Contents

Preface .................................................................................................................. yii
Editor ..................................................................................................................... ix
Contributors ......................................................................................................... xi

PART I Occurrence and Analysis of Pharmaceuticals in the Environment

Chapter 1 Environmental Presence and Persistence of Pharmaceuticals: An Overview .............................................................. 3
Susan T. Glassmeyer, Dana W. Kolpin, Edward T. Furlong, and Michael J. Focazio

Chapter 2 Advances in the Analysis of Pharmaceuticals in the Aquatic Environment ............................................................... 53
Sandra Pérez and Damià Barceló

Chapter 3 Sample Preparation and Analysis of Solid-Bound Pharmaceuticals ............................................................................. 81
Christine Klein, Seamus O'Connor, Jonas Locke, and Diana Aga

Chapter 4 Gadolinium Containing Contrast Agents for Magnetic Resonance Imaging (MRI): Investigations on the Environmental Fate and Effects ................................................................. 101
Claudia Neubert, Reinhard Länge, and Thomas Steger-Hartmann

PART II Environmental Fate and Transformations of Veterinary Pharmaceuticals

Chapter 5 Fate and Transport of Veterinary Medicines in the Soil Environment ............................................................................. 123
Alistair B.A. Boxall

Chapter 6 Sorption and Degradation of Selected Pharmaceuticals in Soil and Manure ...................................................................... 139
Nadia Carmosini and Linda S. Lee
Chapter 7  Mobility of Tylosin and Enteric Bacteria in Soil Columns ............... 167
Keri L. Henderson, Thomas B. Moorman, and Joel R. Cooks

Chapter 8  Plant Uptake of Pharmaceuticals from Soil: Determined by ELISA ................................................................. 179.
Rudolf J. Schneider

Chapter 9  Antibiotic Transformation in Plants via Glutathione Conjugation ................................................................. 199
Michael H. Tarkas, James O. Berry, and Diana S. Aga

PART III Treatment of Pharmaceuticals in Drinking Water and Wastewater

Chapter 10  Drugs in Drinking Water: Treatment Options ................................................................. 217
Howard S. Weinberg, Vanessa J. Pereira, and Zhengqi Ye

Chapter 11  Removal of Endocrine Disruptors and Pharmaceuticals during Water Treatment ................................................................. 229
Shane A. Snyder, Hongxia Lei, and Eric C. Wert

Chapter 12  Reaction and Transformation of Antibacterial Agents with Aqueous Chlorine under Relevant Water Treatment Conditions .... 261
Ching-Hua Huang, Michael C. Dodd, and Amisha D. Shah

Chapter 13  Hormones in Waste from Concentrated Animal Feeding Operations ................................................................. 291
Z. Zhao, K.F. Knowlton, and N.G. Love

Chapter 14  Treatment of Antibiotics in Swine Wastewater ................................................................. 331
Craig D. Adams

Chapter 15  Removal of Pharmaceuticals in Biological Wastewater Treatment Plants ................................................................. 349
Sungpyo Kim, A. Scott Weber, Angela Batt, and Diana S. Aga

Chapter 16  Chemical Processes during Biological Wastewater Treatment ......... 363
Willie F. Harper, Jr., Tamara Floyd-Smith, and Taewoo Yi

Index .................................................................................................................................................. 383
