Preface xi

Acknowledgements xv

I. PHARMACOLOGICAL SCIENCE AND THEORY

I Structure-activity relationships: the early mirage 3–10
Pharmacy in History 13.1, 1971

II Origins of the receptor theory of drug action 199–220
(with Ronald Jasensky).
Bulletin of the History of Medicine 48.2, 1974

III The controversy over structure-activity relationships 54–63
in the early twentieth century
Pharmacy in History 16.2, 1974

IV The evolution of stereochemical concepts in 143–158
pharmacology
van't Hoff-LeBel Centennial, ed. O.B. Ramsay (American
Chemical Society Symposium Series 12). Washington, D.C.,
1975

V Arthur Cushny, optical isomerism and the mechanism 145–165
of drug action
Journal of the History of Biology 8.2, 1975

VI Carl Voegtlin and the “arsenic receptor” in 151–171
chemotherapy
Journal of the History of Medicine and Allied Sciences
32.2, 1977

VII The theoretical basis of Paul Ehrlich’s chemotherapy 19–43
Journal of the History of Medicine and Allied Sciences
36.1, 1981
VIII The development of receptor theory

2. DISCIPLINE OF PHARMACOLOGY

IX John J. Abel and the early development of pharmacology at the Johns Hopkins University
Bulletin of the History of Medicine 56.4, 1982

X Development of pharmacology in American schools of pharmacy
(with John Swann)
Pharmacy in History 25.3, 1983

XI The beginnings of pharmacology in the Federal government
Pharmacy in History 30.4, 1988

XII The “preposterous provision”: The American Society for Pharmacology and Experimental Therapeutics’ ban on industrial pharmacologists, 1908–1941

3. DRUG THERAPY

XIII The search for the active oxytocic principal of ergot: laboratory science and clinical medicine in conflict

XIV The introduction of antibiotics into therapeutics
