Marine Pharmacognosy
Trends and Applications

Edited by Se-Kwon Kim
Contents

Preface .......................................................................................................................... ix
Editor .......................................................................................................................... xi
Contributors ............................................................................................................... xiii

Chapter 1 Past, Present, and Future of Marine Pharmacognosy ......................... 1
   Se-Kwon Kim

Chapter 2 Antidiabetic Compounds from Marine Organisms and Their Properties .......... 7
   Miyuki Shirosaki and Tomoyuki Koyama

Chapter 3 Bioactive Compounds from Okinawan Marine Cyanobacteria .................. 21
   Toshiaki Teruya, Osamu Ohno, and Kiyotake Suenaga

Chapter 4 Bioactive Secondary Metabolites from Marine-Derived Fungi .................... 27
   Sherif S. Ebada and Peter Proksch

Chapter 5 Cytotoxic Briarane-Type Diterpenoids .................................................... 53
   Yonghong Liu, Xiuping Lin, Bin Yang, Juan Liu, Xuefeng Zhou, and Yan Peng

Chapter 6 Pharmacocanalytical Procedures for Chondroitin Present in Raw Materials and Biological Fluids ............................................................ 65
   Bradley Wright and Brian Lockwood

Chapter 7 Marine Natural Products Targeting Nuclear Factor κB ............................... 85
   U. Sebnem Harput

Chapter 8 The Immunomodulatory Effect of Marine Algae on Allergic Response .......... 101
   Se-Kwon Kim, Thanh-Sang Vo, and Dai-Hung Ngo

Chapter 9 Pharmacological Effects of Marine-Derived Bioactive Peptides ................ 107
   Se-Kwon Kim, Dai-Hung Ngo, Thanh-Sang Vo, and Dai-Nghiep Ngo

Chapter 10 Sea Cucumber Saponins: Realization of Their Anticancer Effects ............. 119
   Se-Kwon Kim, S. W. A. Himaya, and Kyong-Hwa Kang
Chapter 11 Phlorotannins as Potential Antibacterial Agents from Marine Brown Algae ........ 129
Sung-Hwan Eom and Se-Kwon Kim

Chapter 12 Bioactive Molecules from Symbiotic Marine Dinoflagellates ......................... 137
Masaki Kita, Toshiyasu Inuzuka, Norihito Maru, and Daisuke Uemura

Chapter 13 Pharmacological Potential of Phlorotannins from Marine Brown Algae .......... 153
BoMi Ryu and Se-Kwon Kim

Chapter 14 Microalgae as Sources of Biomaterials and Pharmaceuticals ....................... 161
Kyong-Hwa Kang and Se-Kwon Kim

Chapter 15 Marine Ascidians: A Promising Resource for Bioactive Compounds ............. 173
H. Abdul Jaffar Ali and M. Tamilselvi

Chapter 16 Chitosan and Its Derivatives for Treatment of Diabetic Complications ............. 191
Se-Kwon Kim and Fatih Karadeniz

Chapter 17 Alkaloids as Pharmaceutical Agents from Marine Fungi ............................... 201
Se-Kwon Kim and Yong-Xin Li

Chapter 18 Pharmacological Effects and Prospects of Marine Algae in Promoting
Women’s Health and Longevity ................................................................................. 209
Se-Kwon Kim, Ratih Pangestuti, and A. B. Susanto

Chapter 19 Marine Sponge-Associated Microbes: A Source of Biologically
Active Metabolites ..................................................................................................... 219
Se-Kwon Kim, Pradeep Dewapriya, and Yong-Xin Li

Chapter 20 Marine Actinobacteria: A Potential Source of Antifungal Compounds .......... 231
R. Vijayakumar, A. Panneerselvam, and N. Thajuddin

Chapter 21 Marine Drugs: Treatment for Osteoporosis and Related Bone Diseases .......... 253
Jayachandran Venkatesan and Se-Kwon Kim

Chapter 22 Bioactive Compounds from Marine Sources for Gastrointestinal
Cancer Treatment .................................................................................................... 265
Se-Kwon Kim and Mustafa Zafer Karagozlu

Chapter 23 Marine Algae: Pharmacological Values and Anti-Inflammatory Effects ............ 273
Se-Kwon Kim, Thanh-Sang Vo, and Dai-Hung Ngo
Chapter 24  Marine Microbial Pharmacognosy: Aspects and Prospects ........................................ 281
           Se-Kwon Kim and Ira Bhatnagar

Chapter 25  Pharmacognosy Prospects of Marine Algal Derivatives in the
            Management of Skin Inflammation ................................................................. 303
           Se-Kwon Kim and Noel Vinay Thomas

Chapter 26  Antidiabetic Effect of Dieckol, a Marine Polyphenol, and Its
            Mechanisms of Blood Glucose Regulation ....................................................... 313
           Seung-Hong Lee and You-Jin Jeon

Chapter 27  Allergy and Its Remedies from Marine Sources........................................... 325
           Ramjee Pallela, Ira Bhatnagar, Pranjal Chandra, and Se-Kwon Kim

Chapter 28  Anticancer Mechanisms of Actin Depolymerization Agent Pectenotoxin-2........ 335
           Gi-Young Kim and Yung Hyun Choi

Chapter 29  Marine Mucin: A Prospective Cosmetic and Pharmaceutical ......................... 347
           Se-Kwon Kim, Fatih Karadeniz, and Mustafa Zafer Karagozlu

Chapter 30  Neuropharmacological Properties of Marine Plants....................................... 355
           Suengmok Cho and Se-Kwon Kim

Chapter 31  Antiparasitic Secondary Metabolites from Marine Actinobacteria..................... 373
           D. Dhanasekaran, N. Thajuddin, and A. Panneerselvam

Chapter 32  Pharmaceutical Aspect of Metabolites from Marine Algae on Skin Health .......... 385
           Jung-Ae Kim and Se-Kwon Kim

Chapter 33  Clues for Cancer from Ocean-Derived Molecules and Role of In Silico
            Techniques in Anticancer Drug Discovery ......................................................... 393
           G. Dicky John Davis, Veeresh Kumar Sali, and Hannah R. Vasanthi

Chapter 34  Anticancer Compounds from Marine Microorganisms...................................... 409
           Hee Jae Shin

Index ............................................................................................................................. 425
