

# Table of contents

<b>1 INTRODUCTION .....</b>	<b>11</b>
<b>2 FUNDAMENTAL CONCEPTS AND THEORIES – DEVELOPMENT OF A THEORETICAL FRAMEWORK.....</b>	<b>19</b>
<b>2.1 Economic valuation of nature and natural resources .....</b>	<b>19</b>
2.1.1 Core concepts of welfare economics.....	19
2.1.2 The valuation of environmental goods: Stated preferences.....	23
2.1.3 The contingent valuation method .....	30
2.1.4 Construction or retrieval of preferences? .....	38
2.1.5 Validity of the CVM: the validity concept – previous findings.....	40
<b>2.2 Information.....</b>	<b>48</b>
2.2.1 Information – a working definition .....	48
2.2.2 Information imparting.....	49
2.2.3 Information processing.....	50
<b>2.3 Interdisciplinary approaches to environmental valuation.....</b>	<b>51</b>
<b>2.4 Theory of Planned Behaviour: a common framework .....</b>	<b>56</b>
2.4.1 Theory of Reasoned Action – Theory of Planned Behaviour.....	57
2.4.2 A common theoretical framework to analyse informational impacts .....	62
<b>3 PREVIOUS FINDINGS: THE IMPACTS OF INFORMATION ON BEHAVIOURAL INTENTIONS AND ATTITUDES.....</b>	<b>69</b>
<b>3.1 Perspective: Environmental Economics.....</b>	<b>69</b>
3.1.1 The influence of information on WTP: The environmental economic perspective .....	69
3.1.2 Impacts of the amount and content of the information imparted .....	71
3.1.3 Particular effects: Information and the embedding effect .....	75
3.1.4 Particular effects: Cost-related information.....	77
3.1.5 The mental quality of information .....	79
3.1.6 Prior knowledge as a moderator of information impacts .....	80
3.1.7 Sociopsychological approaches.....	81
3.1.8 Conclusion: Lessons learned from empirical evidence on the impacts of information on WTP .....	84
<b>3.2 Perspective: Social Psychology .....</b>	<b>89</b>

3.2.1 The relevance of social psychological theories.....	89
3.2.2 Theories of attitude change and the role of information .....	90
<b>3.3 Perspective: Didactics of Biology.....</b>	<b>95</b>
3.3.1 The relevance of research in biology education.....	95
3.3.2 Empirical findings .....	98
<b>3.4 Perspective: Environmental Psychology .....</b>	<b>106</b>
3.4.1 The relevance of environmental psychological concepts .....	106
3.4.2 The environmental awareness concept and the role of information.....	106
<b>3.5 Perspective: Consumer Psychology .....</b>	<b>109</b>
3.5.1 The relevance of consumer psychological concepts .....	109
3.5.2 Information imparting in the market place: Advertising.....	111
3.5.3 Information processing in the market place.....	114
3.5.4 The Weinberg model of consumer decision types .....	121
3.5.5 Conclusions for the CVM.....	128
<b>3.6 Conclusion and discussion.....</b>	<b>129</b>
<b>4 EMPIRICAL STUDY: INFORMATION PROCESSING AND DECISION BEHAVIOUR IN CONTINGENT VALUATION SURVEYS – METHODOLOGY.....</b>	<b>133</b>
<b>4.1 Core issues .....</b>	<b>133</b>
4.1.1 Theoretical framework: Premises .....	133
4.1.2 Study objectives .....	138
<b>4.2 The evaluated goods: environmental services of agriculture .....</b>	<b>138</b>
4.2.1 Payments for environmental services of agriculture: a pilot scheme in central Germany .....	138
4.2.2 The choice of hedges as the valuation object.....	141
4.2.3 Features of the contingent valuation study in the Northeim project.....	146
<b>4.3 Study design: concepts, constructs, structure.....</b>	<b>149</b>
4.3.1 Hypotheses.....	149
4.3.2 The target population and sample selection .....	153
4.3.3 Hypothetical constructs, latent variables and their indicators.....	154
4.3.4 Determinants of decision behaviour – decision behaviour as a determinant	158
4.3.5 Direct determinants of WTP.....	161
4.3.6 Survey design .....	163

<b>4.4 Questionnaire design .....</b>	<b>169</b>
4.4.1 The valuation scenario.....	169
4.4.2 Selection and sequence of items .....	174
4.4.3 Interviewer instruction .....	186
<b>5 RESULTS.....</b>	<b>189</b>
<b>5.0 Introduction.....</b>	<b>189</b>
<b>5.1 Sample characteristics .....</b>	<b>189</b>
5.1.1 Representativeness .....	189
5.1.2 Results and properties of single items and item scales .....	191
<b>5.2 Information processing.....</b>	<b>193</b>
5.2.1 Basic information processing parameters .....	193
5.2.2 Interactions of knowledge, information processing and WTP .....	195
5.2.3 Types of information required by the respondents.....	197
<b>5.3 Willingness to pay for farm hedges in the Northeim district.....</b>	<b>198</b>
5.3.1 Acceptance and rejection of payments.....	199
5.3.2 WTP amounts.....	200
5.3.3 The aggregation of willingness to pay at the district level.....	202
<b>5.4 Classification of decision behaviour .....</b>	<b>203</b>
5.4.1 Cluster analysis – preparatory steps .....	203
5.4.2 Main cluster analysis – results .....	206
5.4.3 Contingencies between cluster affiliation and other variables.....	209
<b>5.5 Determinant variables of decision behaviour .....</b>	<b>211</b>
<b>5.6 Explanation of payment acceptance.....</b>	<b>215</b>
5.6.1 Explanation of payment acceptance: a logistic regression model.....	215
5.6.2 Explanation of payment acceptance according to cluster affiliation.....	220
<b>5.7 Explanation of WTP amounts .....</b>	<b>223</b>
5.7.1 Explanation of WTP amounts: a linear regression model .....	223
5.7.2 Explanation of WTP amounts according to cluster affiliation.....	225
5.7.3 Correlations of differences between WTP amounts and other parameters.....	225
<b>6 INTERPRETATION.....</b>	<b>227</b>
<b>6.1 Public demand for farm hedges in the Northeim district .....</b>	<b>227</b>
6.1.1 Aggregated WTP – mean or median?.....	227

6.1.2 A comparison of WTP amounts of different CV surveys .....	230
<b>6.2 Decision behaviour typology – differentiation of two limited classes .....</b>	<b>233</b>
6.2.1 The modification of the Weinberg model .....	233
6.2.2 Extensive decisions in contingent valuation surveys .....	234
6.2.3 Limited decisions in contingent valuation surveys .....	235
6.2.4 Impulsive decisions in contingent valuation surveys .....	238
6.2.5 Routine behaviour in contingent valuation surveys .....	243
<b>6.3 The impact of individual and situational parameters on the choice of decision strategies .....</b>	<b>246</b>
6.3.1 Determinants of decision behaviour.....	246
6.3.2 The contribution of these findings to welfare economics .....	250
<b>6.4 Regression models explaining WTP – discussion of valuation tasks .....</b>	<b>251</b>
6.4.1 Explanatory variables in the linear and logistic regression models.....	251
6.4.2 A comparison of valuation tasks and their respective explanation models .....	253
6.4.3 The contribution of the regression model to welfare economics .....	256
<b>6.5 Validity measurements .....</b>	<b>258</b>
6.5.1 Cognitively controlled decisions.....	258
6.5.2 Compliance of WTP statements to attitude measurements.....	260
6.5.3 Contradictory verbal and monetary expressions of preferences .....	263
6.5.4 Decision behaviour in the market place and in survey settings .....	264
6.5.5 Conclusions: The validity of the CV results .....	267
<b>6.6 Transferability of the survey results .....</b>	<b>271</b>
6.6.1 Transferability of willingness to pay values .....	271
6.6.2 Transferability of the classification results.....	272
6.6.3 Transferability of the impacts of decision behaviour on stated WTP .....	272
6.6.4 Transferability of the approach to decision behaviour classification.....	273
<b>6.7 Participation of the local populace in agri-environmental decision making ..</b>	<b>275</b>
<b>7 SUMMARY AND CONCLUSIONS .....</b>	<b>281</b>
<b>REFERENCES.....</b>	<b>291</b>
<b>APPENDIX.....</b>	<b>311</b>

## Appendix

Glossary.....	312
Questionnaire .....	314
Table A: Assessment methods and roles of variables in the survey.....	321
Table B: Properties and results of the pre-test sample (n=41).....	322
Table C: Attitude index: Attitude towards farm hedges and payments.....	323
Table D: Main survey sample properties.....	324
Table E: Properties and results of the main survey sample (n=299).....	325
Table F: Extracted indicators of spontaneous behavioural responses.....	326
Tables G-L: Results of the multinomial logistic regression .....	327
Tables M-O: Results of the linear regression analysis.....	332
Tables P-Q: Results of the linear regression analysis, split up.....	333
Boxplot figures A-D: cluster affiliation vs. indicator variables.....	334
Catalogue of potential questions – standardised answers.....	336
Curriculum vitae.....	344
Acknowledgements.....	345
