Glucocorticoids and Mood
Clinical Manifestations, Risk Factors, and Molecular Mechanisms

Edited by
LEWIS L. JUDD AND ESTHER M. STERNBERG
Glucocorticoids and Mood
Clinical Manifestations, Risk Factors, and Molecular Mechanisms

Editors
LEWIS L. JUDD AND ESTHER M. STERNBERG

This volume presents papers stemming from the conference “Glucocorticoids and Mood: Clinical Manifestations, Risk Factors and Molecular Mechanisms” held on June 20–21, 2008 in San Diego, California.

CONTENTS

Foreword. By Lewis L. Judd, Esther M. Sternberg, and Nicholas Binkley vii

Glucocorticoid Dysregulations and Their Clinical Correlates: From Receptors to Therapeutics. By Andrea H. Marques, Marni N. Silverman, and Esther M. Sternberg 1

Part I. Clinical Characteristics: Effects of Glucocorticoids on Mood

Effects of Glucocorticoids on Mood, Memory, and the Hippocampus: Treatment and Preventive Therapy. By E. Sherwood Brown 41

Status of Glucocorticoid Alterations in Post-traumatic Stress Disorder. By Rachel Yehuda 56

Part II. Effects and Interactions with Other Hormones and Mediators

Sex Hormones and Mood in the Perimenopause. By Peter J. Schmidt and David R. Rubinow 70

Cytokines and Glucocorticoid Receptor Signaling: Relevance to Major Depression. By Thaddeus W. W. Pace and Andrew H. Miller 86

CRH Signaling: Molecular Specificity for Drug Targeting in the CNS. By Damian Refojo and Florian Holsboer 106

Role of CRF Receptor Signaling in Stress Vulnerability, Anxiety, and Depression. By Richard L. Hauger, Victoria Risbrough, Robert H. Oakley, J. Alberto Olivares-Reyes, and Frank M. Dautzenberg 120
Part III. Physiological, Cellular, and Molecular Considerations

Risk Factors for Development of Depression and Psychosis: Glucocorticoid Receptors and Pituitary Implications for Treatment with Antidepressant and Glucocorticoids. By Carmine M. Pariante .................................................. 144

Glucocorticoid Signaling in the Cell: Expanding Clinical Implications to Complex Human Behavioral and Somatic Disorders. By George P. Chrousos and Tomoshige Kino .............................................................. 153

Part IV. The Glucocorticoid Receptor: Normal Function, Polymorphisms, and Clinical Correlates

Mechanisms Generating Diversity in Glucocorticoid Receptor Signaling. By Javier R. Revollo and John A. Cidlowski .................................................. 167

Clinical Features Associated with Glucocorticoid Receptor Polymorphisms: An Overview. By Laura Manenschijn, Erica L. T. van den Akker, Steven W. J. Lamberts, and Elisabeth F. C. van Rossum .................................................. 179

Glucocorticoid Receptor Polymorphisms in Major Depression: Focus on Glucocorticoid Sensitivity and Neurocognitive Functioning. By Anne T. Spijker and Elisabeth F. C. van Rossum .................................................. 199

Glucocorticoid Receptor Polymorphisms in Major Depression. By Stephan Claes .............................................................. 216

Conference Summary and Conclusions: A Comprehensive Approach to Predicting and Managing Mood Effects of Glucocorticoids. By Esther M. Sternberg and Lewis L. Judd .................................................. 229

The New York Academy of Sciences believes it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the participants in the reported conferences are their own and not necessarily those of the Academy. The Academy has no intent to influence legislation by providing such forums.
