## Contents

Preface ............................................................... v
Contributors .............................................................. ix

**PART I  REVIEWS**

1 Overview of Chemical Genomics and Proteomics .................. 3
   *Edward D. Zanders*

2 Exploring Chemical Space: Recent Advances in Chemistry ........ 11
   *Yung-Sing Wong*

3 In Silico Design of Small Molecules .......................... 25
   *Paul H. Bernardo and Joo Chuan Tong*

4 Surface Plasmon Resonance for Proteomics .................. 33
   *Nico J. de Mol*

**PART II  PROTOCOLS**

5 Biomimetic Affinity Ligands for Immunoglobulins Based on the Multicomponent Ugi Reaction .................. 57
   *Graziella El Khoury, Laura A. Rowe, and Christopher R. Lowe*

6 Preparation of Photo-Cross-Linked Small Molecule Affinity Matrices for Affinity Selection of Protein Targets for Biologically Active Small Molecules ........ 75
   *Hiroshi Takayama, Takashi Moriya, and Naoki Kanoh*

7 Profiling Cellular Myristoylation and Palmitoylation Using ω-Alkynyl Fatty Acids ........ 85
   *Rami N. Hannoush*

8 Fluorescence Labels in Kinases: A High-Throughput Kinase Binding Assay for the Identification of DFG-Out Binding Ligands .................. 95
   *Jeffrey R. Simard and Daniel Rahb*

9 Electrochemical Aptamer Sensor for Small Molecule Assays ........ 119
   *Xin Liu, Wang Li, Xiaohong Xu, Jiang Zhou, and Zhou Nie*

10 Miniaturized, Microarray-Based Assays for Chemical Proteomic Studies of Protein Function .................. 133
    *Jonathan M. Blackburn, Aubrey Shoko, and Natasha Beeton-Kempen*

11 Glycan Microarrays ............................................. 163
    *Xuezheng Song, Jamie Heimburg-Molinaro, David F. Smith, and Richard D. Cummings*

12 Resolving Bottlenecks for Recombinant Protein Expression in *E. coli* ........ 173
    *Yoav Peleg and Tamar Unger*
13 Recombinant Protein Expression in the Baculovirus-Infected Insect Cell System . . . 187
   *Tamar Unger and Yoav Peleg*

14 Systems for the Cell-Free Synthesis of Proteins ............................................. 201
   *Lei Kai, Christian Roos, Stefan Haberstock, Davide Proverbio, Yi Ma,
     Friederike Junge, Mikhail Karbyshev, Volker Dötsch, and Frank Bernhard*

15 Protein Identification by MALDI-TOF Mass Spectrometry ................................. 227
   *Judith Webster and David Oxley*

*Index* .................................................................................................................. 241
