<i>Preface</i>	xvi
Introduction	1
Chapter 1 The Human Income-Expenditure Balance	5
1. The Human Income-Expenditure Balance in a Non-Monetary (Robinson Crusoe) Economy	6
1.1. Framework of Analysis	6
1.2. Diminishing Utility and Demand for Consumption Goods	6
1.3. Allocation of Time and the Supply of Consumption Goods	8
1.4. The Human Income-Expenditure Balance (Basic Human Accounting)	9
1.5. The Emergence of Tools, Deferred Consumption, and Basic Human Accounting	11
1.6. Pure Investment and Expansion of Demand and Production	14
2. The Human Income-Expenditure Balance in a Monetary Economy (a Household/Firm Model)	16
2.1. The Role of Money in an Economy with Households and Firms	16
2.2. The Income-Expenditure Balance for Households and Firms Where Households Own the Stock of Consumption Goods	17
2.3. The Income-Expenditure Balance for Households and Firms Where Some Consumption Goods Are Diverted for “Pure” Investment	22
2.4. The Income-Expenditure Balance for an Economy Including a Government Sector	23
3. The Fundamental Drivers of Demand	26
3.1. Implications of Our Analysis Based on the Income-Expenditure Balance	26
3.2. The Need for Analysis of Human Desire	28

Chapter 2	Fundamentals of the Theory of Diminishing Utility	31
1.	The Utility Attrition Function and a Model of Human Desire	31
1.1.	The Utility Attrition Function and a Typical Example	31
1.2.	Special Examples of Utility Attrition Functions	33
1.3.	The Relationship Between Diminishing Utility and Human Desire	35
1.4.	A Consideration of Consumption Units	38
2.	Modeling the “Utility Account” and Derivation of the Goods Utility Function	39
2.1.	Modeling the “Utility Account” and Derivation of the Goods Utility Function	40
2.2.	Attributes of the Goods Utility Function	43
2.3.	Changes in the Utility Attrition Rate and Their Impact on Demand	45
2.4.	The Goods Utility Function Under Relaxed Assumptions	47
3.	An Extension of the Concept of Diminishing Utility and Factors that Determine the Utility Attrition Rate	50
3.1.	The Relativity of Utility Attrition Rate Determination	50
3.2.	The Impact of Goods Maintenance and Damage	53
3.3.	Utility Attrition and Its Causes	55
3.4.	Real Utility Attrition and Monetary Utility Attrition	57
Chapter 3	Analysis of a Non-Monetary Economy	59
1.	Derivation of the Expected Goods Utility Function and Determination of Output Quantities	61
1.1.	Maximizing Expected Goods Utility with Multiple Goods	61
1.2.	Derivation of the Expected Goods Utility Function	63
1.3.	Determination of Output Quantities for Given Labor Time	65
2.	Derivation of the Leisure Utility Function	66
3.	Maximization of Expected Total Utility and Simultaneous Determination of Output Quantities and Resource Allocation	67
3.1.	Definition of Expected Total Utility Function and Maximization Conditions	67
3.2.	The “Basic Equation of Labor” and Robinson Crusoe’s Subjective Equilibrium	68
3.3.	Framework for Simultaneous Determination of Output Quantities and Resource Allocation	70

3.4. Meaning and Impact of Changes in the Ratio Between Utility Parameters	70
4. Determination of Pure Investment Good Output Quantity and the Supply-Demand Adjustment Process	72
4.1. Commissioned Labor and Determination of Pure Investment Good Output Quantity	72
4.2. The Supply-Demand Adjustment Process for Pure Investment Goods	73
Chapter 4 Extension to Analysis of a Monetary Economy	75
1. Analysis of a Monetary Economy and Determination of Output Quantities and Resource Allocations	77
1.1. Analysis of Household Behavior	77
1.2. Analysis of Corporate Behavior	81
1.3. Derivation of the Equilibrium Price Ratio	83
1.4. The Income Distribution Principle Under Profit Maximization and Derivation of the Labor Supply Curve	85
1.5. Labor Market Equilibrium	87
1.6. Framework for Simultaneous Determination of Output Quantities and Resource Allocation	90
1.7. Household Savings and Determination of Pure Investment	91
1.8. The Supply-Demand Adjustment Process for Pure Investment Goods	93
2. Introduction of Monetary Elements and Completion of Our Framework	94
2.1. The Loanable Funds Theory and Determination of Interest Rates	94
2.2. The Relationship Between the Utility Attrition Rate and the Money Supply	96
2.3. The Quantity Theory of Money and the Determination of Price and Money Wage Levels	98
3. Measurability of the Utility Attrition Rate	101
3.1. Measuring the Utility Attrition Rate	102
3.2. A Simple Worked Example	103
Chapter 5 Human Psychology and Economic Fluctuation	107
1. Human Psychology and the Economic Cycle	108
1.1. Non-Linearity of the Utility Attrition Function and the	

Emergence of an Economic Cycle	108
1.2. Monetary Factors and Their Impact on the Economic Cycle	114
1.3. The Formation and Collapse of a Financial Bubble	117
1.4. Changes in Industrial Structure and Their Impact on the Economic Cycle	119
2. Human Psychology and Economic Growth	120
2.1. Pure Investment Activity by Firms and Economic Growth	120
2.2. A Brief Consideration of Technological Innovation	122
Chapter 6 The Effectiveness of Aggregate Demand Management Policy	125
1. Controllable Loan Balances and Utility Attrition	125
1.1. The Relationship Between Market Interest Rates and Utility Attrition	125
1.2. Equilibrium Conditions for the Loan Market	127
1.3. Determination of the Utility Attrition Rate and the Market Interest Rate	129
2. The Effectiveness of Aggregate Demand Management Policy and Characteristics of Our Theoretical Framework	131
2.1. The Effects of Fiscal Policy Action	131
2.2. The Effects of Monetary Policy Action	132
2.3. The Classical Dichotomy and Our Theoretical Framework	133
Chapter 7 Dynamic Analysis of Demand Psychology and Policy Implications	135
1. Derivation of the Purchase Price Function for a Representative Household	135
1.1. The Relationship Between Goods Supply Prices and a Household's Reconsumption Cycle	135
1.2. The Purchase Price Function for a Representative Household	137
2. Derivation of the Cumulative Purchase Quantity Function and Dynamic Aspects of Demand	138
2.1. The Distribution of Purchase Prices Throughout the Household Sector and Derivation of the Cumulative Purchase Quantity Function	139
2.2. Dynamic Aspects of the Demand Quantity Determination Process for the Household Sector	140

3. Short-Term Economic Stimulus Measures	142
3.1. The Impact of Non-Discriminatory Spending Policy	142
3.2. The Impact of Non-Discriminatory Spending Policy During a Deep Recession	143
3.3. Discriminatory Spending Policy and Its Effectiveness	145
3.4. Estimating the Cumulative Purchase Quantity Function	147
3.5. Points to Consider Regarding Discriminatory Spending Policy	150
 Chapter 8 A Summary of Our Theoretical Framework	 153
1. A Summary of Our Theoretical Framework and Its Characteristics	153
1.1. A Summary from the Perspective of Microeconomic Theory	153
1.2. A Summary from the Perspective of Macroeconomic Theory	156
1.3. Characteristics of Our Theoretical Framework	159
2. A Brief Discussion of Underemployment Equilibrium Analysis	160
2.1. The Labor Market and Downward Rigidity of Money Wages	160
2.2. Corporate Profit Trends and Labor Adjustments (in Terms of Household Numbers)	163
3. Directions for Future Research	166
