Drug-DNA Interaction Protocols

Second Edition

Edited by
Keith R. Fox

School of Biological Sciences, University of Southampton, Southampton, UK

Humana Press
## Contents

Preface .......................................................... p
Contributors ....................................................... ix

1 Quantitative Analysis of Small Molecule–Nucleic Acid Interactions with a Biosensor Surface and Surface Plasmon Resonance Detection .......... 1
   **Yang Liu and W. David Wilson**

2 Thermal Melting Studies of Ligand DNA Interactions ......................... 25
   **Aurore Guédin, Laurent Lacroix, and Jean-Louis Mergny**

3 Circular and Linear Dichroism of Drug-DNA Systems .......................... 37
   **Alison Rodger**

4 Drug Binding to DNA-RNA Hybrid Structures .................................. 55
   **Richard T. Wheelhouse and Jonathan B. Chaires**

5 Quantification of Binding Data Using Capillary Electrophoresis .......... 71
   **Fitsumbirhan Araya, Graham G. Skellern, and Roger D. Waigh**

6 Determination of Equilibrium Association Constants of Ligand–DNA Complexes by Electrospray Mass Spectrometry .......................... 89
   **Valérie Gabelica**

7 Detection of Adriamycin-DNA Adducts by Accelerator Mass Spectrometry 103
   **Kate Coldwell, Suzanne M. Cutts, Ted J. Ognibene, Paul T. Henderson, and Don R. Phillips**

8 Molecular Modelling Methods to Quantitate Drug–DNA Interactions .......... 119
   **Hao Wang and Charles A. Laughton**

9 Application of Anomalous Diffraction Methods to the Study of DNA and DNA-Complexes ...................................................... 133
   **Derrick Watkins, Tinoush Moulaei, Seiji Komeda, and Loren Dean Williams**

10 DNase I Footprinting ............................................. 153
    **Antonia S. Cardew and Keith R. Fox**

11 Methods to Characterize the Effect of DNA-Modifying Compounds on Nucleosomal DNA ...................................................... 173
    **Vidya Subramanian, Robert M. Williams, Dale L. Boger, and Karolin Luger**

12 REPSA: Combinatorial Approach for Identifying Preferred Drug–DNA Binding Sequences ...................................................... 193
    **Michael W. Van Dyke**

13 In vitro Transcription Assay for Resolution of Drug–DNA Interactions at Defined DNA Sequences ...................................................... 207
    **Benny J. Evison, Don R. Phillips, and Suzanne M. Cutts**

14 In vitro Footprinting of Promoter Regions Within Supercoiled Plasmid DNA . . . 223
    **Daekyu Sun**
15 Topoisomerase I-Mediated DNA Relaxation as a Tool to Study Intercalation of Small Molecules into Supercoiled DNA .......................... 235
   Paul Peixoto, Christian Bailly, and Marie-Hélène David-Cordonnier

16 A High-Throughput Assay for DNA Topoisomerases and Other Enzymes, Based on DNA Triplex Formation ............................. 257
   Matthew R. Burrell, Nicolas P. Burton, and Anthony Maxwell

17 Measurement of DNA Interstrand Crosslinking in Individual Cells Using the Single Cell Gel Electrophoresis (Comet) Assay .............. 267
   Victoria J. Spanswick, Janet M. Hartley, and John A. Hartley

18 Measurement of DNA Interstrand Crosslinking in Naked DNA Using Gel-Based Methods ....................................................... 283
   Konstantinos Kiakos, Janet M. Hartley, and John A. Hartley

19 An Evaluation Cascade for G-Quadruplex Telomere Targeting Agents in Human Cancer Cells ............................................. 303
   Mekala Gunaratnam and Stephen Neidle

Index ........................................................................................................................................................................... 315
