Aromatherapy Science
A guide for healthcare professionals

Maria Lis-Balchin
BSc, PhD
Reader in Applied Biochemistry (retired)
Honorary Research Fellow (presently)
School of Applied Science
London South Bank University
London, UK
Contents

Preface xi
About the author xiii
Abbreviations xv

1 Introduction 1
Definitions of aromatherapy 1
Introduction to aromatherapy concepts 1
What is an aromatherapist? 2
Aromatherapy, aromatology and aromachology 2
Aromatherapy practice in the UK and USA 3
Common uses of essential oils 3
Proven effects of essential oils 4
Unproven aromatherapeutic virtues 5
Conclusion 5

2 Historical background to aromatherapy 7
Introduction 7
Incense: inhalation effects 7
Scented plants used as incense in Ancient Egypt 7
Uses of incense 9
Perfume and cosmetics: precursors of cosmetological aromatherapy 10
Medicinal uses: precursors of aromatology or ‘clinical’ aromatherapy 11
Modern perfumery 13
Conclusion 15

3 Aromatherapy practice 17
Introduction 17
Aromatherapy basics 17
Massage using essential oils 20
Recent literature review of the benefits of massage 23
Internal usage of essential oils 27
Use of pure or synthetic components 28
Therapeutic claims for the application of essential oils 29
False claims challenged in court 29
Conclusion 30

Neurotoxic oils 84
Absolutes and concretes 85
Phytols 85
Interactions between essential oils and conventional medicines or medical conditions 86
The phenomenon of 'quenching': true or false? 87
Possible dangers of novel essential oils and plant extracts 87
Dangerous practices of some aromatherapists 88
'Safe' essential oils and their toxicity 89
Possible dangers of using essential oils internally and externally in large doses 89
Reporting of adverse effects by aromatherapists 90
Safety warnings in the aromatherapy industry 91
Legislation: present and future 91
Conclusion 92

8 Clinical studies
Introduction 93
Recent clinical studies 94
Past clinical studies 95
Use of essential oils mainly as chemical agents 100
Single-case studies 101
Problems arising in aromatherapy studies 102
Conclusion 102

Introduction to the monographs 105

Angelica oil 109
Aniseed and star anise 112
Basil oil 117
Bay oils: laurel and pimento 120
Benzoin tinctures and resinoids 123
Bergamot oil 126
Buchu leaf oil 129
Cajuput oil 132
Camphor oil 135
Carrot seed oil 138
Cassia oil 141
Cedarwood oil 144
Celery seed oil 147
Chamomile German oil 150
Chamomile Roman oil 155
Cinnamon oil 159
Citronella oil 164
Clary sage oil 167
Clove oil 170
Cornmint oil 174
Cubeb oil 177
Cypress oil 179
Elecampane oil 182
Eucalyptus oils 184
Fennel oil 190
Frankincense oil 193
Geranium oil 196
Ginger oil 202
Ho leaf oil 205
Hyssop oil 207
Jasmine absolute 210
Juniper oil 213
Kanuka oil 216
Lavender oil 219
Lemon balm oil/melissa essential oil 227
Lemon oil 231
Lemongrass oil 235
Litsea cubeba oil 238
Manuka oil 240
Marjoram oil 244
Myrrh oil 248
Myrtle oil 251
Neroli oil 253
Nutmeg oil 256
Orange oil 260
Palmarosa oil 264
Parsley oil 267
Patchouli oil 270
Pepper oil 273
Peppermint oil 275
Peru balsam 282
Petitgrain oil 286
Pine oil 289
Rose oil 292
Rosemary oil 296
Rosewood oil 300
Sage oil 303
Sandalwood oil 307
Savory oil 310
Spearmint oil 312
Spike lavender oil 315
Tea tree oil 318
Thyme oil 326
Valerian oil 330
Vanilla tincture/absolute 333
Wintergreen oil 335
Yarrow root oil 338
Ylang ylang oil 341
Floral absolutes and essential oils (other than jasmine, rose, lavender, neroli) 344

Bibliography 351

Appendix 1
Bioactivity of commercial essential oils: antibacterial and antifungal activities

Appendix 2
Pharmacological properties of some commercial essential oils on electrically stimulated smooth muscle of guinea-pig ileum in vitro

Appendix 3
Pharmacological effect of selected essential oils on rat uterus compared with that on the guinea-pig ileum in vitro

Appendix 4
Pharmacological effect of components on rat uterus compared with that on guinea-pig ileum in vitro

Appendix 5
Pharmacological effects of blends of essential oils on rat uterus compared with that on guinea-pig ileum in vitro

Appendix 6
Correlation between 1,8-cineole content of commercial essential oils and bioactivity

Appendix 7
Comparison of the antibacterial and antifungal properties of selected essential oils
Appendix 8 406
Mode of adulteration of the most commonly used essential oils

Appendix 9 408
Drop volume versus weight of certain essential oils/absolutes

Appendix 10 409
Weight of one drop of essential oils using the droppers provided with the bottles

Appendix 11 410
Comparison of the actual effect of essential oils on guinea-pig ileum in vitro and the predicted effects using chemical composition and aromatherapists’ predictions

Appendix 12 411
Comparison of the actual effect of essential oil blends on guinea-pig ileum and the predicted effects using chemical composition and aromatherapists’ predictions

Appendix 13 412
The predicted effect (percentage of components at the retention times shown) of essential oils on guinea-pig ileum in vitro

Appendix 14 413
Psychological and physiological effects of odours: comparison of sedative and stimulant essential oils as determined by using different parameters by different researchers

Appendix 15 415
Comparison of sedative and stimulant components as determined by using different parameters by different researchers

Appendix 16 417
Some techniques used for psychophysiological measurements in humans

Appendix 17 418
Evidence for transfer of components of essential oils into blood/brain when applied to skin, orally or by inhalation

Appendix 18 419
‘Absorption’ of essential oils from the animal skin, i.e. rate of disappearance

Appendix 19 420
Common uses of essential oils

Appendix 20 421
Miscellaneous functions of essential oils according to pharmacopoeias

Appendix 21 422
Established uses of essential oils/components: conventional rather than complementary or alternative uses

Appendix 22 424
RIFM toxicological monographs

Appendix 23 427
RIFM recommended limit for safe use of essential oils

Appendix 24 430
Hazards and toxicity: CHIP

Appendix 25 432
Aspiration hazards (R65)

Appendix 26 434
Safety data: CHIP symbols explained in detail

Appendix 27 440
New 7th Amendment: European Parliament 2002

Appendix 28 441
Sensitisers and their essential oil sources
Appendix 29 442
Harmful and sensitising oils (EFFA-IOFI-IFRA)

Appendix 30 443
List of banned oils/restricted oils: IFRA list

Appendix 31 445
Toxic or dangerous essential oils versus their usage as food additives

Appendix 32 446
Guide for non-scientists on making a judgement on the scientific merit of published papers on clinical studies and other research

Appendix 33 449
Some aromatherapy-related organisations
