GABA<sub>B</sub> RECEPTOR PHARMACOLOGY: A TRIBUTE TO NORMAN BOWERY

Edited by

Thomas P. Blackburn
Translational Pharmacology BioVentures LLC
Hoboken, New Jersey, USA

Serial Editor

S. J. Enna
Department of Molecular and Integrative Physiology, Department of Pharmacology, Toxicology and Therapeutics, University of Kansas Medical Center, Kansas City, Kansas, USA

ADVANCES IN PHARMACOLOGY
VOLUME 58
Contents

Contributors xi
Preface xv

Historical Perspective and Emergence of the GABA_B Receptor
N. G. Bowery

I. Introduction 2
II. GABA_B Receptor Ligands 5
III. Receptor Distribution 6
IV. Allosteric Modulation 7
V. Receptor Function 8
VI. Potential Therapeutic Significance 8
VII. Conclusion 13
References 13

Chemistry and Pharmacology of GABA_B Receptor Ligands
Wolfgang Froestl

I. Introduction 20
II. GABA_B Receptor Agonists 20
III. GABA_B Receptor Partial Agonists 27
Heterodimerization of the GABA_B Receptor—Implications for GPCR Signaling and Drug Discovery

Fiona H. Marshall and Steven M. Foord

I. Introduction 64
II. Identification of the GABA_B Receptors 65
III. The Phylogeny of GABA_B Receptors GABA_B Receptors in Different Species 66
IV. Structure of GABA_B Receptors 70
V. Function of the GABA_B Receptor Heterodimer 73
VI. GABA_B as a Model System for GPCR Dimerization 79
VII. Conclusions 83
References 85

Mechanisms of GABA_B Receptor Exocytosis, Endocytosis, and Degradation

Dietmar Benke

I. Introduction 94
II. Cell-Surface Trafficking of GABA_B Receptors 94
III. Endocytosis of GABA_B Receptors 99
IV. Degradation of GABA_B Receptors 104
V. Conclusions 105
Acknowledgments 107
References 108

Functional Modulation of GABA_B Receptors by Protein Kinases and Receptor Trafficking

Miho Terunuma, Menelas N. Pangalos, and Stephen J. Moss

I. Introduction 114
II. Phosphorylation of GABA_B and Its Functional Modulation 115
III. Phosphorylation-Independent Desensitization of GABA_B Rs by Protein Kinases 117
IV. GABA_B Endocytic Sorting and the Control of Receptor Cell Surface Stability 118
V. GABA<sub>B</sub>R Phosphorylation and Diseases 118
VI. Conclusion 119
Acknowledgments 120
References 120

**GABA<sub>B</sub> Receptor Coupling to G-proteins and Ion Channels**
Claire L. Padgett and Paul A. Slesinger

I. Introduction 124
II. GABA<sub>B</sub> Receptor Structure 125
III. GABA<sub>B</sub> Receptor Protein Expression 128
IV. GABA<sub>B</sub> Receptor Effectors 129
V. Formation of a Macromolecular Signaling Heterocomplex 134
VI. GABA<sub>B</sub> Receptor-Dependent Desensitization 136
VII. Conclusion 139
References 139

**GABA<sub>B</sub> Receptor-Mediated Modulation of Metabotropic Glutamate Signaling and Synaptic Plasticity in Central Neurons**
Toshihide Tabata and Masanobu Kano

I. Introduction 150
II. Synaptic Organization Around Cerebellar Purkinje Cells 151
III. Possible Ligands for GABA<sub>B</sub>R in Cerebellar Purkinje Cells 152
IV. Functions of GABA<sub>B</sub>R Near the Excitatory Synapses 154
V. Possible Physiological Significance of GABA<sub>B</sub>R-Mediated Effects on mGluR1 Signaling 162
VI. Conclusion 167
Acknowledgments 168
References 169

**GABA Transporter GAT1: A Crucial Determinant of GABA<sub>B</sub> Receptor Activation in Cortical Circuits?**
Guillermo Gonzalez-Burgos

I. Introduction 176
II. The Plasma Membrane GABA Transporter 1 176
III. Cellular and Subcellular Localization of GABA<sub>B</sub>Rs and GAT1 180
IV. GABA<sub>B</sub>R Activation by GABA Released from Endogenous Sources 182
The Roles of \( \text{GABA}_B \) Receptors in Cortical Network Activity

Michael M. Kohl and Ole Paulsen

I. Introduction 206
II. \( \text{GABA}_B \) Receptors in Cortical Microcircuits 207
III. Control of Network Activity by \( \text{GABA}_B \) Receptors 210
IV. Conclusion 221
References 222

\( \text{GABA}_B \) Receptors: Physiological Functions and Mechanisms of Diversity

Audrée Pinard, Riad Seddik, and Bernhard Betder

I. Introduction 232
II. Physiological Functions of \( \text{GABA}_B \) Receptors 233
III. Heterogeneity of Native \( \text{GABA}_B \) Responses 234
IV. Functions of the Cloned \( \text{GABA}_B \) Receptor Subtypes 238
V. Additional Mechanisms of Diversity 246
VI. Conclusions 248
Acknowledgments 249
References 249

Role of \( \text{GABA}_B \) Receptors in Autonomic Control of Systemic Blood Pressure

De-Pei Li and Hui-Lin Pan

I. Introduction 258
II. Overview of Autonomic Nervous System 260
III. Distribution of \( \text{GABA}_B \) Receptors in CNS Autonomic Centers 261
IV. \( \text{GABA}_B \) Receptor Function in the RVLM 261
V. \( \text{GABA}_B \) Function in the NTS 263
VI. \( \text{GABA}_B \) Receptor Function in the Hypothalamus 267
VII. Conclusion 274
Acknowledgments 275
References 276
GABA_B Receptor Agonism as a Novel Therapeutic Modality in the Treatment of Gastroesophageal Reflux Disease
Anders Lehmann, Jørgen M. Jensen, and Guy E. Boeckxstaens

I. Introduction 288
II. Underlying Pathophysiological Mechanisms of GERD 289
III. The GABA_B Receptor 290
IV. GABA_B Receptor Agonists as Reflux Inhibitors 295
V. Conclusions 306
Acknowledgments 307
References 307

GABA_B Receptors in Reward Processes
Styliani Vlachou and Athina Markou

I. Introduction 316
II. GABA_B Receptor Agonists, GABA_B Receptor Positive Modulators, and Reward: Effects on the Rewarding Properties of Food, Intracranial Self-Stimulation, and Drugs of Abuse 336
III. GABA_B Receptor Agonists versus GABA_B Receptor Positive Modulators 359
IV. Conclusion 360
Acknowledgments 360
References 362

GABA_B Receptors in Addiction and Its Treatment
Robin J. Tyacke, Anne Lingford-Hughes, Laurence J. Reed, and David J. Nutt

I. Introduction 374
II. Alcohol Dependence 375
III. Cocaine 379
IV. Nicotine 384
V. Opiates 385
VI. Methamphetamine 387
VII. GHB 387
VIII. Discussion 388
IX. Conclusion 392
References 392
GABA<sub>B</sub>–GIRK2-Mediated Signaling in Down Syndrome

Nathan P. Cramer, Tyler K. Best, Marcus Stoffel, Richard J. Siarey, and Zygmunt Galiczki

I. Introduction 398
II. Mouse Models of DS 399
III. Evidence for Cognitive Impairment in Mouse Models of DS 400
IV. Hippocampal Deficit in DS and in DS Mouse Models 402
V. A Role of GABA<sub>B</sub>–GIRK Coupling in Hippocampal Overinhibition in DS 404
VI. Potential Evidence for GABA<sub>B</sub>-Mediated Developmental and Morphological Changes in DS 415
VII. Role of GIRK in DS Pain and Cerebellar Phenotypes 417
VIII. Conclusions 418
Acknowledgments 419
References 419

GABA<sub>B</sub> Receptors and Depression: Current Status

John F. Cryan and David A. Slattery

I. Introduction 428
II. GABA<sub>B</sub> Receptors 429
III. Role of GABA<sub>B</sub> Receptors in Animal Models of Antidepressant Action 430
IV. GABA<sub>B</sub> Receptors and Cognition 435
V. Chronic Antidepressants and GABA<sub>B</sub> Receptor Function 437
VI. GABA<sub>B</sub> Receptors and the Reward System 437
VII. GABA<sub>B</sub>–5-HT Interactions 438
VIII. Clinical Evidence for a Role of GABA<sub>B</sub> Receptors in Depression 439
IX. Conclusion 441
Acknowledgments 441
References 442

GABA-B Receptors in Drosophila

Hari Manev and Svetlana Dzitoyeva

I. Introduction 454
II. Drosophila Model in Pharmacology 454
III. Drosophila GABA System 456
IV. Drosophila GABA-B Receptors 458
V. Conclusion 462
References 462
