Reinhard Hübner

Strategic Supply Chain Management in Process Industries

An Application to Specialty Chemicals Production Network Design

With 57 Figures and 22 Tables

Springer
Contents

List of Abbreviations ..............................................................................................................XI

1 Introduction .........................................................................................................................1
  1.1 Motivation and Objectives ..........................................................................................1
  1.2 Approach and Dissertation Outline ..........................................................................4

2 Production Network Design and Specialty Chemicals ....................................................7
  2.1 Supply Chain Management and Production Network Design ..........................7
  2.1.1 Supply Chains and Production Networks .........................................................7
  2.1.2 Production Network Design .............................................................................9
  2.1.3 Production Network Design and Advanced Planning Systems .........................12
  2.1.4 Generic Production Network Design Strategies .............................................14
  2.2 Production Network Design and Industrial Location Science .........................19
  2.2.1 Introduction to Industrial Location Science ....................................................19
  2.2.2 Major Findings from Industrial Location Science ...........................................21
  2.3 Specialty Chemicals Production ..............................................................................24
  2.3.1 Process Industries, Chemical Industry and Specialty Chemicals .........................24
  2.3.2 Chemical Production Sites .............................................................................27
  2.3.3 Production Technologies in Chemical Industry ..............................................29
  2.3.4 Specialty Chemicals Production Networks ......................................................31
  2.4 Production Network Planning and Controlling ......................................................35
  2.4.1 Production Network Planning Process .............................................................35
  2.4.2 Problem Definition Phase ..............................................................................39
  2.4.3 Production Network Optimization Phase .......................................................43
  2.4.4 Site Selection Phase .......................................................................................45
  2.4.5 Integration of Production Network Design into Strategic Planning .................47
3 Global Production Network Optimization

3.1 Location Analysis and Production Network Optimization

3.2 Review of Supply Network Optimization Literature

3.2.1 Classification of Supply Network Optimization Models

3.2.2 Review of Individual Publications

3.3 Modeling Specialty Chemicals Production Networks

3.3.1 General Model Characteristics

3.3.2 Objective Function

3.3.3 Capacity Selection, Expansion and Reduction

3.3.4 Plant Loading and Economics of Scale and Scope

3.3.5 Specific Factors of Global Production Networks

3.3.6 Single Sourcing

3.3.7 Product Transfers

3.3.8 Other Model Features

3.4 Mathematical Optimization Model

3.4.1 Model Notation

3.4.2 Model Formulation

3.4.3 Model Extensions

3.4.4 Accounting for Uncertainty: Robust Production Network Design

3.5 Numerical Performance

4 Evaluation of Individual Production Sites

4.1 Introduction to Multiple Criteria Decision Analysis

4.1.1 Classification of MCDA Methods

4.1.2 Common Steps of MADA Methods

4.2 Traditional MADA Methods

4.2.1 Simple Additive Weighting and Simple Scoring

4.2.2 Analytic Hierarchy Process

4.3 Outranking Approaches

4.3.1 ELECTRE

4.3.2 PROMETHEE

4.4 Data Envelopment Analysis

4.5 A Specialty Chemicals Site Assessment Model

4.5.1 Choice of Method

4.5.2 The AHP Site Assessment Model

4.5.3 Lessons Learned from Application Case Studies

5 Case Study Production Network Optimization

5.1 Developing a Decision Support Tool for Strategic Network Design

5.1.1 Industry Requirements
