Pharmaceutics – Dosage Form and Design

David Jones
Chair of Biomaterial Science,
School of Pharmacy,
Queen’s University of Belfast, UK
## Contents

- Introduction to the FASTtrack series vii
- Preface viii
- About the author x

### 1. Pharmaceutical solutions for oral administration 1
- General description 1
- Advantages and disadvantages of pharmaceutical solutions for oral administration 2
- Drug solubility 2
- Excipients used in pharmaceutical solutions for oral administration 6
- Types of pharmaceutical solutions 15
- Multiple choice questions 21

### 2. Pharmaceutical disperse systems 1: suspensions – general principles and the formulation of suspensions for oral administration 25
- General description 25
- Advantages and disadvantages of pharmaceutical suspensions 26
- The physical stability of pharmaceutical suspensions 27
- Formulation considerations for orally administered suspension formulations 33
- Excipients used in the formulation of suspensions for oral administration 35
- Multiple choice questions 42

### 3. Pharmaceutical disperse systems 2: emulsions and creams 45
- General description 45
- Advantages and disadvantages of pharmaceutical emulsions 46
- Emulsion instability and theories of emulsification 47
- Formulation of pharmaceutical emulsions 55
- Excipients used in pharmaceutical emulsions 65
- Manufacture of emulsions 70
- Multiple choice questions 70

### 4. Pharmaceutical disperse systems 3: ointments, pastes, lotions, gels and related formulations 75
- General description 75
- Advantages and disadvantages of pharmaceutical ointments, pastes, lotions, liniments, collodions and gels 76
- Pharmaceutical ointments and pastes 77
- Pharmaceutical lotions, liniments, collodions and paints 86
- Pharmaceutical gels 88
- Multiple choice questions 99

### 5. Parenteral formulations 103
- General description 103
- Routes of parenteral administration 103
- Advantages and disadvantages of parenteral formulations 106
- Formulation considerations for parenteral formulations 108
- Surface-active agents 115
- Multiple choice questions 131

### 6. Ocular, nasal and otic dosage forms 135
- Introduction 135
- Advantages and disadvantages of ocular dosage forms 136
- Administration of therapeutic agents to the eye 137
- Nasal formulations 150
- Otic formulations 152
- Multiple choice questions 154

### 7. Vaginal and rectal dosage forms 157
- Introduction 157
- Rectal dosage forms 157
- Vaginal dosage forms 174
- Multiple choice questions 177

### 8. Respiratory dosage forms 181
- Introduction 181
- Advantages and disadvantages of respiratory drug delivery 181
