Preface—Volume 2 xxix

PART III General Principles of ADME. Drug Transporters and Other Mechanisms of Transport 1

1 ADME Profiling in Drug Discovery and Development: An Overview 3
   Tonika Bohnert and Chandra Prakash

2 Anatomical and Physiological Parameters that Influence Gastrointestinal Absorption 45
   John M. DeSesso, Catherine F. Jacobson, and Amy Lavin Williams

3 Oral Absorption: from Physiology to Regulatory 81
   Fran Berlioz-Seux

4 General Principles of Drug Distribution 107
   Gillian C. Wallace, Diane B. Ramsden, and M. Helen Grant

5 ABC Drug Transporters and Their Impact on Drug Disposition/Drug Sensitivity and Resistance 155
   Steven J. Wolf and Caroline G. Lee

6 Solute Carrier (SLC) Family Transporters 195
   Jasminder Sahi, Yurong Lai, and Caroline Lee

7 Mechanisms of Drug Metabolism 247
   Robert S. Foti, Dan A. Rock, Larry C. Wienkers, and Jan L. Wahlstrom

8 Extrahepatic Drug-Metabolizing Enzymes and Their Significance 315
   Shalu Jhajra, Ninad Ramesh Varkhede, Deepak Suresh Ahire, Bukke Vidyasagar Naik, Bhagwat Prasad, Jyoti Paliwal, and Saranjit Singh
20 ADME of Anticancer Drugs
Hiroshi Yamazaki

21 ADME of Cardiovascular Drugs
Hong Liu and Richard Voorman

22 Disposition of Biological Therapeutics: Monoclonal Antibodies, Proteins, and Peptides
Dan A. Rock, Larry C. Wienkers, and Marc W. Retter

23 ADME of Natural Toxins
Vanessa González-Pérez and David J. Kroll

24 Influence of Changes in Physiology, Transporters, and Enzyme Expression on Disposition and Metabolism of Drugs during Pregnancy and Clinical Implications
Shalu Jhajra, Saranjit Singh, Karsten A. Holm, Ali Said Faqi, and Jasminder Sahi
