Cover: The conference, held in Sheffield (UK) 2006, was organised by the Sheffield Polymer Centre, University of Sheffield under the co-Chairmanship of John Stanford (University of Manchester), Tony Ryan (University of Sheffield) and Simon Ross-Murphy (Kings College, London).

Functional and Biological Gels and Networks:
Theory and Experiment
18th Polymer Networks Group Meeting, Polymer Networks 2006
Sheffield (United Kingdom), September 3–7, 2006

Preface
J. Stanford, T. Ryan, S. Ross-Murphy

Plenary Lecture
Polymer Networks in Research and Application
Walther Burchard

Part 1: Statistical Studies on Networks
In Honour of Professor R.F.T. Stepto for Contributions to Polymer Science and to the Polymer Network Group

Applicability of Statistical Theories of Network Formation
Karel Dušek
Random Networks, Graphs, and Matrices

Monte Carlo Simulations on Nanoparticles in Elastomers. Effects of the Particles on the Dimensions of the Polymer Chains and the Mechanical Properties of the Networks

Stress - Optical Behaviour of Polymers

Part 2: Processing - Structure - Properties of Networks

Toughness Properties of Lightly Crosslinked Epoxies Using Block Copolymers

Structure Development in Flexible Polyurethane Foam-Layered Silicate Nanocomposites

Part 3: Scattering from Gels and Networks

X-ray Photon Correlation Spectroscopy of Dynamics in Thermosensitive Gels

Comparative Study of Scattering and Osmotic Properties of Synthetic and Biopolymer Gels

Comparison of Critical Exponents Determined by Rheology and Dynamic Light Scattering on Irreversible and Reversible Gelling Systems

Autonomous Volume Transitions of a Polybase Triblock Copolymer Gel in a Chemically Driven pH-Oscillator

B. E. Eichinger

James E. Mark,* Reda Abou-Hussein, Taner Z. Sen, Andrzej Kloczkowski

Ian M. Ward

Pierre Gerard, Nicolas Passade Boupat, Thomas Fine, Laurent Gervat, Jean-Pierre Pascault

Arthur N. Wilkinson,* Nurul H. Fithriyah, John L. Stanford, Daniel Suckley

Erik Geissler,* Katalin Kosik, Andrei Fluerasu, Abdellatif Moussaïd, Krisztina László

Ferenc Horkay,* Peter J. Basser, Anne-Marie Hecht, Erik Geissler

Sven Richter*

© 2007 Wiley-VCH Verlag GmbH & Co. KGaA, Weinheim
Elastic Properties of Semi-Flexible Chains and Networks

Peter Cifra, Tomáš Bleha*

Part 4: Nanostructured Gels and Networks

Hyperbranched Aromatic Polyesters

Małgorzata Wałęzak, Jaromir B. Lechowicz, Henryk Galina*

Nanocomposite Gels: New Advanced Functional Soft Materials

Kazutoshi Haraguchi

Deformation Studies on Polymer-Clay Nanocomposite Gels

Mitsuhiko Shibayama,* Sho Miyazaki, Hitoshi Endo, Takeshi Karino, Kazutoshi Haraguchi

Part 5: Physical and Biological Gels

Polymethacrylate Networks as Substrates for Cell Culture

Molecular Weight Influence on Gelatin Gels: Structure, Enthalpy and Rheology

Nadia Elharfaoui, Madeleine Djabourov,* Wilfried Babel

Programmed Ephemeral Gels: New Types of Biomaterials

Sébastien Giraudier, Julien Picard, Véronique Larretu Garde*

2-Dimensional Network Formation from a Graft Copolymer at the Air-Water Interface

M. Simon Saenz de Samaniego, A.F. Miller*

Characterization of Composite Networks Made of Type I Collagen, Hyaluronic Acid and Decorin

Sylvie Lelu, Alain Pluen*

Synthesis and Viscoelastic Properties of Hydrophobically Modified Hydrogels

Guillaume Miquelard-Garnier, Costantino Creton,* Dominique Hourdet*
