284
Implications for Pharmacists and Pharmacy Practice 287

Chapter 13. Public Health Informatics 297
Ardis Hanson, Bruce Lubotsky Levin, and David M. Scott
Introduction 298
Overview 299
History 300
Applications 300
Role of Information Technology in Public Health and Pharmacy 301
Public Health Professionals 304
Public Health Facilities 305
Insurance and Providers (Pharmacy Benefit Managers, Drug Pricing) 305
Health Information Seeking 306
Trends in Pharmacy Practice 307
Ethical and Legal Issues 310
Pharmacists' Education and Training 312
Implications for Pharmacists and Pharmacy Practice 313
Peter D. Hurd and Jeanine K. Mount
Introduction: Emergencies and Related Language ............... 323
Key Components of Emergency Preparedness and
Response Systems ................................................... 324
Implications for Pharmacists and Pharmacy Practice ............ 332

Chapter 15. Education and Training .......................... 337
Christine K. O'Neil, Bruce Lubotsky Levin, and Ardis Hanson
Introduction: The Need for a Focus on Public Health in
Health Professions Education .................................... 338
Public Health in the CAPE Educational Outcomes .............. 340
Education Curriculum: Including Public Health in Pharmacy ... 341
Implications for Pharmacists and Pharmacy Practice .......... 346

Index ................................................................. 351
