Contents

Preface xi
Editor xiii
Contributors xv

1 Overview of Time-to-Event Endpoint Methodology 1
   Karl E. Peace

2 Design (and Monitoring) of Clinical Trials with
   Time-to-Event Endpoints 15
   Michael W. Sill and Larry Rubinstein

3 Overview of Time-to-Event Parametric Methods 71
   Karl E. Peace and Kao-Tai Tsai

4 Overview of Semiparametric Inferential Methods
   for Time-to-Event Endpoints 93
   Jianwen Cai and Donglin Zeng

5 Overview of Inferential Methods for Categorical
   Time-to-Event Data 109
   Eric V. Slud

6 Overview of Bayesian Inferential Methods Including
   Time-to-Event Endpoints 143
   Laura H. Gunn

7 An Efficient Alternative to the Cox Model for Small
   Time-to-Event Trials 177
   Devan V. Mehrotra and Arthur J. Roth

8 Estimation and Testing for Change in Hazard
   for Time-to-Event Endpoints 195
   Rafia Bhore and Mohammad Huque

9 Overview of Descriptive and Graphical Methods
   for Time-to-Event Data 227
   Michael O'Connell and Bob Treder
10 Design and Analysis of Analgesic Trials
Akiko Okamoto, Julia Wang, and Surya Mohanty

11 Design and Analysis of Analgesic Trials with Paired Time-to-Event Endpoints
Zhu Wang and Hon Keung Tony Ng

12 Time-to-Event Endpoint Methods in Antibiotic Trials
Karl E. Peace

13 Design and Analysis of Cardiovascular Prevention Trials
Michelle McNabb and Andreas Sashegyi

14 Design and Analysis of Antiviral Trials
Anthony C. Segreti and Lynn P. Dix

15 Cure Rate Models with Applications to Melanoma and Prostate Cancer Data
Ming-Hui Chen and Sungduk Kim

16 Parametric Likelihoods for Multiple Nonfatal Competing Risks and Death, with Application to Cancer Data
Peter F. Thall and Xuemei Wang

17 Design, Summarization, Analysis, and Interpretation of Cancer Prevention Trials
Matthew C. Somerville, Jennifer B. Shannon, and Timothy H. Wilson

18 LASSO Method in Variable Selection for Right-Censored Time-to-Event Data with Application to Astrocytoma Brain Tumor and Chronic Myelogenous Leukemia
Lili Yu and Dennis Pearl

19 Selecting Optimal Treatments Based on Predictive Factors
Eric C. Polley and Mark J. van der Laan

20 Application of Time-to-Event Methods in the Assessment of Safety in Clinical Trials
Kelly L. Moore and Mark J. van der Laan

21 Design and Analysis of Chronic Carcinogenicity Studies of Pharmaceuticals in Rodents
Mohammad Atiar Rahman and Karl K. Lin

22 Design and Analysis of Time-to-Tumor Response in Animal Studies: A Bayesian Perspective
Steve Thomson and Karl K. Lin
