Contents

Preface ...................................................................................................................................................... ix
Editors ....................................................................................................................................................... xi
Contributors ............................................................................................................................................ xiii

Part I Introduction

1. Introduction to Bioactives in Fruits and Cereals ........................................................................... 3
   Özlem Tokuçoğlu and Clifford Hall III

2. Health Promoting Effects of Cereal and Cereal Products ........................................................... 9
   Joseph M. Awika

Part II Chemistry and Mechanisms of Beneficial Bioactives in Fruits and Cereals

3. Phytochemicals in Cereals, Pseudocereals, and Pulses ................................................................. 21
   Clifford Hall III and Bin Zhao

4. Phenolic and Beneficial Bioactives in Drupe Fruits ........................................................................ 83
   Özlem Tokuçoğlu

5. Bioactive Phytochemicals in Pome Fruits ....................................................................................... 107
   Özlem Tokuçoğlu

6. Phytochemicals in Citrus and Tropical Fruit .................................................................................. 123
   Mehmet Çağlar Tülbek

7. Phytochemical Bioactives in Berries ............................................................................................... 143
   Özlem Tokuçoğlu and Gary Stoner

8. Phenolic Bioactives in Grapes and Grape-Based Products .......................................................... 171
   Violeta Ivanova and Marina Stefova

9. Nut Bioactives: Phytochemicals and Lipid-Based Components of Almonds, Hazelnuts, Peanuts, Pistachios, and Walnuts ................................................................. 185
   Biagio Fallico, Gabriele Ballistreri, Elena Arena, and Özlem Tokuçoğlu

10. Nut Bioactives: Phytochemicals and Lipid-Based Components of Brazil Nuts, Cashews, Macadamias, Pecans, and Pine Nuts ............................................................. 213
    Biagio Fallico, Gabriele Ballistreri, Elena Arena, and Özlem Tokuçoğlu

11. Bioactive Lipids in Cereals and Cereal Products ........................................................................... 229
    Ali A. Moazzami, Anna-Maija Lampi, and Afaf Kamal-Eldin
Part III  Mycotoxic Bioactives of Fruits and Cereals

12. Mycotoxic Bioactives in Cereals and Cereal-Based Foods .................................................... 253
   Anuradha Vegi

13. Control Assessments and Possible Inactivation Mechanisms on Mycotoxin Bioactives of Fruits and Cereals ................................................................. 273
   Faruk T. Bozoğlu and Özlem Tokuşoğlu

14. Control of Mycotoxin Bioactives in Nuts: Farm to Fork ........................................................ 291
   Mohammad Moradi Ghahderijani and Hossein Hokmabadi

Part IV  Functionality, Processing, Characterization, and Applications of Fruit and Cereal Bioactives

15. Isolation Characterization of Bioactive Compounds in Fruits and Cereals ...........................319
   Xiaoke Hu and Zhimin Xu

16. Effect of Bioactive Components on Dough Rheology, Baking, and Extrusion .................337
   Joseph M. Awika

17. Impacts of Food and Microbial Processing on the Bioactive Phenolics of Olive Fruit Products ............................................................................................... 347
   Moktar Hamdi

18. Antioxidant Activity/Capacity Assay Methods Applied to Fruit and Cereals ........................361
   Reşat Apak, Esma Tütem, Mustafa Özyürek, and Kubilay Güçlü

19. Supercritical Fluid Extraction of Bioactive Compounds from Cereals .............................385
   Jose L. Martinez and Deepak Tapriyal

20. Analytical Methodology for Characterization of Grape and Wine Phenolic Bioactives ....409
   Marina Stefova and Violeta Ivanova

21. High Pressure Processing Technology on Bioactives in Fruits and Cereals ......................429
   Özlem Tokuşoğlu and Christopher Doona

Index ............................................................................................................... 443
