Contents

Preface ................................ iii
Contributors ................................ ix

1. Introducing Pharmacokinetic and Pharmacodynamic Concepts ........................................ 1
   Malcolm Rowland

2. In Vitro Enzyme Kinetics Applied to Drug-Metabolizing Enzymes .................................. 31
   Kenneth R. Korzekwa

3. Human Cytochromes P450 and Their Role in Metabolism-Based Drug-Drug Interactions .......... 53
   Stephen E. Clarke and Barry C. Jones

4. UDP-Glucuronosyltransferases .......................................................... 87
   Rory P. Remmel, Jin Zhou, and Upendra A. Argikar

5. Drug-Drug Interactions Involving the Membrane Transport Process .............................. 135
   Hiroyuki Kusuhara and Yuichi Sugiyama

6. In Vitro Models for Studying Induction of Cytochrome P450 Enzymes .............................. 205
   Jose M. Silva and Deborah A. Nicoll-Griffith
7. In Vitro Approaches for Studying the Inhibition of Drug-Metabolizing Enzymes and Identifying the Drug-Metabolizing Enzymes Responsible for the Metabolism of Drugs (Reaction Phenotyping) with Emphasis on Cytochrome P450 ............................... 231
   Brian W. Ogilvie, Etsuko Usuki, Phyllis Yerino, and Andrew Parkinson

8. The Role of P-Glycoprotein in Drug Disposition: Significance to Drug Development ................................. 359
   Matthew D. Troutman, Gang Luo, Beverly M. Knight, Dhiren R. Thakker, and Liang-Shang Gan

9. Cytochrome P450 Protein Modeling and Ligand Docking ............................... 435
   K. Anton Feenstra, Chris de Graaf, and Nico P. E. Vermeulen

10. Role of the Gut Mucosa in Metabolically Based Drug-Drug Interactions ................................. 471
    Kenneth E. Thummel, Danny D. Shen, and Nina Isoherranen

11. Mechanism-Based Inhibition of Human Cytochromes P450: In Vitro Kinetics and In Vitro–In Vivo Correlations ............................... 515
    Xin Zhang, David R. Jones, and Stephen D. Hall

12. Transporter-Mediated Drug Interactions: Molecular Mechanisms and Clinical Implications ............................... 545
    Jiunn H. Lin

13. Metabolism and Transport Drug Interaction Database: A Web-Based Research and Analysis Tool ............................... 567
    Houda Hachad, Isabelle Raguenueau-Majlessi, and René H. Levy

14. In Vivo Probes for Studying Induction and Inhibition of Cytochrome P450 Enzymes in Humans ............................... 581
    Grant R. Wilkinson

15. Drug-Drug Interactions: Clinical Perspective ............................... 643
    David J. Greenblatt and Lisa L. von Moltke
Shiew-Mei Huang, Lawrence J. Lesko, and Robert Temple

17. Drug-Drug Interactions: Toxicological Perspectives ........... 687
Sidney D. Nelson

18. Drug-Drug Interactions: Marketing Perspectives ................ 709
Kevin J. Petty and Jose M. Vega

Index ........ 721
