Preface ix  
Acknowledgements xiii  
About the author xv  
Focus points xvii  

## 1 Introduction

## 2 Asthma: the disease

BTS/SIGN definition 5  
Pathophysiology of the airway 7  
Risk factors 11  
Clinical variants in asthma 11  
Diagnosis of asthma 18  
Diagnosis in children 25  
Diagnosis in the elderly 26  
Differential diagnosis 26

## 3 Pharmacological management

Aims of pharmacological management 31  
Pharmacological treatment 32  
Management of chronic asthma 34  
Specific management problems 45  
Vaccinations 52

## 4 Management of acute asthma

Pathology of acute asthma 59  
Causes of exacerbations 61  
Clinical presentation 63  
Differential diagnosis 64  
Treatment of acute asthma in adults 66  
Management of acute asthma in children 74  
Discharge from hospital after an acute attack 78
### Lifestyle management 81
- Allergen avoidance 81
- Avoiding pollutants 84
- Complementary therapies/alternative medicines 86
- Dietary manipulation 88
- Exercise 90
- Immunotherapy 91
- Travel 91
- Sexual health 93

### Monitoring asthma 95
- Symptoms 95
- Pulmonary function measurements 97
- Pulse oximetry 107
- Arterial blood gases 107
- Chest radiograph 108
- Induced sputum 109
- Exhaled nitric oxide 109
- Medication use 109
- Quality-of-life measures 110

### Drug delivery to the lungs 113
- Factors that affect the clinical outcome from aerosol therapy 114
- Inhaler devices 119
- Future developments in pulmonary delivery 129

### Patient education and self-management 133
- Patient education 133
- Self-management 137

### Asthma in pregnancy 145
- Effects of pregnancy on asthma 145
- Effects of asthma on pregnancy 146
- Asthma management during pregnancy 146
- Pharmacological therapy in pregnancy 147
- Labour and delivery 148
- The post-partum period 149

### Beta-2 agonists 151
- Indications 151
- Mechanism of action 151
- Pharmacological properties 153
- Route of administration 154
- Combination products 154
Contraindications and special precautions for use 160
Adverse effects 163
Drug interactions 165
Preparations 166

11 Anticholinergics 169
Indications 169
Mechanism of action 171
Pharmacological properties 171
Dosage 171
Contraindications 173
Adverse effects 173
Drug interactions 174
Preparations 174

12 Corticosteroids 177
Indications 177
Mechanism of action 178
Pharmacokinetics 180
Dosage 187
Contraindications 188
Adverse effects 188
Drug interactions 195
Preparations 195

13 Methylxanthines 201
Indications 201
Mechanism of action 201
Pharmacokinetics 203
Dosage 206
Contraindications and special precautions for use 209
Adverse effects 209
Drug interactions 209
Preparations 210

14 Leukotriene receptor antagonists 215
Indications 215
Mechanism of action 219
Pharmacokinetics 219
Dosage 220
Contraindications 220
Adverse effects 220
Drug interactions 223
Preparations 224
15 New therapies and future developments in asthma management
Omalizumab 227
Selective phosphodiesterase inhibitors 231
Mediator antagonists 231
Anti-adhesion therapies 234
Eosinophils and asthma management 234
Single inhaled therapy 235

16 Compliance and concordance
Types of non-concordance 241
Factors affecting concordance with treatment 243
Interventions to improve concordance 245

17 Role of the pharmacist in the management of asthma
Aims of pharmacological management 249
Role of the pharmacist 249

Appendix: Asthma indicators in the general medical service contract

Glossary 267
Useful resources 273
