Tomáš Janík, Tina Seidel (Eds.)

The Power of Video Studies in Investigating Teaching and Learning in the Classroom

Waxmann 2009
Münster / New York / München / Berlin
Contents

Chapter I
Introduction: On the Power of Video Studies in Investigating Teaching and Learning
Tomáš Janik, Tina Seidel, Petr Najvar

Section I Describing the dynamics of teaching and learning

Chapter 2
Using Video Studies to Compare and Understand Science Teaching: Results from the TIMSS Video Study of 8th Grade Science Teaching
Kathleen J. Roth

Chapter 3
Optimising the Use of Available Technology to Support International Collaborative Research in Mathematics Classrooms
David Clarke, Cameron Mitchell, Peter (Reggie) Bowman

Chapter 4
Challenges in Strategies for Complexity Reduction in Video Studies. Experiences from the PISA+ Study: A Video Study of Teaching and Learning in Norway
Kirsti Klette

Chapter 5
Observing Instruction “next-door”: A Video Study about Science Teaching and Learning in Germany and Switzerland.
Inger Marie Dalehefte, Rolf Rimmele, Manfred Prenzel, Tina Seidel, Peter Labudde, Constanze Herweg

Chapter 6
CPV Video Study: Comparative Perspectives on Teaching in Different School Subjects
Petr Najvar, Tomáš Janik, Marcela Janiková, Dana Hüblová, Veronika Najvarová

Chapter 7
The Use of Video Data to Evaluate Inquiry Situations in Chemistry Education
Maik Walpuski, Elke Sumfleth

Section II Investigating the effects of teaching

Chapter 8
The Pythagoras Study: Investigating Effects of Teaching and Learning in Swiss and German Mathematics Classrooms
Eckhard Klieme, Christine Pauli, Kurt Reusser
