1	Metal Cutting Mechanics, Finite Element Modelling.....	1
	<i>Viktor P. Astakhov and José C. Outeiro</i>	
1.1	Advanced Metal Cutting Mechanics	1
1.1.1	Objective of Metal Cutting Mechanics	1
1.1.2	State of the Art	1
1.1.3	Advanced Methodology	4
1.1.4	Combined Influence of the Minor Cutting Edge.....	7
1.1.5	Influence of the Cutting Speed, Depth of Cut and Cutting Feed on Power Partition	9
1.1.6	Concluding Remarks.....	11
1.2	Finite Element Analysis (FEA)	13
1.2.1	Numerical Formulations	14
1.2.2	Modelling Chip Separation from the Workpiece and Chip Segmentation	15
1.2.3	Mesh Design	16
1.2.4	Work Material Modelling	18
1.2.5	Modelling of Contact Conditions.....	19
1.2.6	Numerical Integration	19
1.2.7	Errors	20
1.2.8	Example	20
1.2.9	Advanced Numerical Modelling	21
1.2.10	Model Validation	22
	References.....	25

2	Tools (Geometry and Material) and Tool Wear.....	29
	<i>Viktor P. Astakhov and J. Paulo Davim</i>	
2.1	Essentials of Tool Geometry	29
2.1.1	Importance of the Cutting Tool Geometry	29
2.1.2	Basic Terms and Definitions.....	31
2.1.3	System of Considerations.....	32
2.1.4	Basic Tool Geometry Components	33
2.1.5	Influence of the Tool Angles.....	35
2.2	Tool Materials	37
2.2.1	Carbides	39
2.2.2	Ceramics	43
2.2.3	Cubic Boron Nitride (CBN).....	44
2.2.4	Polycrystalline Diamond (PCD) and Solid Film Diamond (SFD)	45
2.3	Tool Wear.....	48
2.3.1	Tool Wear Types.....	48
2.3.2	Tool Wear Evolution.....	50
2.3.4	Mechanisms of Tool Wear	52
2.4	Tool Life.....	52
2.4.1	Taylor's Tool Life Formula	53
2.4.2	Expanded Taylor's Tool Life Formula.....	55
2.4.3	Recent Trends in Tool Life Evaluation.....	55
	References.....	57
3	Workpiece Surface Integrity.....	59
	<i>Joël Rech, Hédi Hamdi and Stéphane Valette</i>	
3.1	What Does Surface Integrity Mean?.....	59
3.1.1	Link Between Surface Integrity and its Manufacturing Procedure	62
3.1.2	Impact of the Surface Integrity on the Dimensional Accuracy	64
3.1.3	Impact of the Surface Integrity on Fatigue Resistance.....	67
3.2	Material and Mechanical Aspects of Surface Integrity.....	68
3.2.1	Mechanisms Leading to Material and Mechanical Modifications in Machining.....	68
3.2.2	Modelling of Residual Stresses	74
3.2.3	Experimental Approach	80
	References.....	91

4	Machining of Hard Materials	97
	<i>Wit Grzesik</i>	
4.1	Basic Features of HM	97
4.1.1	Definition of Hard Machining	97
4.1.2	Comparison with Grinding Operations	98
4.1.3	Technological Processes Including Hard Machining	100
4.2	Equipment and Tooling	101
4.2.1	Machine Tools	101
4.2.2	Cutting Tools and Materials	102
4.2.3	Complete Machining Using Hybrid Processes	104
4.3	Characterization of Hard Machining Processes	105
4.3.1	Cutting Forces	105
4.3.2	Chip Formation	105
4.3.3	Cutting Temperature	108
4.3.4	Wear of Ceramic and PCBN Tools	110
4.3.5	Modelling of Hard Cutting Processes	110
4.4	Surface Integrity in Hard Machining Processes	113
4.4.1	Surface Roughness	113
4.4.2	Residual Stresses	114
4.4.3	Micro/Nanohardness Distribution and White-Layer Effect	115
4.4.4	Modification of Surface Finish in Hybrid Processes	117
4.4.5	Cutting Errors and Dimensional Accuracy	118
4.5	Applications of Hard Machining Processes	119
4.5.1	Hard Turning	119
4.5.2	Hard and High-Speed Milling of Dies and Moulds	120
4.5.3	Hard Reaming	121
4.5.4	Hard Broaching	122
4.5.5	Hard Skive Hobbing	122
4.5.6	Optimization of Hard Machining Processes	123
	References	124
5	Machining of Particulate-Reinforced Metal Matrix Composites	127
	<i>A. Pramanik, J.A. Arsecularatne and L.C. Zhang</i>	
5.1	Introduction	127
5.2	Effect of Reinforcement Particles on Surface Integrity and Chip Formation	129
5.2.1	Strength of MMC During Machining	130
5.2.2	Chip Shape	131

5.2.3	Surface Integrity.....	135
5.2.4	Shear and Friction Angles.....	142
5.2.5	Relation Between Shear and Friction Angles.....	144
5.2.6	Forces.....	145
5.3	Modelling.....	147
5.3.1	Forces.....	147
5.3.2	Tool-Particle Interaction.....	157
5.4	Tool Wear.....	159
5.4.1	Performance of Cutting Tools.....	159
5.4.2	Modelling of Tool Wear.....	161
	Acknowledgements.....	162
	References.....	162
6	Drilling Polymeric Matrix Composites	167
	<i>Edoardo Capello, Antonio Langella, Luigi Nele, Alfonso Paoletti, Loredana Santo, Vincenzo Tagliaferri</i>	
6.1	Introduction.....	167
6.1.1	What Are Polymeric Matrix Composites?.....	167
6.1.2	The Importance of Drilling.....	171
6.2	Drilling Technology of Polymeric Matrix Composites.....	173
6.2.1	Conventional Drilling Process.....	173
6.2.2	Unconventional Drilling Processes.....	178
6.3	Modelling of Conventional Drilling.....	179
6.3.1	The Need for Modelling.....	179
6.3.2	Cutting Force Modelling.....	180
6.4	Damage Generated During Drilling and Residual Mechanical Properties.....	183
6.4.1	Structural Damage.....	183
6.4.2	Residual Mechanical Properties.....	186
6.5	Damage Suppression Methods.....	188
6.5.1	Introduction.....	188
6.5.2	Process Parameters Selection.....	188
6.5.3	Drilling Conditions.....	189
6.5.4	Special Tools.....	190
	References.....	191
7	Ecological Machining: Near-dry Machining	195
	<i>Viktor P. Astakhov</i>	
7.1	Introduction.....	195
7.2	Amount and Cost.....	196
7.3	Health and Environmental Aspects.....	197
7.4	Principal Directions in the Reduction of MWF Economical, Ecological and Health Impacts.....	198

7.5	Nearly Dry Machining (NDM).....	201
7.5.1	How NDM Operates	201
7.5.2	Classification of NDM.....	202
7.5.3	Why NDM Works.....	212
7.5.4	Consideration of the NDM System Components.....	217
	References.....	221
8	Sculptured Surface Machining	225
	<i>L. Norberto López de Lacalle and A. Lamikiz</i>	
8.1	Introduction	225
8.2	The Manufacturing Process	227
8.2.1	Technologies Involved.....	228
8.2.2	Five-axis Milling.....	229
8.3	The CAM, Centre of Complex Surfaces Production	231
8.4	Workpiece Precision.....	233
8.4.1	Cutting Forces.....	235
8.5	Workpiece Roughness	237
8.6	Tool Path Selection Using Cutting Force Prediction.....	239
8.6.1	Three-axis Case.....	240
8.6.2	Five-axis Case.....	241
8.7	Examples	242
8.7.1	Three-axis Mould.....	242
8.7.2	Five-axis Mould	243
8.7.3	Three-axis Deep Mould	245
8.8	Present and Future	246
	Acknowledgements.....	246
	References.....	247
9	Grinding Technology and New Grinding Wheels	249
	<i>M.J. Jackson</i>	
9.1	Introduction	249
9.2	High-efficiency Grinding Using Conventional Abrasive Wheels .	250
9.2.1	Introduction.....	250
9.2.2	Grinding Wheel Selection	251
9.2.3	Grinding Machine Requirements for High-efficiency Dressing.....	253
9.2.4	Diamond Dressing Wheels.....	253
9.2.5	Application of Diamond Dressing Wheels.....	256
9.2.6	Modifications to the Grinding Process.....	257
9.2.7	Selection of Grinding Process Parameters	257
9.2.8	Selection of Cooling Lubricant Type and Application.....	258

9.3	High-efficiency Grinding Using CBN Grinding Wheels.....	258
9.3.1	Introduction.....	258
9.3.2	Grinding Wheel Selection.....	259
9.3.3	Grinding Machine Requirements for High-efficiency CBN Grinding	264
9.3.4	Dressing High-efficiency CBN Grinding Wheels.....	265
9.3.5	Selection of Dressing Parameters for High-efficiency CBN Grinding	266
9.3.6	Selection of Cooling Lubrication for High-efficiency CBN Grinding Wheels	266
9.4	Internet Resources.....	267
