MEDICINAL PLANTS IN AUSTRALIA
Volume 2  Gums, Resins, Tannin and Essential Oils

Cheryll J. Williams
Contents

Foreword 7
Introduction 8
Acknowledgments 12

1 Oleum Eucalypti 14
Discovery of the Native Peppermint 15
A Diversity of Eucalypt Peppermints 17
Therapeutic Mints 20
A Cure for Malaria? 21
Eucalypt Oil Chemistry 22
Commercial Considerations 24
The Australian Blue Gum 26
International Fame and Antimicrobial Studies 28
A Complex Chemistry 33
Insights from Modern Research 35
Future Markets 39
A Unique Diet 42
   Table 1.1 Summary of the main chemical
   constituents found in Eucalypt species 44

2 Kino: The Natural Panacea 51
The Eucalypt: A Versatile Medicine 52
The Kino Cure 54
What is Kino? 58
Resin and Oleoresin Classifications 63
   Table 2.1 Resin classification summary 63
   Table 2.2 Summary of the major plant-derived
   kino, resin, and oleoresin resources referred to in
   the medicinal literature 63
   A Medicinal Astringent 67
A New Pharmacology: Lessons from Dragon’s Blood
Resins 79

3 Resinous Resources 83
   Angophora Kino 84
   Balogobia: Bloodwood Kino 87
   Ceratopetalum: Christmas Trees and Coachwoods 88
   Beefwood and Grevillea Resins 94
   Grevillea Hazards 96
   Elemi: Canarium Resins 99
   Turpentine Oleoresin 100
   Fragrant Canarium Elemi Oleoresins 103
   Syncarpia Turpentine 107

4 The Native Pines: Copal, Dammar and Sandarac 110
Ancient Pines: Tales of Destruction and Exploitation 112
Resins of the Araucariaceae: Copal and Dammar 114
Resin acids 118
Medicinal Araucaria 120
   Table 4.1 Araucariaceae essential oils 122
Native Pine Timbers 126
Famous Bunya Pine Feasts 129
Australian Sandarac 130
Medicinal Callitris Pines 135
   Table 4.2 Constituents found in Callitris essential
   oils: properties, species and oil yield 138
   Table 4.3 Other Compounds of Interest Present in
   Callitris essential oils 138
Anticancer Studies 140
An Underestimated Environmental Role 141

5 The Myrtaceae: Hidden Chemical Treasure 145
Natural Insect Repellents: The Lemon-scented Gum 145
Battling the Mosquito, Naturally 150
Flavonoids: Rutin Resources 154
Innovative Chemical Discoveries 158
Triterpene Discoveries 159
Anticancer and Antiviral Studies 160
Remedies for the Heart 162
FPCs: A Remarkable New Class of Compounds 163
Searching for New Drugs 164
Innovative Investigations 165
Intriguing Essential Oil Studies 167
Table 5.1 Additional compounds of interest from the genus *Eucalyptus* 169
Wildlife Food Preferences 170
Table 5.2 *Eucalyptus*-based compounds that can be utilised by the flavouring and perfumery industry 172

6 Tannin and Trees: Native Floral Resources 177
The Search for Native ‘Tan Barks’ 178
Exploitation Versus Conservation 179
Wattle and Mallett Barks 181
Lillypilly Tans 184
Tannin Chemistry 186
Polyphenolics: An Era of Discovery 187
Table 6.1 Tannin categories 188
Terminalia Tannins 192
Terminalia: Investigations of a Traditional Medicine 195
Table 6.2 Medicinal uses of the Beach Almond, *Terminalia catappa* 196
Table 6.3 Traditional Medicinal uses of *Terminalia* species 200

7 Wattle: Tales of an Australian Icon 202
The Genus *Acacia* 202
Table 7.1 *Acacia* species now classified as *Acaciella, Vachellia* and *Senegalia* 204
Australian Wattle: A National Emblem 208
*Acacia*: A Useful Crop 210
The Perfumed Wattle 215
Wattleseed Harvests 216
The *Acacia* as a Weed 221
Table 7.2 List of vulnerable, endangered, critically endangered and extinct native Australian *Acacia* 223

8 The Medicinal Mulga 227
Wattle: A Major Medicinal Tannin 228
*Acacia* Astringents 229
Table 8.1 Medicinal uses of Australian *Acacia* 231
Chemical Revelations 234
Medicinal Gums and Mucilages 237
Table 8.2 Natural gums: official resources, allied or alternative gum resources 238

Bush Tucker Gums 243
*Terminalia* and Leopard Tree Gums 244
Gums from Albizia 247

9 Tea-trees: Modern Investigations of an Ancient Remedy 251
Tea-tree Tales 252
Manuka Chemotypes 254
A New Era of Research 256
The Scent of Lemon 258
Table 9.1 Common chemical constituents found in oils from the *Genus Leptospermum* 259
Pesticides and Insecticides 260
The Genus *Baeckea* 262
Table 9.2 Essential oil components of *Baeckea, Kunzea* and *Leptospermum* species of medicinal or aromatic interest 267
The Australian Tea-tree 269
A Marketing Success 270
Research Matters 272

10 Melaleuca: The Prosaic Paperbark 280
An Ancient History 281
A Complex Classification 282
Table 10.1 Names of some common medicinal *Melaleuca* Tea-trees (including synonyms, varieties or subspecies) 284
A Preference for Wetlands 285
Paperbark and Swamp Orchids 289
The Medicinal *Melaleuca* 292
*Asteromyrtus*: The Liniment Tree 294
Table 10.2 Medicinal uses of native ‘Paperbarks’ 296
Unique Essential Oils 300
Medicinal Fragrance Oils 306
Modern Investigations 309
Table 10.3 Variations in oil composition: *Melaleuca* species with different essential oil chemotypes, varieties or subspecies 312
Table 10.4 *Melaleuca* species of medicinal interest due to 1,8-cineole content 314
Table 10.5 Essential oil components: native *Melaleuca* species with commercial or medicinal potential 315
