Pharmaceutical Powder Compaction Technology

Second Edition

Metin Çelik PhD
President, Pharmaceutical Technologies International, Inc.
Belle Mead, New Jersey, U.S.A.

Research Professor of Pharmaceutical Technology
College of Pharmacy, Near East University
Lefkosia, Turkish Republic of Northern Cyprus
Contributors viii
Preface to the first edition x
Preface to the second edition xii

SECTION I: THEORY OF COMPACTION
1. Intermolecular bonding forces: Where materials and process come together 1
   Graham Buckton

SECTION II: COMPACTION DATA ANALYSIS TECHNIQUES
2. Viscoelastic models 9
   Susan K. Lum

3. Application of percolation theory and fractal geometry to tablet compaction 28
   Hans Leuenberger, Maxim Puchkov, Ruth Leu-Marseiler, Jean-Daniel Bonny, and
   Michael N. Leuenberger

4. Postcompaction data analysis techniques 58
   Gary Bubb

SECTION III: INSTRUMENTATION AND EQUIPMENT IN COMPACTION
5. Tablet press instrumentation in the research and development environment 74
   Gary Bubb

6. Advanced compaction research equipment: Compaction simulators 99
   Colleen E. Ruegger and Metin Çelik

7. Compactibility functionality test 129
   Eşay Okutgen

SECTION IV: ROLE OF COMPACTION IN THE FORMULATION AND PROCESS
DEVELOPMENT OF TABLETTING
8. Compaction properties of directly compressible materials 143
   Gerad K. Bolhuis and Hans de Waard

9. Lubrication issues in direct compaction 205
   Gerad K. Bolhuis and Arne W. Hölzer

10. Crystal engineering and particle design for the powder compaction process 235
    Anant Paradkar and Peter York
11. Compaction of combination products 253
   Carl T. Allenspach and Erika A. Zannou

12. Quality by design and compression 280
   Chris Balducci, Rosario LoBrutto, Alan Royce, James Cheney, Dong Xiang,
   Olivia Darmuzey, and Hedinn Valthorsson

13. Expert systems and their use in pharmaceutical applications 303
   Metin Çelik

Index 331
