Editor

Red Beet Biotechnology

Food and Pharmaceutical Applications
## Contents

1. **Red Beet: An Overview** ................................................................. 1  
   Bhagyalakshmi Neelwarne and Sowbhagya B. Halagur

2. **Biosynthesis and Regulation of Betalains in Red Beet** .......... 45  
   Hiroshi Sekiguchi, Yoshihiro Ozeki, and Nobuhiro Sasaki

3. **Stability of Betalain Pigments of Red Beet** .......................... 55  
   Shivapriya Manchali, Kotamballi N. Chidambara Murthy,  
   Shruthi Nagaraju, and Bhagyalakshmi Neelwarne

4. **Red Beet as a Model System for Studying Vacuolar  
   Transport of Primary and Secondary Metabolites** ..................... 75  
   Nandini P. Shetty, Kirsten Jørgensen,  
   and Hans J. Lyngs Jørgensen

5. **Plant Respiratory Metabolism: A Special Focus  
   on the Physiology of Beetroot (Beta Vulgaris L.)  
   Mitochondria** ............................................................................. 91  
   Kapuganti J. Gupta and Hardy Rolletschek

6. **Liperoxyl Radical Scavenging and Antioxidative  
   Effects of Red Beet Pigments** ..................................................... 105  
   Maria A. Livrea and Luisa Tesoriere

7. **Anticancer Effects of Red Beet Pigments** .............................. 125  
   Govind J. Kapadia and G. Subba Rao

8. **Anti-diabetic Potentials of Red Beet Pigments  
   and Other Constituents** ............................................................. 155  
   Kotamballi N. Chidambara Murthy and Shivapriya Manchali

9. **Cell and Tissue Culture Studies in Beta vulgaris L.** .............. 175  
   Bhagyalakshmi Neelwarne
10 Red Beet Hairy Root Cultures ......................................................... 199
Bhagyalakshmi Neelwarne

11 Bioreactors for the Cultivation of Red Beet Hairy Roots ................. 251
Vasil G. Georgiev, Thomas Bley, and Atanas I. Pavlov

12 Peroxidases and Other Enzymes from Red Beet Hairy Roots.......... 283
Bhagyalakshmi Neelwarne and Thimmaraju Rudrappa

13 Downstream Processing of Red Beet Hairy Roots ......................... 335
Bhagyalakshmi Neelwarne and Thimmaraju Rudrappa

14 Extraction of Red Beet Pigments .................................................. 373
Brijesh K. Tiwari and Patrick J. Cullen

15 Aqueous Two-Phase Extraction for the Recovery of Beet Pigments and Enzymes ................................................................. 393
M.C. Madhusudhan and K.S.M.S. Raghavarao

16 Techno-commercial Aspects of Relevance to Red Beet ................. 409
Bhagyalakshmi Neelwarne

Index ............................................................................................... 427
