	Preface	vii
1	User's Manual	1
1.1	Expectations	2
1.2	Prerequisites and Further Reading	3
1.3	Styles and Fonts	4
1.4	A Short Introduction to R	6
1.4.1	R Objects	7
1.4.2	Probability Distributions in R	10
1.4.3	Writing New R Functions	11
1.4.4	Input and Output in R	13
1.4.5	Administration of R Objects	13
2	Normal Models	15
2.1	Normal Modeling	16
2.2	The Bayesian Toolkit	19
2.2.1	Bases	19
2.2.2	Prior Distributions	20
2.2.3	Confidence Intervals	25
2.3	Testing Hypotheses	27
2.3.1	Zero-One Decisions	28
2.3.2	The Bayes Factor	29
2.3.3	The Ban on Improper Priors	32
2.4	Monte Carlo Methods	35
2.5	Normal Extensions	43
2.5.1	Prediction	43
2.5.2	Outliers	44
3	Regression and Variable Selection	47
3.1	Linear Dependence	48
3.1.1	Linear Models	50

3.1.2	Classical Estimators	51
3.2	First-Level Prior Analysis	54
3.2.1	Conjugate Priors	54
3.2.2	Zellner's <i>G</i> -Prior	58
3.3	Noninformative Prior Analyses	65
3.3.1	Jeffreys' Prior	65
3.3.2	Zellner's Noninformative <i>G</i> -Prior	67
3.4	Markov Chain Monte Carlo Methods	70
3.4.1	Conditionals	71
3.4.2	Two-Stage Gibbs Sampler	72
3.4.3	The General Gibbs Sampler	76
3.5	Variable Selection	77
3.5.1	Decisional Setting	77
3.5.2	First-Level <i>G</i> -Prior Distribution	78
3.5.3	Noninformative Prior Distribution	80
3.5.4	A Stochastic Search for the Most Likely Model	81
4	Generalized Linear Models	85
4.1	A Generalization of the Linear Model	86
4.1.1	Motivation	86
4.1.2	Link Functions	88
4.2	Metropolis–Hastings Algorithms	91
4.2.1	Definition	91
4.2.2	The Independence Sampler	92
4.2.3	The Random Walk Sampler	93
4.2.4	Output Analysis and Proposal Design	94
4.3	The Probit Model	98
4.3.1	Flat Prior	98
4.3.2	Noninformative <i>G</i> -Priors	101
4.3.3	About Informative Prior Analyses	104
4.4	The Logit Model	106
4.5	Log-Linear Models	109
4.5.1	Contingency Tables	109
4.5.2	Inference Under a Flat Prior	113
4.5.3	Model Choice and Significance of the Parameters	114
5	Capture–Recapture Experiments	119
5.1	Inference in a Finite Population	120
5.2	Sampling Models	121
5.2.1	The Binomial Capture Model	121
5.2.2	The Two-Stage Capture–Recapture Model	123
5.2.3	The <i>T</i> -Stage Capture–Recapture Model	127
5.3	Open Populations	131
5.4	Accept–Reject Algorithms	135
5.5	The Arnason–Schwarz Capture–Recapture Model	138

5.5.1	Modeling	139
5.5.2	Gibbs Sampler	142
6	Mixture Models	147
6.1	Introduction	148
6.2	Finite Mixture Models	148
6.3	MCMC Solutions	154
6.4	Label Switching Difficulty	162
6.5	Prior Selection	166
6.6	Tempering	167
6.7	Variable Dimension Models	170
6.7.1	Reversible Jump MCMC	171
6.7.2	Reversible Jump for Normal Mixtures	174
6.7.3	Model Averaging	179
7	Dynamic Models	183
7.1	Dependent Data	184
7.2	Time Series Models	188
7.2.1	AR Models	188
7.2.2	MA Models	197
7.2.3	State-Space Representation of Time Series Models	201
7.2.4	ARMA Models	203
7.3	Hidden Markov Models	204
7.3.1	Basics	205
7.3.2	Forward-Backward Representation	210
8	Image Analysis	217
8.1	Image Analysis as a Statistical Problem	218
8.2	Computer Vision and Classification	218
8.2.1	The k -Nearest-Neighbor Method	218
8.2.2	A Probabilistic Version of the knn Methodology	220
8.2.3	MCMC Implementation	224
8.3	Image Segmentation	227
8.3.1	Markov Random Fields	228
8.3.2	Ising and Potts Models	232
8.3.3	Posterior Inference	237
	References	247
