Contents

Chapter 1: Defining the Issues  
Definitions  2  
Types of Medication Incidents  3  
Studies of Patient Safety  3  
The Impact of Adverse Drug Events and Medication Errors  8  
Summary  10  
Reflective Questions  11

Chapter 2: Why Medication Incidents Occur  
Error Theory  13  
Studies of Contributory Factors  16  
Classification of Contributory Factors  17  
Immediate or Common Causes of Medication Incidents  17  
Root or System Causes of Medication Incidents  20  
Summary  24  
Reflective Questions  25

Chapter 3: Prevention of Medication Incidents: Risk Management to Improve Patient Safety  
Elements of Risk Management in Pharmacy  28  
System Preventive Strategies  29  
General Preventive Strategies for Organizations  30  
Preventive Strategies for Pharmacies  33  
Personal Preventive Strategies  36  
Summary  42  
Reflective Questions  42

Chapter 4: Common Causes of Medication Incidents and Preventive Strategies  
Illegible Handwriting  46  
Look-Alike/Sound-Alike Medications  48  
Verbal Prescriptions  52  
Faxed Prescriptions  53  
Missing Information  54  
Abbreviations and Symbols  56  
Calculation and Decimal Point Errors  62
Chapter 8: Dealing with Medication Incidents in Pharmacy  
Plan of Action for Handling a Medication Incident  150  
Protocol for Handling a Medication Incident  153  
Incident Reporting  155  
Root Cause Analysis  160  
Communication of a Medication Incident/Disclosure  168  
Staff Issues During a Medication Incident  174  
Summary  175  
Reflective Questions  175  

Chapter 9: Instituting Safe Medication Practices in Pharmacy  
Continuous Quality Improvement  177  
Failure Mode Effects Analysis  181  
Self-Assessment  185  
Other Methods for Improving Patient Safety  187  
Developing a Patient Safety Plan  189  
Barriers to Patient Medication Safety  192  
Summary  194  
Reflective Questions  194  

Appendix A: Organizations Involved in Patient Safety  

Appendix B: Strategies and Tools for Prevention of Specific Types of Problems  
Glossary  203  
Index  207
